BCS ISTQB Certified Tester Foundation Level CTFL 4.0 Sample Questions (Q99-Q104):

NEW QUESTION # 99

Consider the following list of possible benefits of retrospectives (A to D):

- A. A1 - B4 - C3 - D2
- B. Better cooperation between development and testing
... and the list of possible characteristics of retrospectives (1 to 4) that enable achieving these benefits:
The possibility of implementing suggestions for process improvement
The opportunity to raise problems and propose points for improvement
The regular review and optimization of the collaboration between team members
The possibility of addressing and solving deficiencies in the extent and quality of the requirements
Which ONE of the following options presents the BEST mapping between benefits and characteristics from retrospectives?
- C. A2 - B1 - C4 - D3
- D. A3 - B2 - C1 - D4
- **E. Increased test effectiveness/efficiency**
- F. Improved quality of the test basis
- G. Team bonding and learning
- H. A4 - B3 - C2 - D1

Answer: E

Explanation:

Comprehensive and Detailed In-Depth Explanation: Retrospectives provide value by fostering improvement and collaboration. The correct mapping is:

- * A2: Team bonding occurs when teams openly discuss issues.
- * B1: Test effectiveness increases when process improvements are implemented.
- * C4: Test basis improves by addressing requirement deficiencies.
- * D3: Cooperation improves through regular review of collaboration.

NEW QUESTION # 100

The whole-team approach:

- A. promotes the idea that all team members should have a thorough understanding of test techniques
- B. is a consensus-based approach that engages the whole team in estimating the user stories
- C. is mostly adopted in projects aimed at developing safety-critical systems, as it ensures the highest level of testing independence
- **D. promotes the idea that all team members should be responsible for the quality of the product**

Answer: D

Explanation:

This answer is correct because the whole-team approach is a way of working in agile projects where all team members share the responsibility for the quality of the product, and collaborate on delivering value to the customer. The whole-team approach involves testers, developers, business analysts, product owners, and other stakeholders in planning, designing, developing, testing, and delivering the product. The whole-team approach fosters communication, feedback, learning, and continuous improvement within the team. NEW QUESTION # 101

You are an experienced tester on a project with incomplete requirements and under pressure to deploy. What type of testing should you do?

- A. Decision-based testing
- **B. Exploratory testing**
- C. Error guessing
- D. Checklist-based testing

Answer: B

Explanation:

When working on a project with incomplete requirements and under pressure to deploy, exploratory testing is particularly suitable. This type of testing allows testers to use their expertise and intuition to explore the system's functionality and identify defects without needing detailed specifications. Exploratory testing is flexible and can quickly adapt to changes and gaps in the requirements.

NEW QUESTION # 102

Which of the following statements about the typical activities of a formal review process is TRUE?

- A. Individual review is only mandatory when the size of the work product under review is too large to cover at the review meeting
- B. One of the main goals of the review meeting is to make sure that all participants are aware of their roles and responsibilities in the review process
- C. Various review techniques that may be applied by participants during individual review are described in the ISO/IEC/IEEE 29119-3 standard.
- D. Choosing which standards to follow during the review process is usually made during review planning.

Answer: D

Explanation:

During the review planning stage, key decisions are made, including the selection of standards and procedures to be followed during the review. This planning phase ensures that the review process is structured and adheres to agreed-upon standards, which can come from industry standards such as ISO/IEC/IEEE 29119-3. The ISTQB CTFL Syllabus v4.0 emphasizes the importance of review planning in establishing the framework and guidelines for the review process.

NEW QUESTION # 103

The whole-team approach:

- A. promotes the idea that all team members should have a thorough understanding of test techniques
- B. is a consensus-based approach that engages the whole team in estimating the user stories
- C. is mostly adopted in projects aimed at developing safety-critical systems, as it ensures the highest level of testing independence
- D. promotes the idea that all team members should be responsible for the quality of the product

Answer: D

Explanation:

This answer is correct because the whole-team approach is a way of working in agile projects where all team members share the responsibility for the quality of the product, and collaborate on delivering value to the customer. The whole-team approach involves testers, developers, business analysts, product owners, and other stakeholders in planning, designing, developing, testing, and delivering the product. The whole-team approach fosters communication, feedback, learning, and continuous improvement within the team.
