Without no doubt that accuracy of information is of important for a NGFW-Engineer study material. It can be said exactly that the precision and accuracy of our CertkingdomPDF's NGFW-Engineer study materials are beyond question. All questions and answers have passed the test of time and are approved by experienced professionals who recommend them as the easiest route to certification testing. Every customer who has used our NGFW-Engineer Study Materials consider this to be a material that changes their life a lot, so they recommend it as the easiest way to pass the certification test. Our NGFW-Engineer study materials are constantly updated by our experts and improved according to the changing standards of the actual examination standards. We can guarantee that the information on our questions is absolutely true and valid.

If you are prepared to take the NGFW-Engineer exam with the help of excellent NGFW-Engineer learning materials on our website, the choice is made brilliant. Our NGFW-Engineer training materials are your excellent choices, especially helpful for those who want to pass the NGFW-Engineer Exam without bountiful time and eager to get through it successfully. Besides that, our NGFW-Engineer study questions have three versions: PDF version, Soft version and APP version, which can be interesting and helpful for you to choose.

Latest and Real NGFW-Engineer Exam Questions in Three User-Friendly Formats

There are more opportunities for possessing with a certification, and our NGFW-Engineer study tool is the greatest resource to get a

leg up on your competition, and stage yourself for promotion. When it comes to our time-tested NGFW-Engineer latest practice dumps, for one thing, we have a professional team contains a lot of experts who have devoted themselves to the research and development of our NGFW-Engineer Exam Guide, thus we feel confident enough under the intensely competitive market. For another thing, conforming to the real exam our NGFW-Engineer study tool has the ability to catch the core knowledge. So our customers can pass the exam with ease.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q35-Q40):

NEW QUESTION # 35

What must be configured before a firewall administrator can define policy rules based on users and groups?

- A. Authentication profile
- B. LDAP Server profile
- **C. Group mapping settings**
- D. User Mapping profile

Answer: C

Explanation:

Before a firewall administrator can define policy rules based on users and groups, the Group Mapping settings must be configured. These settings enable the firewall to map users to their respective Active Directory (AD) groups. This mapping allows the firewall to use user and group information to create policy rules based on group membership.

NEW QUESTION # 36

In regard to the Advanced Routing Engine (ARE), what must be enabled first when configuring a logical router on a PAN-OS firewall?

- A. Plugin
- **B. License**
- C. General setting
- D. Content update

Answer: B

Explanation:

To enable the Advanced Routing Engine (ARE) on a Palo Alto Networks firewall, the license for the ARE must be applied first. Without the proper license, the firewall cannot activate and use the advanced routing features provided by ARE, such as support for more complex routing protocols (e.g., BGP, OSPF, etc.).

Once the license is applied and validated, the routing engine can be configured, allowing the creation of logical routers and routing policies.

NEW QUESTION # 37

What are the phases of the Palo Alto Networks AI Runtime Security: Network Intercept solution?

- A. Scanning, Isolation, Whitelisting, Logging
- B. Policy Generation, Discovery, Enforcement, Logging
- C. Profiling, Policy Generation, Enforcement, Reporting
- **D. Discovery, Deployment, Detection, Prevention**

Answer: D

Explanation:

The phases of the Palo Alto Networks AI Runtime Security: Network Intercept solution are designed to help identify and protect against potential threats in real time by using AI to detect and prevent malicious activities within the network.

Discovery: Identifying applications, services, and behaviors within the network to understand baseline activity.

Deployment: Implementing the solution into the network and integrating with existing security measures.

Detection: Monitoring traffic and activities to identify abnormal or malicious behavior.

Prevention: Taking action to stop threats once detected, such as blocking malicious traffic or stopping exploit attempts.

NEW QUESTION # 38

Which set of options is available for detailed logs when building a custom report on a Palo Alto Networks NGFW?

- A. Traffic, User-ID, URL
- B. GlobalProtect, traffic, application statistics
- C. Traffic, threat, data filtering, User-ID
- D. Threat, GlobalProtect, application statistics, WildFire submissions

Answer: C

Explanation:

When building a custom report on a Palo Alto Networks NGFW, you can select detailed logs that provide specific insights into various aspects of firewall activity. The available options for detailed logs typically include:

Traffic logs: These provide information on the network traffic passing through the firewall.

Threat logs: These logs capture data related to identified security threats, such as malware or intrusion attempts.

Data filtering logs: These logs capture events related to data filtering policies, such as preventing the transfer of sensitive data.

User-ID logs: These logs associate user identities with the traffic and activities observed on the firewall, enabling user-based policy enforcement.

NEW QUESTION # 39

Which two zone types are valid when configuring a new security zone? (Choose two.)

- A. Intrazone
- B. Internal
- C. Tunnel
- D. Virtual Wire

Answer: C,D

Explanation:

When configuring a new security zone on a Palo Alto Networks firewall, the two valid zone types are:

Tunnel: A Tunnel zone is used for traffic that is associated with a VPN tunnel, such as IPSec tunnels. Traffic passing through a tunnel interface is classified into this zone.

Virtual Wire: A Virtual Wire zone is used when a firewall operates in transparent mode (also known as Layer 2 mode). In this configuration, the firewall can inspect traffic without modifying the IP address structure of the network.

NEW QUESTION # 40

.....

The CertkingdomPDF is currently in use by a lot of students and they have rated it as one of the best study materials for the preparation of Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) test. The customers are satisfied because the CertkingdomPDF comes with free demos and up to 1 year of free updates. We have a 24/7 support team which means the user can get help anytime if they face any problem. Our support team will always help the customers whenever they face issues.

Customers can start using the Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) instantly after purchasing it from us. Buy It Now and Take The First Step Towards Success!
