Reliable ISO-IEC-27001-Foundation Exam Test, ISO-IEC-27001-Foundation New Test Bootcamp

Our ISO-IEC-27001-Foundation exam questions are compiled by experts and approved by the professionals with years of experiences. The language is easy to be understood which makes any learners have no obstacles and our ISO-IEC-27001-Foundation guide torrent is suitable for anyone. The content is easy to be mastered and has simplified the important information. Our ISO-IEC-27001-Foundation test torrents convey more important information with less questions and answers and thus make the learning relaxing and efficient. With our ISO-IEC-27001-Foundation exam questions, your will pass the ISO-IEC-27001-Foundation exam with ease.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 2	<ul style="list-style-type: none">• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 3	<ul style="list-style-type: none">• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 4	<ul style="list-style-type: none">• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 5	<ul style="list-style-type: none">• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 6	<ul style="list-style-type: none">• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 7	<ul style="list-style-type: none">• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 8	<ul style="list-style-type: none">• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21

What international standard provides guidance on the integration of ISO/IEC 27001 and the IT Service Management standard?

- A. ISO/IEC 27002
- **B. ISO/IEC 27013**
- C. None of the above
- D. ISO/IEC 20000-1

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27013 standards:

ISO/IEC 27013 is titled:

"Information technology - Security techniques - Guidance on the integrated implementation of ISO/IEC 27001 and ISO/IEC 20000-1."

This standard provides organizations with specific advice on how to integrate an Information Security Management System (ISMS) with an IT Service Management System (ITSMS). ISO/IEC 20000-1 is the IT Service Management requirements standard, but integration guidance is provided in 27013. ISO/IEC 27002 (A) is guidance for controls, not integration. Option D is incorrect since ISO/IEC 27013 explicitly exists for this purpose.

Therefore, the correct verified answer is B: ISO/IEC 27013.

NEW QUESTION # 22

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Communicating feedback from interested parties to the organization
- B. Producing a risk assessment report
- C. Implementing the actions from internal audits
- **D. Ensuring information security objectives are established**

Answer: D

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

* "ensuring the integration of the ISMS requirements into the organization's processes;"

* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

NEW QUESTION # 23

Which attribute is NOT a required focus of continual ISMS improvement?

- **A. Importance**
- B. Adequacy
- C. Effectiveness
- D. Suitability

Answer: A

Explanation:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

* Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.

* Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.

* Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

NEW QUESTION # 24

Which statement is a factor that will influence the implementation of the information security management system?

- A. The ISMS will be operated as an independent process within the organization
- **B. The ISMS will be scaled to the controls according to the needs of the organization**
- C. The ISMS will be separate from the organization's overall management structure
- D. The ISMS will encompass all controls specified within ISO/IEC 27001

Answer: B

Explanation:

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of

activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

NEW QUESTION # 25

Which is a control title within Annex A of ISO/IEC 27001?

- A. Change control
- **B. Information security in supplier relationships**
- C. Protection of documents
- D. Responsibilities and procedures

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

In ISO/IEC 27002:2022, which provides control guidance for Annex A of ISO/IEC 27001, Clause 5.19 is titled: "Information security in supplier relationships." This control requires organizations to ensure that information security is addressed in supplier agreements and relationships. It is part of the Organizational Controls theme. The other options are not control titles in Annex A:

* "Responsibilities and procedures" (B) was used in older standards like ISO/IEC 27001:2005 but no longer exists.

* "Protection of documents" (C) relates to document control but is not a specific Annex A control.

* "Change control" (D) is relevant to ITIL/ITSM but not listed as a control title in Annex A.

Therefore, the correct Annex A control title is A: Information security in supplier relationships.

NEW QUESTION # 26

.....

The APMG-International market has become so competitive and tough with time. To satisfy this task the professionals have to analyze new in-name for skills and improve their expertise. With the APMG-International ISO-IEC-27001-Foundation certification exam they could do that activity fast and well. Your examination training with APMG-International Certification Questions is our top priority at TestKingIT. To do this they just join up in ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) certification exam and show a few firm dedication and self-discipline and prepare well to crack the ISO-IEC-27001-Foundation examination.
