

# Valid PCNSE Real Test, PCNSE Reliable Braindumps Ebook

QUESTION # 108  
Palo Alto Networks PCNSE: Palo Alto Networks Certified Network Engineer (PCNSE) Practice Test  
The 750GB data drive has been inserted in the Firewall USG unit, and the Firewall has been restarted. Using a command > restart restart system [Down] to restart, the Firewall fails to begin the bootstrapping process. The failure is caused because

- A. Palo's version must be 30.x at a minimum and the Firewall is running 10.6.x
- B. The bootstrapping file is a required file that is missing
- C. The Firewall has not been configured with a valid IP address for the unit
- D. The USG cannot be booted using the existing file system. FAT32 is not supported
- E. Firewall must be in factory default state to have all private data deleted for bootstrapping

Answer: D

QUESTION # 109  
What are two valid deployment options for Encryption devices? (Choose two.)

- A. Three separate chassis Security Chassis
- B. One separate chassis Security Chassis
- C. Layer 1 Security Chassis
- D. Layer 2 Security Chassis

Answer: A,C

Explanation  
Explanation

QUESTION # 110  
An administrator connects directly to a Prism Access Remote Networks composite location with three remote networks. What is the maximum amount of bandwidth the administrator can configure at the composite location?

- A. 30Mbps
- B. 50Mbps
- C. 75Mbps
- D. 100 Mbps

Answer: B

Explanation  
Explanation  
The number we specify for the bandwidth we'd like to limit the ingress and egress traffic for the remote network connection. If you specify a bandwidth of 50 Mbps, Prism Access provides you with a remote network connection with 50 Mbps of bandwidth in ingress and 50 Mbps in egress. Your bandwidth speeds can go up to 10% over the specified amount when traffic being dropped. For a 50 Mbps bandwidth, the bandwidth available is 55 Mbps in ingress and 55 Mbps in egress (50 Mbps plus 10% average allowed).

## PCNSE Reliable Braindumps Ebook - PCNSE PDF Cram Exam

We will continue to pursue our passion for better performance and human-centric technology of latest PCNSE quiz prep. And we

guarantee you to pass the exam for we have confidence to make it with our technological strength. A good deal of researches has been made to figure out how to help different kinds of candidates to get the PCNSE certification. We have made classification to those faced with various difficulties, aiming at which we adopt corresponding methods to deal with. According to the statistics shown in the feedback chart, the general pass rate for Latest PCNSE Test Prep is 98%, which is far beyond that of others in this field. In recent years, our PCNSE exam guide has been well received and have reached 99% pass rate with all our dedication. As one of the most authoritative question bank in the world, our study materials make assurance for your passing the PCNSE exam.

Palo Alto Networks PCNSE Certification Exam is designed for individuals who are seeking to become a certified security engineer. It is a comprehensive exam that covers the skills and knowledge required to design, deploy, configure, and troubleshoot Palo Alto Networks security solutions. PCNSE exam is based on the latest PAN-OS 10.0 platform, which is the most advanced version of the software to date.

Palo Alto Networks PCNSE (Palo Alto Networks Certified Security Engineer (PCNSE) PAN-OS 10.0) Exam is a certification program designed to validate the proficiency and expertise of security engineers in deploying Palo Alto Networks Next-Generation Firewall solutions. Palo Alto Networks Certified Network Security Engineer Exam certification exam requires candidates to demonstrate their knowledge, skills, and abilities in designing, configuring, and troubleshooting Palo Alto Networks PAN-OS 10.0 security platforms.

## Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q316-Q321):

### NEW QUESTION # 316

An administrator creates a custom application containing Layer 7 signatures. The latest application and threat dynamic update is downloaded to the same firewall. The update contains an application that matches the same traffic signatures as the custom application.

Which application will be used to identify traffic traversing the firewall?

- A. Custom application
- B. Unknown application
- C. Downloaded application
- D. Incomplete application

**Answer: A**

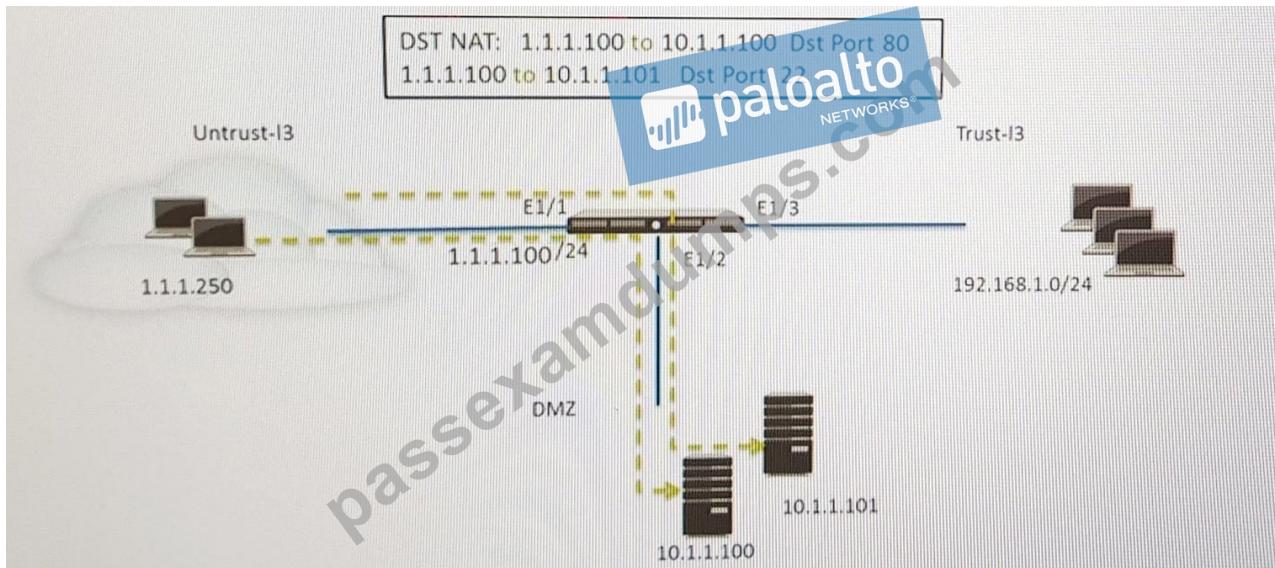

Explanation:

Explanation

<https://docs.paloaltonetworks.com/pan-os/u-v/custom-app-id-and-threat-signatures/custom-application-and-threa>

### NEW QUESTION # 317

Refer to the exhibit.

An administrator is using DNAT to map two servers to a single public IP address. Traffic will be steered to the specific server based on the application, where Host A (10.1.1.100) receives HTTP traffic and Host B (10.1.1.101) receives SSH traffic. Which two

security policy rules will accomplish this configuration? (Choose two.)

- A. Untrust (Any) to Untrust (10.1.1.1), web-browsing -Allow
- B. Untrust (Any) to DMZ (10.1.1.100.10.1.1.101), ssh, web-browsing -Allow
- C. Untrust (Any) to DMZ (10.1.1.1), web-browsing -Allow
- D. Untrust (Any) to DMZ (10.1.1.1), ssh -Allow
- E. Untrust (Any) to Untrust (10.1.1.1), ssh -Allow

**Answer: C,D**

Explanation:

<https://docs.paloaltonetworks.com/pan-os/8-0/pan-os-admin/networking/nat/nat-configuration-examples/destination-nat-example-one-to-many-mapping#>

### NEW QUESTION # 318

Which type of interface does a firewall use to forward decrypted traffic to a security chain for inspection?

- A. Decryption Mirror
- B. Layer 3
- C. Layer 2
- D. Tap

**Answer: B**

Explanation:

Explanation

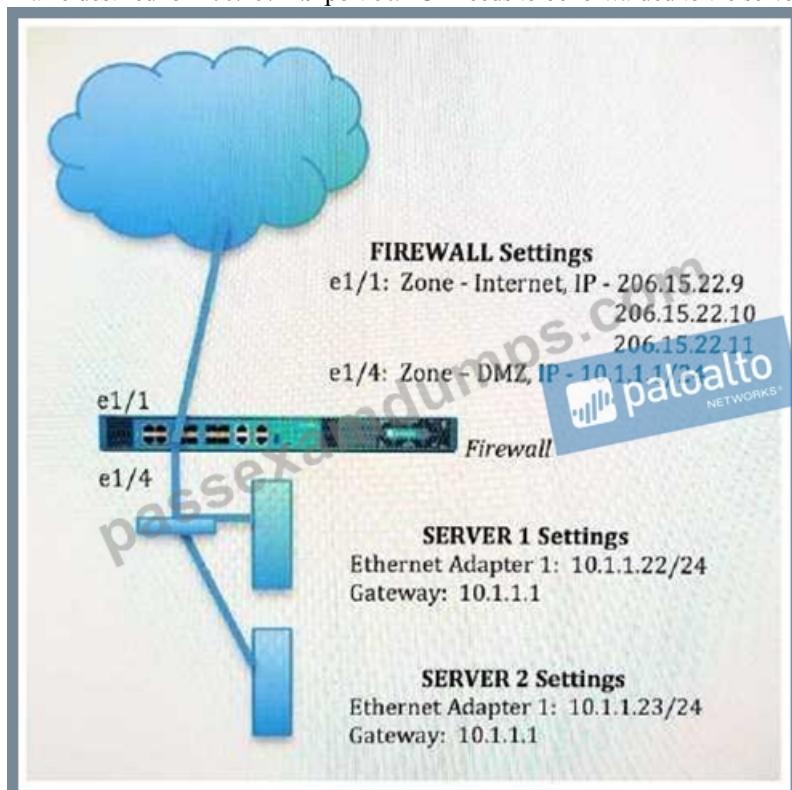

<https://docs.paloaltonetworks.com/pan-os/10-1/pan-os-networking-admin/network-packet-broker/configure-route> Configure security chain devices with Layer 3 interfaces to connect to the security chain network. These Layer 3 interfaces must have an assigned IP address and subnet mask.

<https://docs.paloaltonetworks.com/pan-os/10-0/pan-os-admin/decryption/decryption-broker/security-chain-layer->

### NEW QUESTION # 319

An administrator wants multiple web servers in the DMZ to receive connections initiated from the internet.

Traffic destined for 206.15.22.9 port 80/TCP needs to be forwarded to the server at 10.1.1.22

Based on the information shown in the image, which NAT rule will forward web-browsing traffic correctly?

A: Option

Source IP: Any  
Destination IP: 206.15.22.9  
Source Zone: Internet  
Destination Zone: DMZ  
Destination Service: 80/TCP  
Action: Destination NAT  
Translated IP: 10.2.2.23  
Translated Port: 53/UDP

B: Option

Source IP: Any  
Destination IP: 206.15.22.9  
Source Zone: Internet  
Destination Zone: Internet  
Destination Service: 80/TCP  
Action: Destination NAT  
Translated IP: 10.1.1.22  
Translated Port: 53/UDP

C: Option

Source IP: Any  
Destination IP: 206.15.22.9  
Source Zone: Internet  
Destination Zone: Internet  
Destination Service: 80/TCP  
Action: Destination NAT  
Translated IP: 10.1.1.22  
Translated Port: None

D: Option

Source IP: Any  
Destination IP: 206.15.22.9  
Source Zone: Internet  
Destination Zone: DMZ  
Destination Service: 80/TCP  
Action: Destination NAT  
Translated IP: 10.1.1.22  
Translated Port: 80

- A. Option B
- **Option D**
- C. Option C
- D. Option A

**Answer: B**

#### NEW QUESTION # 320

An administrator is using Panorama to manage multiple firewalls. After upgrading all devices to the latest PAN-OS software, the administrator enables log forwarding from the firewalls to Panorama.

However, pre-existing logs from the firewalls are not appearing in Panorama.

Which action should be taken to enable the firewalls to send their pre-existing logs to Panorama?

- A. Use the ACC to consolidate the logs.
- B. Use the import option to pull logs.

- C. Export the log database.
- D. Use the **scp logdb export** command.

**Answer: D**

Explanation:

<https://docs.paloaltonetworks.com/pan-os/9-1/pan-os-cli-quick-start/use-the-cli/use-secure-copy-to-import- and-export-files/export-and-import-a-complete-log-database-logdb>
