

SAP C-ADBTP-2601 Web-Based Practice Test Software Works without Installation

With the rapid development of the economy, the demands of society on us are getting higher and higher. If you can have C-ADBTP-2601 certification, then you will be more competitive in society. Our study materials will help you get the according certification you want to have. Believe me, after using our study materials, you will improve your work efficiency. You will get more opportunities than others, and your dreams may really come true in the near future. C-ADBTP-2601 Test Guide will make you more prominent in the labor market than others, and more opportunities will take the initiative to find you.

SAP C-ADBTP-2601 Exam Syllabus Topics:

Section	Weight	Objectives
SAP BTP Account and Subaccount Management	11-20	- Manage entitlements, quotas, and runtime environments - Implement directory and environment management - Create and configure global accounts and subaccounts
SAP Discovery Center and Service Marketplace	<10	- Find and provision services from the SAP BTP Service Marketplace - Navigate and utilize SAP Discovery Center for project guidance
SAP BTP Services	11-20	- Integrate services with other SAP and third-party systems - Monitor service health and usage - Provision and manage SAP BTP platform services
DevOps	11-20	- Configure and operate CI/CD pipelines for SAP BTP applications - Manage the application lifecycle using SAP BTP services - Implement monitoring and alerting for applications and services
Security	11-20	- Implement audit logging and security monitoring - Manage platform-level security settings and policies - Configure and maintain identity and access management (IAM) for SAP BTP
Connectivity	11-20	- Configure and troubleshoot Cloud Connector and Destination configurations - Set up and manage connectivity between SAP BTP and on-premise systems - Manage SAP BTP networking and tunneling services
SAP Business Application Studio / Visual Studio Code	<10	- Integrate Visual Studio Code with SAP BTP for local development - Configure and use development environments in SAP Business Application Studio

C-ADBTP-2601 Actual Braindumps - Free PDF Quiz 2026 First-grade SAP C-ADBTP-2601 Valid Exam Pass4sure

It is convenient for our consumers to check SAP C-ADBTP-2601 exam questions free of charge before purchasing the SAP C-ADBTP-2601 practice exam. SAP is an excellent platform where you get relevant, credible, and unique SAP C-ADBTP-2601 Exam Dumps designed according to the specified pattern, material, and format as suggested by the SAP C-ADBTP-2601 exam.

SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) Sample Questions (Q10-Q15):

NEW QUESTION # 10

SIMULATION

Create Directories and Subaccounts

In a global account for SAP Business Technology Platform (BTP), create a hierarchy of subaccounts using directories.

Task 1: Create Directories

In your SAP BTP cockpit, create the directory Americas (Description: Americas Accounts) with your global account as the parent.

Create the directory Eurasia (Description: Eurasia Accounts) with your global account as the parent.

Create the directory Partner (Description: Partner Accounts) with the Americas directory as the parent. Add the label access with value external.

Create the directory Human Resources (Description: Human Resources Accounts) with the Eurasia directory as the parent. Add the label access with value internal.

Answer:

Explanation:

See the Explanation below for complete solution

Explanation:

Task 1: Create Directories

You need to create these directories:

Americas

Eurasia

Partner under Americas with label access=external

Human Resources under Eurasia with label access=internal

Before You Start

Log in to the SAP BTP Cockpit.

Make sure you are inside the correct Global Account.

Open the left-side navigation menu.

Why this is important:

All directories in this task must be created inside the correct global account hierarchy. If you create them in the wrong location, the simulation result will be incorrect.

Step 1 - Create Directory Americas

What to do

In the SAP BTP Cockpit, select your Global Account.

In the left navigation menu, click Directories.

Click Create or Create Directory.

Fill the fields as follows:

Name: Americas

Description: Americas Accounts

Parent: your Global Account

Click Create.

Create Directory

Display Name * Americas

Description Americas Accounts

Parent * BTP Admin Certification xxxx

> Advanced

Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under Parent.

Create Cancel

Explanation:

This creates a top-level directory directly under the global account.

It will later be used as the parent for the Partner directory.

What to verify

After creation, you should see:

Americas

listed under the directories of the global account.

Step 2 - Create Directory Eurasia

What to do

Stay in Directories.

Click Create Directory again.

Fill the fields:

Name: Eurasia

Description: Eurasia Accounts

Parent: your Global Account

Click Create.

Create Directory

Create Directory

Display Name * Eurasia

Description Eurasia Accounts

Parent * BTP Admin Certification xxxx

> Advanced

Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under Parent.

Create Cancel

Explanation:

This creates another top-level directory, parallel to Americas.

What to verify

You should now see both:

Americas

Eurasia

under the global account.

Step 3 - Create Directory Partner under Americas

What to do

In the Directories area, select Americas.

Click Create Directory.

Enter:
Name: Partner
Description: Partner Accounts
Parent: Americas
Locate the Labels section.
Add a new label:
Key: access
Value: external
Click Create.

Name	Type	Environment	Provider	Region	Changed On	
▼ BTP Admin Certification xxxx	Global Account				March 25, 2026, 5:11:2...	⋮
Americas	Directory				March 26, 2026, 3:27:5...	⋮
Eurasia	Directory				March 26, 2026, 3:29...	⋮

Edit
Go to Overview
More Info
Create Directory
Create Subaccount
Delete

Select Parent

☐ Show only directories I can create in Expand All Collapse All

▼  BTP Admin Certification **xxxx**

Americas

Eurasia

Select Cancel

Create Directory

Display Name* Description

Parent*

▼ **Advanced**

☐ Enable entitlement management ⓘ ☐ Enable user management ⓘ

Add labels to this directory. ⓘ

Name: Values: ⓘ

Explanation:

This creates Partner as a child directory under Americas.

The label is required and must be entered exactly:

access = external

This label helps classify the directory.

What to verify

Under Americas, you should now see:

Partner

and the directory should contain the label:

access=external

Step 4 - Create Directory Human Resources under Eurasia

What to do

Go back to the Directories list.

Select Eurasia.

Click Create Directory.

Enter:

Name: Human Resources

Description: Human Resources Accounts

Parent: Eurasia

In the Labels section, add:

Key: access

Value: internal

Click Create.

Create Directory

Display Name* Description

Parent*

▼ **Advanced**

☐ Enable entitlement management ⓘ ☐ Enable user management ⓘ

Add labels to this directory. ⓘ

Name: Values:

Explanation:

This creates Human Resources as a child directory under Eurasia.

The required label is:

access = internal

What to verify

Under Eurasia, you should now see:

Human Resources

and the label should be:

access=internal

Final Expected Directory Structure

After completing Task 1, your structure must be exactly like this:

Global Account

Americas

Partner

Label: access=external

Eurasia

Human Resources

Label: access=internal

The screenshot shows the 'Directories and Subaccounts' section in the SAP BTP Admin Cockpit. It displays a tree view on the left and a table on the right. The tree view shows the hierarchy: Global Account (XXXX) -> Americas -> Partner -> Eurasia -> Human Resources. The table on the right lists the directories and their labels.

Name	Type	Endpoint	Provider	Region	Labels	Changed On
STP Admin Certification XXXX	Global Account					March 20, 2026, 6:54:2...
Americas	Directory					March 22, 2026, 4:25:1...
Partner	Directory				1 label	March 22, 2026, 4:29:2...
Eurasia	Directory					March 22, 2026, 4:36:0...
Human Resources	Directory				1 label	March 22, 2026, 4:31:0...

Important Checks Before Moving On

Verify all of the following:

Americas exists

Eurasia exists

Partner is under Americas

Human Resources is under Eurasia

Partner has label access=external

Human Resources has label access=internal

All names and descriptions are entered exactly as required

Common Mistakes to Avoid

1. Wrong parent

Partner must be created under Americas

Human Resources must be created under Eurasia

2. Wrong label key or value

Use exactly:

access → external

access → internal

3. Spelling errors

Be careful with:

Americas

Eurasia

Partner

Human Resources

4. Creating all directories directly under the global account

Only Americas and Eurasia are direct children of the global account.

Partner and Human Resources must be child directories.

NEW QUESTION # 11

SIMULATION

Create a Service Instance in Cloud Foundry

Enable a service instance of the HTLM5 Application Repository Service for Cloud Foundry.

Create a Service Instance in a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, create the service instance html5-eu-hcm-dev for the HTLM5 Application Repository Service with the service plan app-host in the Cloud Foundry space activity-recording

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed in EU HCM Dev, and the service instance must be created in the specific Cloud Foundry space activity-recording. SAP Help also confirms that the HTML5 Application Repository is used in the Cloud Foundry environment and that the app-host plan is the host service used to store HTML5 application content.

Step 1 - Open the Cloud Foundry space

In EU HCM Dev, go to:

Cloud Foundry

Spaces

Select the space:

activity-recording

SAP Help describes creating Cloud Foundry service instances by first navigating to the subaccount, opening Cloud Foundry Spaces, selecting the target space, and then using that space's Services > Service Instances are a.

Step 2 - Open Service Instances in the space

Inside the activity-recording space, go to:

Services

Service Instances

This is the Cloud Foundry-space-level location used for creating service instances in that space.

Step 3 - Start creating the new instance

Click Create.

A wizard opens for the new service instance. SAP Help describes this as the standard cockpit flow for creating service instances in Cloud Foundry spaces.

Step 4 - Choose the required service

In the service selection, choose:

HTML5 Application Repository Service

SAP Help documents the HTML5 Application Repository as the service used for centrally storing HTML5 applications' static content on SAP BTP in the Cloud Foundry environment.

New Instance or Subscription

1

Basic Info

2

Parameters

3

Review

Enter basic info for your instance or subscription.

Service: * ⓘ Can't find what you're looking for?

HTML5 Application Repository Service

Plan: *

app-host

Instance Name: * ⓘ

html5-eu-hcm-dev

Next > Create Cancel

Step 5 - Choose the required service plan

Select the service plan:

app-host

SAP Help states that the app-host service plan is used to deploy applications to the HTML5 Application Repository.

Step 6 - Enter the instance name

Set the service instance name to:

html5-eu-hcm-dev

Then continue and confirm creation.

SAP Help recommends using a CLI-friendly name for service instances, and the task gives the exact required name.

Space: activity-recording - Service Instances Create | ☆

All: 1

Note that space level does not currently support label management, instance sharing, or the display of "created by" and "modified by" information.

Search Service: All Plan: All Status: All

Instances (1)

Instance	Service	Plan	Credentials	Status	
html5-eu-hcm-dev	HTML5 Application Repository Service	app-host		Created	...

Step 7 - Verify the space is correct

Before final confirmation, verify the target Cloud Foundry space is:

activity-recording

This is important because Cloud Foundry service instances are created within a specific space, not only at the subaccount level.

Step 8 - Create and confirm

Click Create or Finish.

Wait for the status to change from in-progress to created.

SAP Help notes that after creation, the instance appears in the service instances table and its status can be checked there.

Final expected result

Inside EU HCM Dev, in Cloud Foundry space activity-recording, you should have a service instance with:

Service: HTML5 Application Repository Service

Plan: app-host

Instance Name: html5-eu-hcm-dev

Common mistakes to avoid

Creating the instance in the wrong subaccount; it must be EU HCM Dev.

Creating it in the wrong Cloud Foundry space; it must be activity-recording.

Choosing the wrong service; use HTML5 Application Repository Service.

Choosing the wrong plan; use app-host. SAP Help specifically links app-host with hosting deployed HTML5 app content.

Typing the wrong instance name; use exactly html5-eu-hcm-dev.

Name	Type	Environment	Provider	Region	Labels	Changed On

NEW QUESTION # 12

SIMULATION

Task 2: Create Subaccounts in a Directory

In the Partner directory, create the subaccount AM PA Dev Test (Description: Partner Development and Testing) with subdomain btpops#####-am-pa-dev-test in the region Microsoft Azure → US West (WA) cf-us20.

In the Partner directory, create the subaccount AM PA Prod (Description: Partner Production) with subdomain btpops#####-am-pa-prod using AM PA Dev Test as source subaccount. Set the subaccount as used in production.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Task 2 - Create Subaccounts in a Directory

You must create these two subaccounts inside the Partner directory:

AM PA Dev Test

AM PA Prod

Important:

Replace ##### with your global account number

Enter all names and subdomains exactly

Be careful with hyphens and spaces

AM PA Prod must be marked as used in production

Before You Start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both subaccounts in this task must be created inside the Partner directory. If you create them under the global account or another directory, the task will be wrong.

Step 1 - Open the Partner Directory

What to do

In the left menu, click Directories.

In the directory list, select Partner.

Explanation:

The Partner directory is the container where both required subaccounts must be created.

What to verify

You should now be inside the Partner directory page.

Step 2 - Start Creating the First Subaccount

What to do

Inside the Partner directory, go to Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

What to verify

You should now see the form for creating a new subaccount.

Step 3 - Enter Data for AM PA Dev Test

What to do

Enter the following values:

Display Name / Name: AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops####-am-pa-dev-test

Then choose the region:

Cloud Provider: Microsoft Azure

Region: US West (WA)

Environment / Technical Region: cf-us20

After checking all values, click Create.

Create Subaccount

Display Name*
AM PA Dev Test

Region*
US West (WA)

Subdomain*
btpops xxxx-am-pa-dev-test

Description
Partner Development and Testing

Parent*
Partner

> Advanced

Cockpit supports multi-level directories in your account structure.
You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under **Parent**.

Create Cancel

Explanation:

This creates the development and testing subaccount for the Partner directory.

The important points are:

the subaccount name must match exactly

the subdomain must include your account number in place of #####

the region must be Microsoft Azure → US West (WA) cf-us20

What to verify

After creation, you should see the new subaccount:

AM PA Dev Test

inside the Partner directory.

Step 4 - Confirm the First Subaccount Exists

What to do

Check the subaccounts list under Partner.

Explanation:

Before creating the production subaccount, confirm that AM PA Dev Test was created successfully, because it will be used as the source subaccount for the next step.

What to verify

You should see:

AM PA Dev Test

If it is not there, do not continue until it is created correctly.

A screenshot of the SAP BTP subaccount management interface. It shows a table with columns: Name, Type, Endowment, Provider, Region, and Changed On. The table lists several subaccounts, including 'BTP Admin Certification', 'Partner', and 'AM PA Dev Test'. The 'AM PA Dev Test' subaccount is highlighted in blue. A large 'SAP' logo is overlaid on the image.

Name	Type	Endowment	Provider	Region	Changed On
BTP Admin Certification	Global Account				March 25, 2026, 9:11:2...
Partner	Subaccount	Multi-Environment	Microsoft Azure	US West (WA)	March 26, 2026, 9:27:5...
AM PA Dev Test	Subaccount	Multi-Environment	Microsoft Azure	US West (WA)	March 26, 2026, 9:30:3...

Step 5 - Start Creating the Second Subaccount

What to do

Still inside the Partner directory, click Create → Subaccount again.

Explanation:

This opens a new subaccount creation form for the production subaccount.

Step 6 - Enter Data for AM PA Prod

What to do

Enter the following values:

Display Name / Name: AM PA Prod

Description: Partner Production

Subdomain: btpops####-am-pa-prod

Then set:

Source Subaccount: AM PA Dev Test

Enable the production setting:

Used in Production: Yes

Then click Create.

A screenshot of the SAP BTP subaccount creation form. The form has two main sections: 'Basic' and 'Advanced'. In the 'Basic' section, the 'Display Name' is 'AM PA Prod', the 'Description' is 'Partner Production', the 'Region' is 'US West (WA)', and the 'Subdomain' is 'btpops####-am-pa-prod'. The 'Parent' is set to 'Partner'. In the 'Advanced' section, the 'Used for production' checkbox is checked, and 'Enable beta features' is unchecked. There is also a section for 'Add labels to this subaccount' with a 'Name' field and a 'Values' field. A large 'SAP' logo is overlaid on the image.

Display Name *
AM PA Prod

Description
Partner Production

Region *
US West (WA)

Subdomain *
btpops####-am-pa-prod

Parent *
Partner

Advanced

☒ Used for production

☐ Enable beta features

Add labels to this subaccount.

Name: Enter label name Values:

Explanation:

This creates the production subaccount by using AM PA Dev Test as the source subaccount.

Using a source subaccount means SAP BTP copies base settings from the selected source, which helps keep configuration aligned.

The production indicator is mandatory here because this is the production subaccount.

What to verify

After creation, you should see:

AM PA Prod

inside the Partner directory, and it should be marked as a production subaccount.

Final Expected Result for Task 2

Inside the Partner directory, you must have these two subaccounts:

1. AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops####-am-pa-dev-test

Region: Microsoft Azure → US West (WA) cf-us20

2. AM PA Prod

Description: Partner Production

Subdomain: btpops####-am-pa-prod
Source Subaccount: AM PA Dev Test
Used in Production: Yes

Common Mistakes to Avoid

1. Creating the subaccounts in the wrong place

Both subaccounts must be created in:

Partner directory

Not in:

Global Account

Americas

Eurasia

Human Resources

2. Wrong subdomain format

Use exactly:

btpops####-am-pa-dev-test

btpops####-am-pa-prod

Replace only #### with your global account number.

Do not:

remove hyphens

add spaces

misspell dev-test or pa-prod

3. Wrong region for AM PA Dev Test

It must be:

Microsoft Azure

US West (WA)

cf-us20

4. Forgetting the source subaccount for AM PA Prod

You must select:

AM PA Dev Test

as the source subaccount.

5. Forgetting the production flag

For AM PA Prod, make sure:

Used in Production is enabled

NEW QUESTION # 13

SIMULATION

Establish Shared Services

Task 2: Entitle and Subscribe a Service in a Shared Subaccount

In your SAP BTP cockpit, in your SH Dev subaccount, entitle one standard (Application) service plan for the SAP Build Work Zone, advanced edition.

In the SH Dev subaccount, establish a trust to the agvlamkzw.accounts.ondemand.com identity provider.

In your SH Dev subaccount, create a service subscription for SAP Build Work Zone, advanced edition with the standard service plan.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Shared Services directory.

Open the SH Dev subaccount.

This matters because all three required actions must be done inside SH Dev, not in the directory and not in another subaccount.

Part 1 - Entitle the service in SH Dev

Step 1 - Open the subaccount
 In the cockpit, choose Directories.
 Open Shared Services.
 Select SH Dev.
 You should now be on the SH Dev subaccount page.

Step 2 - Open Entitlements
 In SH Dev, choose Entitlements.
 SAP documents that service plans and quotas for a subaccount are added in the subaccount's Entitlements are a.
 Step 3 - Add the required service plan
 Click Configure Entitlements or Add Service Plans.
 Search for SAP Build Work Zone, advanced edition.
 Select the service.
 Choose the plan standard (Application).
 Set the quantity to 1 if a quota/amount field is shown.
 Save the entitlement changes.

This task explicitly asks for one standard (Application) service plan. SAP Help also notes that SAP Build Work Zone usage depends on the correct entitlement being available in the subaccount first.

Verify

Under Entitlements, you should now see:
 SAP Build Work Zone, advanced edition
 plan: standard (Application)
 quantity: 1 if shown

Part 2 - Establish trust to the identity provider

Step 4 - Open Trust Configuration

In SH Dev, go to Security.

Choose Trust Configuration.

SAP Help states that trust to a custom identity provider is established from Security > Trust Configuration in the SAP BTP cockpit.

Step 5 - Create the trust

Click Establish Trust.

Enter or select the identity provider:

agvlamkzw.accounts.ondemand.com

Continue through the wizard.

Save the trust configuration.

SAP documents that to use a custom identity provider, the subaccount must have a trust relationship to that provider. SAP also highlights that apps such as SAP Build Work Zone rely on SAP Cloud Identity Services trust configuration.

Verify

On the Trust Configuration page, you should see:

agvlamkzw.accounts.ondemand.com

as a trusted identity provider.

Part 3 - Create the subscription

Step 6 - Open Instances and Subscriptions

In SH Dev, go to Services.

Choose Instances and Subscriptions.

Step 7 - Create the subscription

Click Create.

Choose Subscription if the cockpit asks for a type.

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard.

Confirm the creation.

SAP Help for SAP Build Work Zone scenarios indicates that the subaccount needs the correct entitlements and subscription flow to expose and use SAP Build Work Zone content.

Step 8 - Confirm subscription status

Stay on Instances and Subscriptions.

Check that the new subscription appears and is active.

Verify

You should see:

SAP Build Work Zone, advanced edition

plan: standard

subscription created successfully

New Instance or Subscription

1

Basic Info

Enter basic info for your instance or subscription.

 Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: * 

Can't find what you're looking for?

SAP Build Work Zone, advanced edition

Plan: *

standard

Create Cancel

Final expected result

Inside SH Dev:

the entitlement for SAP Build Work Zone, advanced edition exists

the entitled plan is standard (Application)

trust is established to agvlamkzw.accounts.ondemand.com

a subscription exists for SAP Build Work Zone, advanced edition

the subscription uses the standard plan

Common mistakes to avoid

Doing the entitlement in Shared Services directory instead of SH Dev

Choosing SAP Build Work Zone, standard edition instead of advanced edition Choosing the wrong plan; the entitlement must be standard (Application) Forgetting the trust step to agvlamkzw.accounts.ondemand.com Trying to subscribe before the entitlement exists
