PassTIP의 연구팀에서는Salesforce Plat-Dev-210인증덤프만 위하여 지금까지 노력해왔고 PassTIP 학습가이드 Salesforce Plat-Dev-210덤프로 시험이 어렵지 않아졌습니다. PassTIP는 100%한번에Salesforce Plat-Dev-210이장 시험을 패스할 것을 보장하며 우리가 제공하는 문제와 답을 시험에서 백프로 나올 것입니다.여러분이Salesforce Plat-Dev-210시험에 응시하여 우리의 도움을 받는다면 PassTIP에서는 꼭 완벽한 자료를 드릴 것을 약속합니다. 또한 일년무료 업데이트서비스를 제공합니다.즉 문제와 답이 갱신이 되었을 경우 우리는 여러분들한테 최신버전의 문제와 답을 다시 보내드립니다.

Salesforce Plat-Dev-210 시험요강:

주제	소개
주제 1	• Omnistudio Data Mappers: This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.
주제 2	• Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.
주제 3	• Omniscripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
주제 4	• Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.
주제 5	• Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.

Plat-Dev-210합격보장 가능 공부자료 최신 업데이트된 덤프공부자료

PassTIP의 Salesforce 인증 Plat-Dev-210시험덤프공부자료 출시 당시 저희는 이런 크나큰 인지도를 갖출수 있을지 생각도 못했었습니다. 저희를 믿어주시고 구매해주신 분께 너무나도 감사한 마음에 더욱 열심히 해나가자는 결심을 하였습니다. Salesforce 인증 Plat-Dev-210덤프자료는PassTIP의 전문가들이 최선을 다하여 갈고닦은 예술품과도 같습니다.100% 시험에서 패스하도록 저희는 항상 힘쓰고 있습니다.

최신 Salesforce Developer Plat-Dev-210 무료샘플문제 (Q91-Q96):

질문 # 91

Refer to the exhibit below. In this integration production structure, what Send JSON Path would be used to send the Output of the Action1 element to a Remote Action?

- A. BlockA: BlockB. Action 1
- B. Action1. BlockB. Block A
- C. Action1: BlockB. Block A
- D. BlockB:BlockB. Action1

정답: C

설명:

The correct syntax for the Send JSON Path is ActionName: BlockName, where ActionName is the name of the action element and BlockName is the name of the block element that contains the output data. The other options are either missing the colon or using incorrect names.

질문 # 92

A developer is creating anOmniScript that Provisions trial orgs to their customers. The following text block in the OmniScript uses a merge code to display the ID for the new trial org:

Welcome to Salesforce

Your ID is %Details: Customer10:ID%

During testing, the developer notices that the ID does not display. The data JSON is structured as shown below.

How should the developer correct the merge code in order for the ID to display?

- A. To %%Details:Customer10:ID%%
- B. To %%Details:Customer{n:ID%

- C. To %%Details:Customer|1:ID%%
- D. To \$Details:Customer|0:ID\$

정답: C

설명:

The merge code syntax for accessing an array element is %%Details:Customer|1:ID%%, where 1 is the index of the element. The index starts from 1, not 0, so the first element is Customer|1. The % sign is used for single- value merge codes, not array merge codes. The \$ sign is used for variables, not merge codes.

질문 # 93

A developer needs to limit the of a DataRaptorExtract to a maximum of one result.
How should the developer configure this?

- A. Use a Custom Output Type when creating the DataRaptor
- B. Set the Limit Property on the Action that calls the DataRaptor Extract.
- C. Use the LIMIT filter on the Extract definition
- D. Define a formula with the Filter function

정답: C

설명:

Using the LIMIT filter on the Extract definition allows the developer to specify the maximum number of results to return from the DataRaptor Extract. Defining a formula with the Filter function is used to filter the results based on a condition. Using a Custom Output Type when creating the DataRaptor is used to define the structure of the output data. Setting the Limit Property on the Action that calls the DataRaptor Extract has no effect on limiting the results.

질문 # 94

A developer is creating a Flex Card for a new Community page. The FlexCard will display case information along with action to close the case and update the case. And it will be styled using the Community's theme.
What must be developer do to configure the FlexCard for deployment in a community?

- A. Configure the Component visibility in the custom Component.
- B. Add the FlexCard's API name to FlexCard Player component
- C. Set the Target property in publishing Options to the Community page"
- D. Set the Developer property in Card Configuration to "Community"

정답: C

설명:

The Target property in publishing Options determines where the FlexCard will be displayed. Setting it to the Community page will make the FlexCard available in the community

질문 # 95

Why would a developer clone an Integration Procedure instead of versioning it?

- A. The new Integration Procedure will be used independently.
- B. The new Integration Procedure is replacing stub data.
- C. The new Integration Procedure uses a Cache Block.
- D. The new Integration Procedure is Chainable.

정답: A

설명:

OmniStudio best practices dictate that versioning is used when enhancements are required within the same logical flow, while cloning is preferred when the new flow is functionally different and used separately.

* B. The new Integration Procedure will be used independently - Correct. Cloning creates an entirely new IP definition, ideal for building a similar but standalone process, rather than altering behavior for an existing process.

- * A. Using a Cache Block is unrelated to cloning vs. versioning.
- * C. Replacing stub data does not require cloning; could be done in a version.
- * D. Chainability does not influence whether you should clone or version.
