SAP C-S4PM-2504 Reliable Test Price, C-S4PM-2504 Test Discount Voucher

ITExamDownload has gained the reputation of the many certification industry, because we have a lot of high-quality SAP C-S4PM-2504 Exam C-S4PM-2504 study guide, C-S4PM-2504 exam, C-S4PM-2504 exam answer. As the most professional supplier on the site of IT certification test currently, we provide a comprehensive after-sales service. We provide tracking services to all

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q62-Q67):

NEW QUESTION # 62
Which of the following are SAP Activate workstreams? Note: There are 2 correct answers to this question.

- A. Data Migration
- B. Extensibility
- C. Change Management
- D. Project Management

Answer: A,D

NEW QUESTION # 63
After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. Integration Solution Advisory Methodology
- B. Integration and API List
- C. SAP Cloud ALM Requirements app
- D. SAP Business Accelerator Hub

Answer: A

NEW QUESTION # 64
In the SAP Activate run phase the new system is monitored, maintained, and optimized to ensure it runs smoothly and efficiently. Which change management activity can only be realized in the run phase of the cloud implementation?

- A. Mapping of SAP roles to employees
- B. Development of the user adoption strategy
- C. Measurement of actual user adoption metrics
- D. Conduction of a pulse check

Answer: C

Explanation:
The Run phase of the SAP Activate methodology focuses on operating, monitoring, and optimizing the SAP S/4HANA Cloud Public Edition system post-go-live. Certain change management activities are unique to this phase due to their reliance on live system usage.
* Option A: Mapping of SAP roles to employeesIncorrect. Role mapping occurs in the Explore or Realize phases, when business roles are aligned with employee responsibilities. TheSAP S/4HANA Cloud Security Guidestates, "Role mapping is completed pre-go-live to ensure users have appropriate access upon system activation."
* Option B: Development of the user adoption strategyIncorrect. The user adoption strategy is developed in the Prepare or Explore phases to guide change management efforts. TheSAP S/4HANA Cloud OCM Guidenotes, "The user adoption strategy is defined early in the project to drive effective change management throughout the implementation."
* Option C: Measurement of actual user adoption metricsCorrect. Measuring actual user adoption metrics, such as system usage or process adherence, can only occur in the Run phase when the system is live and users are actively engaging with it. TheSAP Activate Methodology Guideexplains, "In the Run phase, change management includes measuring actual user adoption metrics to assess the effectiveness of adoption efforts and identify areas for improvement."
* Option D: Conduction of a pulse checkIncorrect. Pulse checks, which gauge stakeholder sentiment, can be conducted in multiple phases, including Prepare and Explore, to monitor change readiness. The SAP OCM Guideclarifies, "Pulse checks are performed throughout the project lifecycle to assess stakeholder engagement, not exclusively in the Run phase." Extract from Official Documentation:
* SAP Activate Methodology Guide(SAP Community, https://community.sap.com): "The Run phase includes unique change

management activities such as measuring actual user adoption metrics, which rely on live system data to evaluate the success of adoption initiatives."

* SAP S/4HANA Cloud OCM Guide(SAP Help Portal,https://help.sap.com): "Measuring user adoption metrics is a Run phase activity that assesses how effectively users are engaging with the SAP S

/4HANA Cloud system, enabling targeted optimization efforts."

Additional Context:

Measuring user adoption metrics in the Run phase provides actionable insights into system usage, helping organizations refine training, address resistance, and maximize ROI. This activity is unique to the post-go-live environment, distinguishing it from planning or preparatory change management tasks.

SAP S/4HANA Cloud Study Guide: Explains Run phase activities.

NEW QUESTION # 65

What tool would you use for managing project tasks and Solution Documentation when implementing SAP S /4HANA Cloud, public edition?

* A. SAP Cloud ALM
* B. SAP Roadmap Viewer
* C. SAP Transformation Navigator
* D. SAP Signavio Process Navigator

Answer: A

Explanation:

Managing project tasks and solution documentation during the implementation of SAP S/4HANA Cloud Public Edition requires a robust application lifecycle management tool that integrates with the SAP Activate methodology. The tool must support task tracking, deliverable management, and documentation of the solution configuration.

* Option A: SAP Transformation NavigatorIncorrect. SAP Transformation Navigator is a strategic tool for assessing and planning SAP solution landscapes, not for managing project tasks or solution documentation. TheSAP S/4HANA Cloud Implementation Guidestates, "SAP Transformation Navigator helps customers plan their transformation journey, but it is not designed for project task management or solution documentation."

* Option B: SAP Signavio Process NavigatorIncorrect. SAP Signavio Process Navigator provides process models and best practices but does not manage project tasks or solution documentation. The SAP Signavio Documentationnotes, "SAP Signavio Process Navigator supports process modeling and analysis, not project management or documentation tasks."

* Option C: SAP Roadmap ViewerIncorrect. SAP Roadmap Viewer provides visibility into the SAP Activate roadmap but lacks task management or documentation capabilities. TheSAP Activate Methodology Guideclarifies, "SAP Roadmap Viewer is a reference tool for viewing the Activate roadmap, not an active management tool for tasks or documentation."

* Option D: SAP Cloud ALMCorrect. SAP Cloud ALM (Application Lifecycle Management) is the primary tool for managing project tasks, deliverables, and solution documentation during SAP S

/4HANA Cloud Public Edition implementations. TheSAP Cloud ALM Implementation Guideexplains,

"SAP Cloud ALM supports the implementation of SAP S/4HANA Cloud Public Edition by providing capabilities for project task management, deliverable tracking, and solution documentation, fully aligned with the SAP Activate methodology." Extract from Official Documentation:

* SAP Cloud ALM Implementation Guide(SAP Help Portal,https://help.sap.com): "SAP Cloud ALM is the recommended tool for managing project tasks and solution documentation during SAP S/4HANA Cloud Public Edition implementations, offering a centralized platform for task assignment, progress tracking, and documentation of the configured solution."

* SAP Activate Methodology Guide(SAP Community,https://community.sap.com): "SAP Cloud ALM integrates with the SAP Activate methodology to manage project tasks, deliverables, and solution documentation, ensuring a structured and traceable implementation process for SAP S/4HANA Cloud." Additional Context:

SAP Cloud ALM's comprehensive features, including task management, requirement tracking, and solution documentation, make it the backbone of SAP S/4HANA Cloud Public Edition projects. Its cloud-based nature ensures real-time collaboration and alignment with the agile, iterative approach of SAP Activate, streamlining the implementation process and enhancing project transparency.

NEW QUESTION # 66
After you completed the Explore Phase Quality Gate you notice that the Fit to Standard workshops have been carried out without the input of the finance experts of the Australian office of the customer. The Australian office is scheduled to go live in a later implementation phase. What should you do? Note: There are 2 correct answers to this question.

- A. Put the project on hold and run all required Fit to Standard workshops with Australian users.
- B. Proceed with the as-is plan because the Australian office of the customer is scheduled for a later implementation phase.
- C. Review the scope items to ensure their functionality is available and appropriate for use by Australian users.
- D. Get approval from Australian key users on any of the configuration items that cannot be changed after system provisioning.

Answer: C,D

Explanation:
The Explore phase, including Fit-to-Standard workshops, is critical for validating the solution fit for SAP S
/4HANA Cloud Public Edition. Missing input from a key office, such as the Australian finance experts, requires careful handling, especially if they are part of a later implementation phase.
* Option A: Put the project on hold and run all required Fit to Standard workshops with Australian users.Incorrect. Halting the project is unnecessary and disrupts the timeline, as the Australian office is scheduled for a later phase. TheSAP Activate Methodology Guideadvises, "For phased implementations, input from later-phase stakeholders can be gathered post-Explore, provided critical configurations are validated."
* Option B: Proceed with the as-is plan because the Australian office of the customer is scheduled for a later implementation phase.Incorrect. Proceeding without any action risks misaligned configurations that may be locked post-provisioning, impacting the Australian office. TheSAP S
/4HANA Cloud Implementation Guidewarns, "Ignoring key stakeholder input in early phases can lead to costly rework if non-changeable configurations are misaligned."
* Option C: Get approval from Australian key users on any of the configuration items that cannot be changed after system provisioning.Correct. Configurations like group currency or Fiscal Year Variant are locked after provisioning, so securing approval from Australian users ensures alignment.
TheSAPCentral Business Configuration Guidestates, "For configurations that cannot be changed post- provisioning, such as group currency, approval from all relevant stakeholders, including future-phase users, is critical before finalizing."
* Option D: Review the scope items to ensure their functionality is available and appropriate for use by Australian users.Correct. Reviewing scope items ensures that the selected processes meet the needs of the Australian office, preventing gaps in later phases.
TheSAP S/4HANA Cloud Study Guide notes, "Scope item validation should consider all planned implementation phases to ensure functionality is appropriate for all regions or offices." Extract from Official Documentation:
* SAP Central Business Configuration Guide(SAP Help Portal,https://help.sap.com): "Non-changeable configuration items, such as group currency and Fiscal Year Variant, require approval from all relevant stakeholders, including those in later implementation phases, to avoid misalignment."
* SAP S/4HANA Cloud Implementation Guide: "For multi-phase implementations, scope items should be reviewed to ensure functionality meets the needs of all regions, and non-changeable configurations must be validated with future-phase stakeholders."
Additional Context:
In phased implementations, balancing progress with inclusivity is key. Engaging Australian users for critical configurations and scope validation ensures a scalable solution without delaying the project, aligning with SAP's agile and iterative approach.
:
SAP Help Portal: SAP Central Business Configuration Guide (https://help.sap.com).
