## Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q93-Q98):

### NEW QUESTION # 93

How many usable hosts are in a /24 subnet mask?

- A. 0
- B. 1
- C. 2

- D. 3

**Answer: B**

Explanation:

A /24 subnet provides 256 total IP addresses, and after excluding the network and broadcast addresses, 254 usable host addresses remain.

#### NEW QUESTION # 94

Which two actions does the monitor traffic command perform? (Choose two.)

- A. It monitors traffic that originates or terminates on the local PFE.
- **B. It monitors traffic that originates or terminates on the local RE.**
- **C. It provides access to the tcpdump utility.**
- D. It displays real-time log information on your terminal.

**Answer: B,C**

Explanation:

The monitor traffic command provides packet capture functionality similar to tcpdump. It captures traffic processed by the Routing Engine, meaning traffic that originates from or is destined to the device itself.

#### NEW QUESTION # 95

Which two functions are performed by the PFE? (Choose two.)

- A. It creates the routing table.
- **B. It processes exception traffic.**
- C. It creates the forwarding table.
- **D. It forwards incoming traffic.**

**Answer: B,D**

Explanation:

The Packet Forwarding Engine forwards transit traffic at high speed and also handles certain exception traffic that requires special forwarding treatment.

#### NEW QUESTION # 96

Which two statements correctly describe how Junos OS handles control and forwarding functions? (Choose two.)

- **A. The Packet Forwarding Engine (PFE) forwards packets based on forwarding tables received from the Routing Engine.**
- B. Transit traffic is processed by the Routing Engine to ensure high-speed packet forwarding.
- **C. The Routing Engine (RE) is responsible for maintaining routing tables and running routing protocols.**
- D. Exception traffic is always dropped by the Packet Forwarding Engine without being inspected.

**Answer: A,C**

Explanation:

The Packet Forwarding Engine uses forwarding tables provided by the Routing Engine to forward traffic efficiently. The Routing Engine maintains routing tables and runs routing protocols as part of control plane operations.

#### NEW QUESTION # 97

Your network infrastructure transports data, voice, and video traffic. Users are complaining that voice and video calls are not performing to their expectations. In this scenario, which technology would you implement to improve voice and video performance on your network?

- A. STP
- **B. CoS**
