In this Desktop-based VMware 2V0-13.25 practice exam software, you will enjoy the opportunity to self-exam your preparation. The chance to customize the VMware 2V0-13.25 practice exams according to the time and types of VMware Cloud Foundation 9.0 Architect (2V0-13.25) practice test questions will contribute to your ease. This format operates only on Windows-based devices. But what is helpful is that it functions without an active internet connection. It copies the exact pattern and style of the real VMware Cloud Foundation 9.0 Architect (2V0-13.25) exam to make your preparation productive and relevant.

Confronting a tie-up during your review of the exam? Feeling anxious and confused to choose the perfect 2V0-13.25 latest dumps to pass it smoothly? We understand your situation of susceptibility about the exam, and our 2V0-13.25 test guide can offer timely help on your issues right here right now. Without tawdry points of knowledge to remember, our experts systematize all knowledge for your reference. You can download our free demos and get to know synoptic outline before buying. Just hold the supposition that you may fail the exam even by the help of our 2V0-13.25 Study Tool, we can give full refund back or switch other versions for you to relieve you of any kind of losses. What is more, we offer supplementary content like updates for one year after your purchase.

100% Pass-Rate 2V0-13.25 Latest Exam Vce - Best Accurate Source of 2V0-13.25 Exam

Improve Your Profession With 2V0-13.25 Questions. VMware Cloud Foundation 9.0 Architect Questions – Best Strategy for Instant Preparation. To achieve these career objectives, you must pass the VMware Cloud Foundation 9.0 Architect examination. Are you ready to prepare for the challenging 2V0-13.25test? Are you looking for the best VMware Exam practice material? If your answer is yes, then you should rely on Lead1Pass and get 2V0-13.25 Real Exam Questions. Download these actual 2V0-13.25 Exam Dumps and start your journey.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
Topic 2	<ul style="list-style-type: none">Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.
Topic 3	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 4	<ul style="list-style-type: none">Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.
Topic 5	<ul style="list-style-type: none">VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which VMware tools help automate, monitor, and manage cloud environments in VMware Cloud Foundation?

- A. VMware vRealize Automation
- B. VMware vSphere
- C. VMware vRealize Orchestrator
- D. VMware vRealize Operations

Answer: A,C,D

Explanation:

VMware vRealize Suite tools like Orchestrator, Automation, and Operations help automate and monitor cloud environments within VMware Cloud Foundation.

NEW QUESTION # 30

Which Broadcom products are essential when configuring VMware storage with high throughput?

- A. vSAN
- B. Broadcom 25GbE Ethernet Adapter
- C. Broadcom NVMe SSD
- D. Fibre Channel HBA

Answer: A,B,C

Explanation:

Broadcom 25GbE Ethernet Adapters, NVMe SSDs, and vSAN are critical for high-throughput VMware storage configuration.

NEW QUESTION # 31

What are the best practices for optimizing VMware network performance with Broadcom adapters?

- A. Implement Load Balancing
- B. Enable Jumbo Frames
- C. Use VMware vSwitches with 10GbE adapters
- D. Disable network adapter teaming

Answer: A,B,C

Explanation:

Jumbo Frames, 10GbE vSwitches, and load balancing improve network performance in VMware.

NEW QUESTION # 32

Requirement: The solution must identify any configuration changes made to the Management Infrastructure every 30 days. Which three design decisions should the architect make to meet the stated requirements? (Choose three.)

- A. Schedule Configuration Drift to Check the configuration every 30 days.
- B. Create a Configuration Template for the Management NSX Manager.
- C. Configure a Configuration Template for the Management vCenter.
- D. Configure a Configuration Template for the Management Cluster.
- E. Schedule Configuration Drift to Remediate the configuration every 30 days.
- F. Configure Host Profiles for the Workload Domain.

Answer: A,B,D

Explanation:

To track configuration drift in VMware Cloud Foundation, the solution uses Configuration Templates and drift checks:

* A: Template for the Management Cluster ensures cluster-level baseline is tracked.

* B: Scheduling drift check every 30 days ensures changes are detected.

* D: Template for NSX Manager ensures network and security components are included in drift detection.

C (Management vCenter) is not separately templated, it's part of cluster drift.

E (remediation every 30 days) is not required - detection is enough.

F (Host Profiles) is vSphere-specific, not aligned with VCF's drift management framework.

Reference: VMware Cloud Foundation 9.0 - Configuration Drift Management.

NEW QUESTION # 33

What techniques can optimize Broadcom Fibre Channel performance in VMware environments?

- A. Limit Fibre Channel zoning to necessary devices
