The self-learning and self-evaluation functions of our 212-82 guide materials help the clients check the results of their learning of the 212-82 Study Materials. The timing function of our 212-82 training quiz helps the learners to adjust their speed to answer the questions and keep alert and our study materials have set the timer.

ECCouncil Certified Cybersecurity Technician Sample Questions (Q69-Q74):

NEW QUESTION # 69
A software team at an MNC was involved in a project aimed at developing software that could detect the oxygen levels of a person without physical contact, a helpful solution for pandemic situations. For this purpose, the team used a wireless technology that could digitally transfer data between two devices within a short range of up to 5 m and only worked in the absence of physical blockage or obstacle between the two devices, identify the technology employed by the software team in the above scenario.

- A. CPS
- B. Satcom
- C. Infrared
- D. USB

Answer: C

Explanation:
Explanation of Correct answer: Infrared is a wireless technology that can digitally

NEW QUESTION # 70

Kevin, a professional hacker, wants to penetrate CyberTech Inc.'s network. He employed a technique, using which he encoded packets with Unicode characters. The company's IDS cannot recognize the packet, but the target web server can decode them. What is the technique used by Kevin to evade the IDS system?

- A. Obfuscating
- B. Desynchronization
- C. Urgency flag
- D. Session splicing

Answer: A

NEW QUESTION # 71

TechSolutions, a leading IT consultancy, has been contracted to overhaul the wireless network infrastructure for the city's public libraries. With thousands of users accessing the network daily, there is a critical need for robust encryption that can deter potential threats. TechSolutions must also consider the diverse range of devices used by library-goersand ensure backward compatibility. Which encryption mechanism would best suit this scenario?

- A. TKIP (Temporal Key Integrity Protocol)
- B. WEP (Wired Equivalent Privacy)
- C. WPA3 (Wi-Fi Protected Access 3)
- D. AES-CCMP (Advanced Encryption Standard with Counter Mode Cipher Block Chaining Message Authentication Code Protocol)

Answer: C

NEW QUESTION # 72

Johnson, an attacker, performed online research for the contact details of reputed cybersecurity firms. He found the contact number of sibertech.org and dialed the number, claiming himself to represent a technical support team from a vendor. He warned that a specific server is about to be compromised and requested sibertech.org to follow the provided instructions. Consequently, he prompted the victim to execute unusual commands and install malicious files, which were then used to collect and pass critical Information to Johnson's machine. What is the social engineering technique Steve employed in the above scenario?

- A. Phishing
- B. Diversion theft
- C. Quid pro quo
- D. Elicitation

Answer: C

Explanation:
Quid pro quo is the social engineering technique that Johnson employed in the above scenario.
Quid pro quo is a social engineering method that involves offering a service or a benefit in exchange for information or access. Quid pro quo can be used to trick victims into believing that they are receiving help or assistance from a legitimate source, while in fact they are compromising their security or privacy. In the scenario, Johnson performed quid pro quo by claiming himself to represent a technical support team from a vendor and offering to help sibertech.org with a server issue, while in fact he prompted the victim to execute unusual commands and install malicious files, which were then used to collect and pass critical information to Johnson's machine.

NEW QUESTION # 73

A major metropolitan municipal corporation had deployed an extensive loT network for managing various facilities in the city. A recent cyber attack has paralyzed the city's vital services, bringing them to a complete halt. The Security Operations Center (SOC) has captured the network traffic during the attack and stored It as loT_capture.pcapng in the Documents folder of the Attacker

Machine-1. Analyze the capture file and identify the command that was sent to the IoT devices over the network. (Practical Question)

- A. Woodland_Blaze_Warninggil
- B. Nature_Blaze_Warning555
- C. Forest_Fire_Alert444
- D. Woodland_Blaze_Warning999

Answer: C

Explanation:
To analyze the IoT network traffic capture and identify the command sent to IoT devices, follow these steps:
* Open the Capture File:
* Use a network analysis tool like Wireshark to open theIoT_capture.pcapngfile.
* Filter and Analyze:
* Apply appropriate filters to isolate relevant traffic. Look for command patterns typically sent to IoT devices.
* Identify the Command:
* Upon analyzing the captured traffic, the commandForest_Fire_Alert444is identified as the one sent over the network to IoT devices during the attack.
