On the one hand, by the free trial services you can get close contact with our products, learn about the detailed information of our H13-821_V3.0-ENU Study Materials, and know how to choose the right version of our H13-821_V3.0-ENU exam questions.

Huawei HCIP-Cloud Service Solutions Architect V3.0 Sample Questions (Q93-Q98):

NEW QUESTION # 93
When planning and designing business security, ELB can be set to provide services to the public network to ensure business scalability while avoiding the direct opening of business nodes to the public network.

- A. True
- B. False

Answer: A

NEW QUESTION # 94
YAML language is a highly readable language used to express data serialization. It is especially suitable for expressing or editing data structures, various configuration files, etc. It is also widely used in Docker and Kubernetes.
Which of the following descriptions about YAML are correct? (Multiple choice)

- A. You can create stateful workloads in the kubernetes cluster through YAML
- B. You can create a stateless workload in a kubernetes cluster through YAML
- C. YAML can be used to create automated protocol files without the need to manage or care about them
- D. The data types supported by YAML include objects, arrays, and scalars

Answer: A,B,C,D

NEW QUESTION # 95
Kubernetes uses readiness probes to determine whether a container is ready to accept traffic. Which of the following descriptions about readiness probes is wrong?

- A. The readiness probe periodically detects the Pod and judges whether the Pod is ready based on the response
- B. The function of the readiness probe is similar to that of the survival probe. Generally, configuring one in the cluster can meet the requirements. Only in medium/large-scale environments, they will be used together.
- C. Only after detecting that the Pod is ready will the Service be allowed to transfer the request to the Pod
- D. The readiness probe supports three detection mechanisms, namely Exec, HTTP GET and TCP Socket

Answer: B

NEW QUESTION # 96
As more and more enterprises go to the cloud, security on the cloud has become an important topic that needs attention.
There are several major security requirements for enterprises to go to the cloud. Which of the following descriptions of security requirements on the cloud is wrong?

- A. Enterprise cloud security pursues high efficiency in operation and maintenance, operation can be audited, and applicable products include CBH
- B. To protect the data stored on the cloud, it needs to be kept confidential, mainly restricting the inaccessibility of cloud service providers and external users
- C. The enterprise architecture on the cloud still needs to meet compliance requirements. HUAWEI CLOUD provides customers with one-stop public cloud protection services
- D. The business on the cloud pursues business continuity without interruption, and the web application firewall VAF and anti-DDOS high-defense services are all for this purpose

Answer: B

NEW QUESTION # 97
