In order to meet the different needs of customers, we have created three versions of our PMI-ACP guide questions. Of course, the content of the three versions is exactly the same, but the displays are the totally different, so you only need to consider which version of our PMI-ACP study braindumps you prefer. Perhaps you can also consult our opinions if you don't know the difference of these three versions. Or you can free download the demos of the PMI-ACP exam braindumps to check it out.

Prerequisites

The PMI-ACP exam is designed for those individuals who work in Agile teams or organizations that adopt Agile practices. Please note that the applicants must meet the following requirements before taking the test:

- Have a secondary degree;
- Hold 12 months of working experience in the general project within the last 5 years;
- Have 8 months of working experience in the Agile project within the last 3 years.
- Possess 21 hours of training in Agile practices;

PMI-ACP certification exam is a rigorous test of a candidate's knowledge and skills in agile project management. To prepare for the exam, candidates need to have a solid understanding of agile methodologies and tools. Many candidates choose to take formal training courses, such as PMI-ACP training, to prepare for the exam. These courses provide candidates with the knowledge and skills they need to pass the exam and become certified.

Answer: B

Explanation:

Explanation/Reference:

NEW QUESTION # 378

Which term best describes an Agile project's approach to risk analysis?

- A. Qualitative
- **B. Monte Carlo**
- C. Pareto
- D. Regression

Answer: B

NEW QUESTION # 379

A software team is developing a product in an environment with increased uncertainty. Although there is a clear vision of the goals to be achieved, the product owner is not fully certain about how some of the product features should work. How should the product owner address this situation?

- **A. Develop a prototype of the product to obtain feedback from users.**
- B. Improve the product testing and quality assurance skills among the team
- C. Consider moving to a more predictive product development approach.
- D. Facilitate more product planning sessions with the software team.

Answer: A

NEW QUESTION # 380

An agile lead has been assigned to a project to develop an innovative digital device for a consumer products company. The company asked the agile lead to use a Scrum approach to product development. The product owner has worked on Scrum projects before and is excited about the value Scrum will bring to the company. What should the scrum master do first?

- **A. Request an existing cross-functional team be dedicated to the project**
- B. Obtain specific product requirements from a customer focus group.
- C. Build a product roadmap that shows the features and releases.
- D. Develop a project budget based on the project charter.

Answer: A

NEW QUESTION # 381

If an individual is working on a project team in a phase delivering an increment, according to the definition of done (DoD), who was that defined by?

- A. Scrum master
- B. Stakeholders and project team
- **C. Project sponsor and project team**
- D. Product owner

Answer: C

Explanation:

The Definition of Done (DoD) is a shared understanding of what it means for work to be considered complete. It is typically defined by the project sponsor and project team in collaboration. The DoD outlines the criteria that must be met for user stories, features, or tasks to be considered done, ensuring alignment between stakeholders and the development team. While the product owner, Scrum master, and stakeholders may influence the criteria, the final agreement on what constitutes "done" is determined by the project team and sponsor.
