C-BCFIN-2502問題集、C-BCFIN-2502勉強時間

時間とお金の集まりより正しい方法がもっと大切です。C-BCFIN-2502試験のために勉強していますなら、我々の提供するC-BCFIN-2502試験ソフトはあなたの選びの最高です。信じられないなら、デモをご覧ください。我々も返金保障があります。180日以内、お客様はC-BCFIN-2502試験に失敗したら、我々はおお客様の支払った金額をお客様に戻すことができます。

SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions 認定 C-BCFIN-2502 試験問題 (Q31-Q36):

質問 # 31

What is the primary function of SAP Business Data Cloud?

- A. To unify data from various sources
- B. To optimize supply chain operations
- C. To manage employee benefits
- D. To automate payroll processing

正解: A

質問 # 32

What are examples of internal barriers to achieving the goals of the finance department?

Note: There are 3 correct answers to this question.

- A. Constant regulatory shifts
- B. High cost of capital
- C. Multiple legacy systems
- D. Manual, error-prone processes
- E. Data silos and poor data quality

正解: C、D、E

解説:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

To position SAP Financial Management Solutions effectively, one must understand the internal friction points that prevent a finance department from becoming a strategic partner to the business. Internal barriers are factors within the organization's control that impede efficiency. The most prevalent barriers include manual, error-prone processes, which consume valuable time and increase the risk of financial misstatement. When employees spend the majority of their time on data entry and spreadsheet manipulation, they cannot focus on value-added analysis.

Furthermore, data silos and poor data quality act as major roadblocks. When financial data is trapped in departmental silos, getting a holistic view of the company's performance is impossible, leading to "multiple versions of the truth." This is often exacerbated by the existence of multiple legacy systems that do not communicate with each other. These legacy systems require expensive maintenance and complex reconciliations. While "High cost of capital" (Option A) and "Constant regulatory shifts" (Option D) are certainly challenges for a CFO, they are considered external market or regulatory forces. SAP's value proposition is centered on removing these internal technical and process-oriented barriers by providing a unified, automated, and modern digital platform.

質問 # 33

Which SAP solution is used for managing cash flow and liquidity?

- A. SAP Business One
- B. SAP Ariba
- C. SAP SuccessFactors
- D. SAP Treasury and Risk Management

正解: D

質問 # 34

To which core function of the record to report process is SAP S/4HANA Cloud for group reporting most relevant?

- A. Record
- B. Close
- C. Report
- D. Account

正解: B

解説:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The Record-to-Report (R2R) process encompasses everything from capturing a business transaction to the final disclosure of financial results. Within this cycle, SAP S/4HANA Cloud for group reporting is specifically designed to address the Close function, specifically the corporate consolidation phase. In large organizations with multiple legal entities, the "closing" process involves not just local entity closes, but also the aggregation of data, intercompany eliminations, and currency translations required for group-level reporting.

SAP S/4HANA Cloud for group reporting is uniquely positioned because it is integrated directly into the SAP S/4HANA core. This allows for "continuous accounting" where local data is available for consolidation without the traditional, time-consuming Extract-Transform-Load (ETL) processes required by legacy consolidation tools. By focusing on the Close phase, it ensures that the consolidated financial statements are produced quickly and accurately, meeting the stringent deadlines of regulatory bodies. It bridges the gap between local accounting (the "Record" and "Account" phases) and the final dissemination of results (the "Report" phase), making it the engine that powers the complex financial close of a multi-entity enterprise.

質問 # 35

What are future features with which AI agents are expected to facilitate the Quote to Cash process?

Note: There are 2 correct answers to this question.

- **A. Identify high-risk collections transactions.**
- **B. Recommend working-capital strategies to treasury.**
- C. Automatically solve dispute cases without supervision.
- D. Proactively cut business ties with unreliable customers.

正解: A、B

解説:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

As SAP moves toward "Autonomous Finance," AI agents are expected to evolve from simple automation to proactive decision support within the Quote-to-Cash (Q2C) and Treasury cycles. One key future feature is the ability for AI to identify high-risk collections transactions before they become problematic. By analyzing vast amounts of historical payment behavior, external credit scores, and market trends, AI can flag specific customers or invoices that are likely to result in a dispute or late payment, allowing the collections team to intervene early.

Another advanced capability is the use of AI to recommend working-capital strategies to treasury. In this scenario, the AI agent analyzes the company's current cash position, upcoming payables, and projected receivables to suggest the most efficient use of capital-such as whether to take advantage of early payment discounts or to invest excess liquidity. While AI will significantly assist in solving dispute cases (Option A), doing so "without supervision" is generally not the goal for complex financial disputes, as human oversight remains critical for relationship management. Similarly, cutting ties with customers (Option B) remains a strategic human decision. The value of AI in SAP's roadmap lies in its ability to provide predictive "risk identification" and "strategic recommendations" to enhance human decision-making.
