

2026 The Best 100% Free OGEA-103–100% Free Reliable Braindumps Ebook | Exam OGEA-103 Success

What's more, part of that Easy4Engine OGEA-103 dumps now are free: <https://drive.google.com/open?id=1Hxyo50tBAIqEDiQOQfEHk8XiixSq8qr3>

The Open Group OGEA-103 exam is an popular examination of the IT industry, and it is also very important. We prepare the best study guide and the best online service specifically for IT professionals to provide a shortcut. Easy4Engine The Open Group OGEA-103 Exam covers all the content of the examination and answers you need to know. Tried Exams of Easy4Engine, you know this is something you do everything possible to want, and it is really perfect for the exam preparation.

The Easy4Engine wants you make your The Open Group OGEA-103 exam questions preparation journey simple, smart, and successful. To do this the Easy4Engine is offering real, valid, and updated The Open Group OGEA-103 exam practice questions in three different formats. These formats are Easy4Engine OGEA-103 PDF Questions files, desktop practice test software, and web-based practice test software. With any OGEA-103 exam questions format you will get everything that you need to prepare and pass the difficult The Open Group OGEA-103 certification exam with flying colors.

>> **Reliable OGEA-103 Braindumps Ebook** <<

Maximize Your Chances of Getting OGEA-103 Exam

These formats are The Open Group OGEA-103 PDF dumps, web-based practice test software, and desktop practice test software. All these three TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) exam questions contain the real, valid, and updated The Open Group Exams that will provide you with everything that you need to learn, prepare and pass the challenging but career advancement OGEA-103 Certification Exam with good scores.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q148-Q153):

NEW QUESTION # 148

Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?

- A. To identify and understand business requirements
- **B. To classify architecture and solution assets**
- C. To describe how an architecture addresses stakeholder concerns
- D. To coordinate with the other management frameworks in use

Answer: B

NEW QUESTION # 149

Complete the sentence. _____ can be used to explain how generic solutions can be leveraged and specialized to meet the needs of an organization.

- A. The Architecture Repository
- **B. The Enterprise Continuum**
- C. The Solutions Landscape
- D. The TOGAF ADM

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation from Expert in Enterprise Architecture, guiding in TOGAF and ArchiMate:

The Enterprise Continuum is a TOGAF concept that provides a logical classification mechanism for architecture and solution assets, ranging from:

Generic, industry-wide solutions

To organization-specific architectures and implementations

It explains:

How generic architectures and solutions are adapted, specialized, and reused The relationship between Foundation, Common Systems, Industry, and Organization-Specific assets Why Option D is correct:

The Enterprise Continuum explicitly describes how generic solutions are leveraged and specialized to meet enterprise-specific needs.

Why the other options are incorrect:

A . Architecture Repository: Stores assets but does not explain specialization.

B . Solutions Landscape: Describes deployed solutions, not classification or specialization.

C . TOGAF ADM: A development method, not a classification concept.

NEW QUESTION # 150

Complete the sentence The TOGAF standard covers the development of four architecture domains. Business.

Data, Technology and _____.

- A. Capability
- **B. Application**
- C. Transition
- D. Segment

Answer: B

Explanation:

Explanation

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology and Application. These domains represent different aspects of an enterprise's architecture and provide a consistent way of describing, analyzing, and designing them. Reference: The TOGAF Standard | The Open Group Website, Section 2.2 Architecture Development Method (ADM).

NEW QUESTION # 151

Which of the following statements about architecture partitioning is correct?

- A. Partitions are defined and assigned to agile Enterprise Architecture teams.
- B. Partitions reflect the organization's structure.
- **C. Partitions are used to simplify the management of the Enterprise Architecture.**
- D. Partitions are equivalent to architecture levels.

Answer: C

Explanation:

Based on the web search results, architecture partitioning is a technique that divides the Enterprise Architecture into smaller and manageable segments or groups, based on various classification criteria, such as subject matter, time, maturity, volatility, etc.¹²

Architecture partitioning is used to simplify the development and management of the Enterprise Architecture, by reducing complexity, improving governance, enhancing reusability, and increasing alignment and agility¹². Therefore, the statement that partitions are used

to simplify the management of the Enterprise Architecture is correct.

The other statements are incorrect because:

* Partitions are not equivalent to architecture levels. Architecture levels are different layers of abstraction that describe the Enterprise Architecture from different perspectives, such as strategic, segment, and capability³. Partitions are subsets of architectures that are defined within or across the levels, based on specific criteria¹.

* Partitions do not necessarily reflect the organization's structure. The organization's structure is one possible criterion for partitioning the architecture, but it is not the only one. Other criteria, such as business function, product, service, geography, etc., can also be used to partition the architecture¹².

* Partitions are not defined and assigned to agile Enterprise Architecture teams. Agile Enterprise Architecture is an approach that applies agile principles and practices to the architecture work, such as iterative development, frequent feedback, adaptive planning and continuous delivery⁴. Partitions are not a specific feature of agile Enterprise Architecture, but a general technique that can be applied to any architecture method or framework, including TOGAF¹².

NEW QUESTION # 152

Please read this scenario prior to answering the question

You are employed as an Enterprise Architect at a company. The company manages large-scale farming operations with food production, processing, and distribution. The goal of the company is to maximize profit while satisfying the needs of consumers for its products. Its customers demand food that is produced sustainably, safely, and transparently, while reducing environmental impact.

The business is highly mechanized, and this mechanization has brought about a decrease in the number of workers needed, together with a focus on agricultural engineering to improve the efficiency of its farms, its processing facilities, and the overall enterprise. As part of this, the company has established an Enterprise Architecture (EA) practice based on the TOGAF standard, using it as the method and guiding framework. The Chief Information Officer (CIO) is the sponsor of EA practice.

The practice has adopted an iterative approach for its architecture development. This has enabled the decision makers to have valuable insights into the different aspects of the business.

In recent years there have been a series of bad harvests, and a major reduction in yields of the main crop produced by the company. This combined with an increase in costs for energy, feed, fuel, and fertilizer, had led to a significant decrease in profits.

The rising costs and lower profits mean that the company is unable to take as much planned action on climate measures as it would like, such as reducing its carbon footprint. The Chief Executive Officer (CEO) has stated that big changes are needed to improve yields and profitability.

The outline strategy for change, includes new products, and new markets. The company will switch to a mix of crops rather than depend on a main crop and will allow use of its processing facilities by third parties. This is a major decision, and the CEO has stated a desire to repurpose and reuse rather than replace so as to manage the risks and limit the costs.

The CIO has assigned the EA team to manage this project. The CIO has stated that although the overall objective is known, the EA team are expected to define the scope, a shared vision, and the requirements.

Refer to the scenario

You have been asked to recommend the best approach for architecture development to realize the CEO's change in direction for the company.

Based on the TOGAF standard which of the following is the best answer?

- A. The team should start on architecture definition and operate multiple ADM phases concurrently to support this change in direction. Once understood, the team will identify the requirements, drivers, issues, and constraints for the change. You would include non-functional requirements in the architecture development to make sure that the target architecture meets its compliance and regulatory requirements.
- B. The team should start its iteration cycles of architecture development by going through the architecture definition phases (B-D) with a baseline first approach. This will support the change in direction as stated by the CEO. It will ensure that the change can be defined in a structured manner and address the requirements needed to realize the change.
- C. The team should start by defining the baseline Technology Architecture in order to assess the current infrastructure capacity and capability for the company. Then the focus should be on transition planning and incremental architecture deployment. This will identify requirements to ensure that the projects are sequenced in an optimal way to realize the change.
- **D. The team first needs to understand the problem and define the structure of the change. It should start iteration cycles on a baseline first approach to architecture development, and then transition planning. This will identify the change needed to transition from the baseline to the target and can be used to work out in detail what the agreed vision is for the change.**

Answer: D

Explanation:

The scenario clearly states that:

* The overall objective is known,

* BUT the EA team is expected to define the scope, shared vision, and requirements,

- * The company uses an iterative approach,
 - * The CEO wants repurpose and reuse rather than replace,
 - * This is a major strategic shift (new markets, new products, new crop mix).
- According to the TOGAF standard, when the problem must be understood, and scope, vision, and requirements are not yet defined, the correct starting point is Phase A: Architecture Vision, using an iteration cycle.

This is also consistent with the "baseline-first" approach recommended in the TOGAF Series Guides for situations where:

- * the business direction is known but high-level,
- * detailed impacts must be discovered,
- * and the organization wants to reuse existing capabilities rather than replace them.

Option B is the only answer that:

- * Begins by understanding the problem,
- * Defines the structure of the change,
- * Uses iteration cycles starting with a baseline-first approach,
- * Leads into transition planning,
- * Supports clarification of the shared vision and requirements,
- * Fits the CIO's instruction to "define the scope, shared vision, and requirements." This matches exactly what TOGAF prescribes in early-cycle Architecture Vision and initial iterations.

NEW QUESTION # 153

.....

There is no doubt that among our three different versions of OGEA-103 guide torrent, the most prevalent one is PDF version, and this is particularly suitable and welcomed by youngsters. There are some features of this version: first of all, PDF version of our OGEA-103 prep guide can be printed into paper, though which you are able to do some note-writing and highlight the important exam points. Besides our OGEA-103 Exam Torrent support free demo download, as we mentioned before, it is an ideal way for you to be fully aware of our OGEA-103 prep guide and then purchasing them if suitable and satisfactory.

Exam OGEA-103 Success: <https://www.easy4engine.com/OGEA-103-test-engine.html>

If you would like to try OGEA-103 learning braindumps from our website, it must be the most effective investment for your money, The Open Group Reliable OGEA-103 Braindumps Ebook We provide one-year service warranty, They are skilled at editing OGEA-103: TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam braindumps PDF, The Open Group Reliable OGEA-103 Braindumps Ebook Some of them even failed once, As one of the proficient expert companies in this area for over ten years we would like you to get acquainted with our OGEA-103 valid torrent thoroughly.

Easy Mode is actually based on the Ice Window Manager OGEA-103 IceWM) and is customized for the Eee PC, In a sense, users and device vendors are trying to overcome the traditional limits imposed by OGEA-103 Valid Test Sample geography by squeezing more and more capabilities into increasingly smaller mobile devices.

First-grade The Open Group OGEA-103 - Reliable TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Braindumps Ebook

If you would like to try OGEA-103 learning braindumps from our website, it must be the most effective investment for your money, We provide one-year service warranty.

They are skilled at editing OGEA-103: TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam braindumps PDF, Some of them even failed once, As one of the proficient expert companies in this area for over ten years we would like you to get acquainted with our OGEA-103 valid torrent thoroughly.
