## EMC Dell PowerProtect Data Domain Deploy 2023 Sample Questions (Q23-Q28):

### NEW QUESTION # 23

In a PowerProtect DD backup environment, what is used for writing to and reading from the backup targets in Veritas Backup Exec?

- A. Storage Node
- B. Media Agents
- C. Master Server
- D. Media Server

**Answer: D**

### NEW QUESTION # 24

Which expansion rack supports 8 TB disk drives in the PowerProtect DD appliance?

- A. FS25
- B. ES40
- C. ES30

**Answer: C**

Explanation:

The ES30 expansion shelf is designed to support larger disk drives, including 8 TB drives, enabling the PowerProtect DD appliance to scale up its storage capacity effectively. The ES40 and FS25 racks do not support 8 TB drives, making ES30 the correct choice for this requirement.

### NEW QUESTION # 25

Which factors must be considered when determining capacity needs?

- A. Data type, data size, change rate, and deduplication rate
- B. Change rate, data size, throughput, and number of backup servers
- C. Deduplication rate, data type, change rate, and throughput
- D. Data size, data type, number of backup servers, and change rate

**Answer: A**

Explanation:

Data Type: Different types of data may compress and deduplicate differently, affecting how much storage is needed.

Data Size: The total size of the data that needs to be backed up is a fundamental factor in determining capacity.

Change Rate: The frequency with which data changes impacts how much new data is generated and needs to be stored.

Deduplication Rate: Understanding how effective deduplication will be is essential for estimating how much physical storage will be needed after backups are processed.

### NEW QUESTION # 26

PowerProtect DD Test Simulator

You will need to use the PowerProtect DD Simulator to correctly answer question. The simulator allows you to navigate through the PowerProtect DD interface and configure many items. You will be scored on your ability to perform tasks, configure items, and gather information within the simulated environment.

Task

Use the simulator to configure DD Boost by enabling it and creating a new user (ddboost) with the recommended permission. Use Password123 as the password. A storage unit name SU1 must be created and accessible by the user.

When you have finished, continue to the next question.

The screenshot displays the Dell EMC DD System Manager interface. At the top, there's a blue header with the 'DELL EMC | DD System Manager' logo and navigation icons. Below the header, the 'Dashboard' section is visible. On the left, there's a vertical navigation menu with icons for home, alerts, file system, services, and hardware. The main dashboard area is divided into several panels. The 'Alerts' panel shows 2 Critical alerts and 0 Warning alerts. The 'File System' panel shows the status as 'Running' and a bar chart for 'Used' (674.00 MiB), 'Available' (1.13 TiB), and 'Total' (1.13 TiB) space. The 'Services' panel shows 'Replication' (Errors: 0, Warning: 0, Normal: 0), 'CIFS' (Disabled), 'NFS' (Disabled), and 'DDBoost' (Disabled). The 'Hardware' panel shows 'Storage' with 2 Operational Drives, 0 Spare Drives, and 0 Failed Drives. A large 'DELL EMC' logo is overlaid on the bottom left of the screenshot.

**Answer:**

Explanation:

See the solution in the explanation below.

Explanation:

To configure DD Boost on the PowerProtect DD system and create the required user and storage unit, follow these steps:

Enable DD Boost:

Go to the DD System Manager.

Navigate to DD Boost Settings.

Click on Enable to activate DD Boost on the system.

2. Create the User 'ddboost':

Go to Access Management > Local Users.

Click Create to add a new user.

Set the username to ddboost and the password to Password123.

Assign the user management role (the recommended permission for DD Boost users).

Click OK to create the user.

3. Create the Storage Unit 'SU1':

Go to Storage Units in the DD Boost section.

Click Create to add a new storage unit.

Name the storage unit SU1.

Assign the ddboost user to this storage unit for access.

Set any quota limits if required, or leave them as None if no restrictions are needed.

Click Create to finalize the storage unit creation.

After completing these steps, DD Boost will be enabled, and the ddboost user with appropriate permissions will have access to the newly created storage unit SU1.

### NEW QUESTION # 27

Where can the serial number on a PowerProtect DD appliance be found?

- A. PSNT tag at the rear of the system
- B. Right side of the chassis
- C. Label on the top of the chassis
- D. Label attached to the bezel

**Answer: A**

### NEW QUESTION # 28

.....
