Reliable H13-527_V5.0 Dumps Ebook Pass Certify| Latest Cert H13-527_V5.0 Exam: HCIP-Cloud Computing V5.0

Under the leadership of a professional team, we have created the most efficient learning H13-527_V5.0 training guide for our users. Our users use their achievements to prove that we can get the most practical knowledge in the shortest time. H13-527_V5.0 exam questions are tested by many users and you can rest assured. If you want to spend the least time to achieve your goals, H13-527_V5.0 Learning Materials are definitely your best choice. You can really try it we will never let you down!

Huawei HCIP-Cloud Computing V5.0 Sample Questions (Q21-Q26):

NEW QUESTION # 21

In Huawei Cloud Stack solution, FusionSphere OpenStack is used as the cloud platform to integrate the resources of various physical data centers; ManageOne is used as the data center management software to provide unified management of multiple data centers.

- A. True
- B. False

Answer: A

NEW QUESTION # 22

In Huawei Cloud Stack, which of the following descriptions about the use of Cloud DNS, the cloud resolution service, are correct?
(Multiple choice)

- A. The cloud resolution service currently only supports intranet resolution in the same region.
- B. The cloud resolution service currently only supports IPv4 addresses.
- C. The cloud resolution service currently supports intranet resolution within the same region and across regions.
- D. Cloud resolution service currently supports IPv4 and IPv6 addresses

Answer: A,D

NEW QUESTION # 23

In Huawei Cloud Stack, which of the following is not an alarm handling mechanism?

- A. Alarm merging rules
- B. Alarm discarding rules
- C. Alarm full processing rules
- D. Alarm dump rules

Answer: B

NEW QUESTION # 24

In HUAWEI CLOUD Stack, to view details about a specific instance, you can run openstack server _____ < server > . The < server > parameter specifies the instance ID or name. Which of the following parameters should be entered in the blank?

- A. show
- B. conf
- C. list
- D. query

Answer: A

Explanation:

The correct answer is C. show . Official OpenStack command-line documentation explicitly lists the command openstack server show < server > and explains that it is used to show server details . The same documentation states that the < server > argument represents the server name or ID , which matches the wording in your question exactly.

The other options are not correct in this context. openstack server list displays a list of servers rather than the details of one specific instance. query and conf are not valid standard subcommands for this OpenStack server-detail operation. Since HUAWEI CLOUD Stack operations in this area follow OpenStack command syntax for instance inspection and lifecycle management, the proper command for viewing one instance's details is openstack server show < server > .

Therefore, after correcting the sentence format, the blank should be filled with show , and the full verified command is openstack server show < server > . That makes the correct answer C .

NEW QUESTION # 25

In Huawei Cloud Stack, comprehensive monitoring refers to centralized monitoring of all alarms or the overall dimension of the data center.

Which of the following is not within the scope of comprehensive monitoring?

- A. Big data application monitoring
- B. Monitoring Dashboard
- C. Large screen monitoring
- D. Alarm monitoring

Answer: A

NEW QUESTION # 26

.....

Everyone is looking for ways to improve their ability. How can you stand out? Perhaps you can beat them in time. Our H13-527_V5.0 exam materials don't require you to spend a lot of time learning, you can go to the H13-527_V5.0 exam after you use them for twenty to thirty hours. This means that you can pass several exams when someone else passes an exam! Is it amazing? Yes, and only with our H13-527_V5.0 Practice Engine, you can achieve all of these for we are the leader in this career for over ten years.
