

SC-401 New Study Materials | Exam SC-401 Questions

CLASS: 10 **Register Number** 11 13 11 11 11 11

FIRST REVISION EXAMINATION - JANUARY - 2025

ENGLISH [Max. Marks : 100]

Time Allowed : 3.00 Hours

PART - I SECTION - I

Note : Answer all the question
Choose the most appropriate answers from the four alternatives and write the option code and the corresponding answer.
Choose the appropriate Synonyms for the italicized words. 14x1=14

- His parents circled around raising a proud *cashe*.
a) Sharp noise b) blunt noise c) Shout d) high pitch
- I could hear a *rending* of wood and a splash of glasses on the floor of the hall.
a) Noise b) Tearing c) Jerk d) Space
- Indian Nay's all women crew was the first ever to circumnavigate the globe *skipped* by Lt. Cdr. Vartika Joshi.
a) really b) None c) Captain d) Other

Choose the correct antonyms for the italicized words:

- His nerves seemed *overwrought* for some reason.
a) house b) come c) asked d) calm
- His mother *swooped* upwards.
a) very quick b) very fast c) very nice d) very slow
- Nothing he said *gruffly*.
a) happily b) roughly c) sadly d) plainly

Choose the correct plural form of 'lady' from the following.

- lad b) ladies c) ladi d) lade

Form a derivative by adding the right prefix to the word 'legal'

- ful b) in c) il d) tax

Complete the following sentence choosing the most appropriate Modal Verb.
You ----- do as I say!
a) ought to b) should c) event d) promise

Complete the following sentence with the most appropriate phrasal verb given below:
The only time I ----- is when I need something from the top shelf
a) stretch out b) tire c) out d) put on

Choose the suitable option to pair it with the word 'wall' to form a compound word.

- sun b) paper c) hair d) cycle

Fill in the blank with the appropriate Prepositional phrase given below.
There is a temple right ----- my house.
a) in back of b) apart from c) in front of d) due to

Complete the following sentence using the most appropriate tense form of the verb given below.
He ----- your messages last night.
a) recei b) receive c) rece d) received

Choose the most appropriate linker from the given four alternatives.
----- there are many co education schools.
a) and b) likewise c) where d) and

PART - II SECTION - I

Answer any three of the following questions in a sentence or two. 3x2=6

- How was the young seagull's first attempt to fly.
- Who used the Zither and how?
- What challenging tasks did the team face during their Voyage?
- What was the daily routine of Sanyal?

SECTION - II

Read the following sets of poetic lines and answer any three of the following: 3x2=6

19. *My heart will keep the courage of the quest
And hope the road's last turn will be the best.*
a) What kind of quest does the poet seek here?
b) What is the poet's hope?

You can see the recruitment on the Internet, and the requirements for SC-401 certification are getting higher and higher. As the old saying goes, skills will never be burden. So for us, with one more certification, we will have one more bargaining chip in the future. However, it is difficult for many people to get a SC-401 Certification, but we are here to offer you help. We have helped tens of thousands of our customers achieve their certification with our excellent SC-401 exam braindumps.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 2	<ul style="list-style-type: none"> Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Topic 3	<ul style="list-style-type: none"> • Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 4	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.

SC-401 New Study Materials Is Valid to Pass Administering Information Security in Microsoft 365

The key trait of our product is that we keep pace with the changes the latest circumstance to revise and update our SC-401 study materials, and we are available for one-year free updating to our customers. Our company has established a long-term partnership with those who have purchased our SC-401 exam guides. We have made all efforts to update our product in order to help you deal with any change, making you confidently take part in the exam. We will inform you that the SC-401 Study Materials should be updated and send you the latest version of our SC-401 exam questions in a year after your payment.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q233-Q238):

NEW QUESTION # 233

You are creating a custom trainable classifier to identify organizational product codes referenced in Microsoft 365 content. You identify 300 files to use as seed content. Where should you store the seed content?

- A. a Microsoft OneDrive folder
- B. an Azure file share
- C. a Microsoft Exchange Online shared mailbox
- **D. a Microsoft SharePoint Online folder**

Answer: D

Explanation:

Seed content files for a custom trainable classifier should be stored in a SharePoint Online folder (or folders) that is dedicated to holding only that seed content. You'll need to create a separate folder for positive examples and another for negative examples. After placing the files, make note of the full URL of the SharePoint site, library, and folder for each set of content.

Note: How to create a trainable classifier: The following process automates the testing of trainable classifiers and shortens the creation workflow from 12 days to two days. In some cases, the process can take only a few hours.

1. Collect between 50 and 500 seed content items that strongly represent the data you want the classifier to positively identify as being in the category. For a list of supported file types, see Default crawled file name extensions and parsed file types in SharePoint Server.
2. Collect a second set of seed content (from 150 to 1,500 items) that represents data that don't belong in the category.
3. Place the positive and negative seed content in separate SharePoint folders. Each folder must be dedicated to holding only the seed content. Make note of the site, library, and folder URL for each set.
4. Sign in to the Microsoft Purview portal with either Compliance admin or Security admin role access and navigate to Data loss prevention > Data classification > Classifiers.

NEW QUESTION # 234

You have a Microsoft 365 E5 tenant.

You have sensitivity labels as shown in the Sensitivity Labels exhibit. (Click the Sensitivity Labels tab.)

The Confidential/External sensitivity label is configured to encrypt files and emails when applied to content.

The sensitivity labels are published as shown in the Published exhibit. (Click the Published tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Step 1 - Review what's configured

Labels: Public, General, Confidential, Internal, External.

Also shown in policy: Confidential/Internal and Confidential/External.

Policy setting: Users must provide justification to remove a label or lower its classification.

Confidential/External # encrypts content when applied.

Step 2 - Analyze each statement

Statement 1: The Internal sensitivity label inherits all the settings from the Confidential label.

Sub-labels (e.g., Confidential/Internal, Confidential/External) do not inherit settings from the parent.

They are independent labels grouped under a parent for organization, but each sub-label must have its own protection settings defined.

Statement 2: Users must provide justification if they change the label of content from Confidential/Internal to Confidential/External.

The policy requires justification only when removing a label or downgrading classification (lowering).

Changing between two sub-labels of the same parent (Confidential/Internal # Confidential/External) is considered a lateral move (not a downgrade).

Statement 3: Content that has the Confidential/External label applied will retain the encryption settings if the sensitivity label is removed from the label policy.

If a label is removed from a published policy, content already labeled retains its protection settings (such as encryption).

The label metadata stays applied to the file/email, even if unpublished.

Reference: What happens when you delete or edit a sensitivity label

NEW QUESTION # 235

Your company has offices in multiple countries.

The company has a Microsoft 365 E5 subscription that uses Microsoft Purview insider risk management.

You plan to perform the following actions:

*In a new country, open an office named Office1.

*Create a new user named User1.

*Deploy insider risk management to Office1.

*Add User1 to the Insider Risk Management Admins role group.

You need to ensure that User1 can perform insider risk management tasks for only the users and the devices in Office1.

What should you create first?

- A. a dynamic device group
- **B. an administrative unit**
- C. a management group
- D. a dynamic user group

Answer: B

NEW QUESTION # 236

You have a Microsoft 365 E5 subscription.

You are implementing insider risk management.

You need to maximize the amount of historical data that is collected when an event is triggered.

What is the maximum number of days that historical data can be collected?

- A. 0
- **B. 1**
- C. 2

- D. 3

Answer: B

NEW QUESTION # 237

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Cloud Apps.

You plan to deploy a Defender for Cloud Apps file policy that will be triggered when the following conditions are met:

A file is shared externally.

A file is labeled as internal only.

Which filter should you use for each condition? To answer, drag the appropriate filters to the correct conditions. Each filter may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

In Defender for Cloud Apps file policies, Access level is the filter used to detect how a file is exposed (e.g., Public on the internet, External, Internal, Private). Choosing Access level = External matches files that are shared with users outside your organization- exactly the "shared externally" condition.

Ref: Microsoft Defender for Cloud Apps - Create/Use file policies (File filters: Access level), Microsoft Learn.

See: Microsoft Defender for Cloud Apps > Policies > File policies documentation describing file filters including Access level and its values (Public, External, Internal, Private).

To target files that carry an MIP/AIP classification such as Internal Only, you use the Sensitivity label file filter. Defender for Cloud Apps ingests Microsoft Purview Information Protection labels and lets you build file policies that trigger when a specific label is applied.

Ref: Integrate Microsoft Information Protection with Microsoft Defender for Cloud Apps and File policies - Sensitivity label filter, Microsoft Learn.

These docs explain that MCAS can filter and govern files by Sensitivity label and apply governance based on labels such as Internal Only, Confidential, etc.

Why not the other options?

Collaborators filters by specific users/domains; it's useful to find files shared with a particular external user but not for the generic "shared externally" condition.

Matched policy is for files already flagged by another policy/DLP engine and does not detect "Internal Only" labeling by itself.

NEW QUESTION # 238

.....

We all know that pass the SC-401 exam will bring us many benefits, but it is not easy for every candidate to achieve it. The SC-401 guide torrent is a tool that aimed to help every candidate to pass the exam. Our SC-401 exam materials can installation and download set no limits for difficulty of the computers and persons. You can use our SC-401 Practice Questions directly. We guarantee you that the SC-401 study materials we provide to you are useful and can help you pass the test.
