Reliable Salesforce-Slack-Administrator Exam Papers & Salesforce-Slack-Administrator Valid Braindumps Sheet

The site of PassLeader is well-known on a global scale. Because the training materials it provides to the IT industry have no-limited applicability. This is the achievement made by IT experts in PassLeader after a long period of time. They used their knowledge and experience as well as the ever-changing IT industry to produce the material. The effect of PassLeader's Salesforce Salesforce-Slack-Administrator Exam Training materials is reflected particularly good by the use of the many candidates. If you participate in the IT exam, you should not hesitate to choose PassLeader's Salesforce Salesforce-Slack-Administrator exam training materials. After you use, you will know that it is really good.

Salesforce Certified Slack Administrator Sample Questions (Q90-Q95):

NEW QUESTION # 90

You're an Org Admin working on your Slack Enterprise Grid design. You expect a high volume of new workspace requests, and all requests will require admin review.

What should you do to manage this process?

(Select the best answer.)

- A. Allow all users to request new workspaces, and route the requests into an admin channel where admins can action the requests as a team.
- B. Turn off the workspace request process, and create a private channel. Only add members who you want to request new workspaces.

- C. Turn off the workspace request process, and require users to direct message (DM) their workspace admin.
- D. Allow all users to request new workspaces, and manually route requests to the correct admin via direct message (DM).

Answer: A

Explanation:

The best practice outlined in Slack Enterprise Grid documentation:

"Enable workspace creation requests, so users can request new workspaces that will be routed to Org Admins via an internal channel for review and approval." This approach scales better for high-volume requests, allowing multiple admins to track and approve them efficiently from a centralized channel, rather than relying on manual direct messages.

(Reference: Slack Administration Study Guide - Enterprise Grid Workspace Management)

-

NEW QUESTION # 91

In Large Inc's Enterprise Grid design, each business unit has its own workspace, and everyone is also a member of the Global workspace. The Sales team at Large Inc are slow adopters of Slack and have been using email instead of Slack to communicate with peers.

Which of these strategies should the Sales team AVOID using to connect cross-functionally more effectively with Slack?

- A. Move their channels into the Global workspace and convert the default channels to private, to ease the Sales team's fears about privacy.
- **B. Create a #customer-feedback channel for Sales to convey customer concerns to the Product and Engineering teams.**
- C. Create an org-wide #sales-wins channel so that account representatives can share updates on new customers and celebrate big deals.
- D. Create an org-wide #help-sales channel where cross-functional partners can turn to Sales with Questions and requests for help.

Answer: B

NEW QUESTION # 92

You're a Workspace Owner, responsible for setting up your company's Slack Business+ workspace for the first time. You know that your team will need to approve various types of requests that users make within Slack, such as inviting other users, approving apps and creating Slack Connect channels. You want to make sure that admins will have visibility into the status of requests, including which have been approved.

What is the best way to set up an approval process within Slack that will require the least effort?

- **A. Set up a #admins-approval channel, and change the settings for each request type to route approvals to the channel where Workspace Admins can approve.**
- B. Use Workflow Builder to create multiple workflows that allow users to request the necessary approvals from a #help-slack channel.
- C. Do nothing, as Slack's default settings automatically route approval requests to Workspace Admins through a Slackbot direct message (DM).
- D. Post and pin a message with a request template in the #general channel that asks users to submit their requests in the #general channel.

Answer: A

NEW QUESTION # 93

You're a Workspace Owner, responsible for setting up your company's Slack Business+ workspace for the first time.

You want admins to have visibility into request approvals (for invites, apps, Slack Connect, etc.).

What is the best way to set up an approval process within Slack that will require the least effort?

- A. Set up a #admins-approval channel, and change the settings for each request type to route approvals to the channel where Workspace Admins can approve.
- B. Use Workflow Builder to create multiple workflows that allow users to request the necessary approvals from a #help-slack channel.
- **C. Do nothing, as Slack's default settings automatically route approval requests to Workspace Admins through a Slackbot**

direct message (DM).

- D. Post and pin a message with a request template in the #general channel that asks users to submit their requests in the #general channel.

Answer: C

Explanation:

By default, Slack automatically routes requests (for apps, Slack Connect, invitations) to Workspace Admins via Slackbot:

"Approval requests are automatically sent to Workspace Admins and Owners via direct message from Slackbot for easy tracking and approval." No additional setup (A, C, D) is necessary unless a custom process is required.

(Reference: Slack Administration Study Guide - Managing Approval Requests)

-

NEW QUESTION # 94

You're a Workspace Primary Owner for a Slack Pro workspace.

App requests from users are overwhelming.

You decide to create an app approval process.

Which two questions should you ask requestors during the app approval process?

(Choose 2 answers.)

- A. Does the app support Data Loss Prevention (DLP)?
- B. Does the app support Enterprise Key Management (EKM)?
- C. Are competitors using the requested app?
- D. What is the urgency level for the app request?
- E. Does the app require a license?

Answer: D,E

Explanation:

Slack's best practices for app approval workflows recommend:

"Gather information on licensing requirements and urgency to prioritize app approvals and ensure security reviews align with business needs." Asking about DLP (A) and EKM (C) are technical security details assessed by IT or Security, not by the requestor.

Competitor usage (B) is irrelevant to Slack security or approval decisions.

(Reference: Slack Administration Study Guide - Managing App Approvals)

NEW QUESTION # 95

.....

There are a lot of the advantages for you to buy our Salesforce-Slack-Administrator exam questions safely. First, our Salesforce-Slack-Administrator study braindumps are free from computer virus.
