

# 300-425 Valid Exam Experience | 300-425 Test Cram Pdf

BONUS!!! Download part of VCE4Plus 300-425 dumps for free: <https://drive.google.com/open?id=1u5HCmBuHoBS9I5fQN1vhR43R2eSMXRQ4>

But our company can provide the anecdote for you--our 300-425 study materials. Under the guidance of our 300-425 exam practice, you can definitely pass the exam as well as getting the related certification with the minimum time and efforts. We would like to extend our sincere appreciation for you to browse our website, and we will never let you down. The advantages of our 300-425 Guide materials are more than you can imagine. Just rush to buy our 300-425 practice braindumps!

Cisco 300-425 Certification Exam is a valuable certification for IT professionals who want to demonstrate their knowledge and skills in designing and implementing enterprise wireless networks. 300-425 exam covers a range of topics and is recognized by all major IT companies. By taking a training course and preparing thoroughly, candidates can increase their chances of passing the exam and advancing their careers in the IT industry.

## 2026 Fantastic 300-425: Designing Cisco Enterprise Wireless Networks Valid Exam Experience

These Cisco 300-425 exam questions have a high chance of coming in the actual Designing Cisco Enterprise Wireless Networks 300-425 test. You have to memorize these Cisco 300-425 questions and you will pass the Cisco 300-425 test with brilliant results. The price of Cisco 300-425 updated exam dumps is affordable. You can try the free demo version of any Designing Cisco Enterprise Wireless Networks 300-425 exam dumps format before buying.

Cisco 300-425 Exam covers a variety of topics related to wireless network design and implementation, including site surveys, network topology, security, and troubleshooting. Successful candidates must demonstrate a deep understanding of wireless network technologies, such as 802.11 standards, RF technology, and antenna types. They must also have a strong grasp of network design principles, such as scalability, high availability, and redundancy.

## Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q55-Q60):

### NEW QUESTION # 55

A technician connects a Cisco Aironet 3700 Series access point to a switch and realizes that the AP is coming up with 3x3 MIMO. Which reason explains this behavior?

- A. A redundant power supply is unavailable on the switch.
- B. The switch is 802.3af capable.
- C. The switch is PoE+ capable.
- D. The AP is getting power from a power injector.

**Answer: C**

Explanation:

The AP 3700 with integrated 802.11ac wave-1 radio is designed to run from Power over Ethernet (PoE) sources, local power, or via mid-span or power injector. If the AP 3700 is powered by PoE and the source is 802.3af (15.4 Watts) the AP will come up and fully function in a 3x3:3 mode, for enhanced performance additional power sources such as 802.3at, enhanced PoE, Cisco PoE Injector-4, or local power may be used. With additional power (greater than 15.4W) supplied, the 3700 will shift into the 4x4:3 mode.

**The big difference between 802.3af (PoE) and 802.3at (PoE+) is the amount of power delivered over each standard.**

### NEW QUESTION # 56

A customer deploys a new Cisco high-density wireless network within the open areas of a mall to provide free public wireless on 5 GHz. The existing mall tenants have their own wireless networks that are independently managed. Which design approach minimizes channel utilization for the public network?

- A. Enable UNII-1 channels only and use 20-MHz channels.
- B. Enable all 5-GHz channels that are supported by the region and use 20-MHz channels.
- C. Enable UNII-1 channels only and use 80-MHz channels.
- D. Enable all 5-GHz channels that are supported by the region and use 40-MHz channels.

**Answer: B**

### NEW QUESTION # 57

An engineer is designing an outdoor mesh network to cover several sports fields.

The core of the network is located In a building at the entrance of a sports complex.

Which type of antenna should be used with the RAP for backhaul connectivity?

- A. 2.4 GHz, 8-dBi patch antenna
- B. 5 GHz, 8-dBi omnidirectional antenna
- C. 2.4 GHz, 14-dBi omnidirectional antenna
- D. 5 GHz, 14-dBi patch antenna

**Answer: D**

Explanation:

omnidirectional antennas is used to cliente connectivity (2.4Ghz), to backhaul we use directional antennas with good gain and ins 5Ghz.

### NEW QUESTION # 58

A customer has a single anchor WLC named Anchor A.

Anchor A is in a DMZ and provides guest access. The customer wants to deploy an additional anchor controller named Anchor B

to provide redundancy if Anchor A fails. Which design approach should be taken for the guest WLAN priority on the foreign WLC for each anchor WLC?

- A. Set Anchor A to priority 3 and Anchor B to priority 1.
- B. Set Anchor A to priority 3 and Anchor B to priority 3.
- C. Set Anchor A to priority 1 and Anchor B to priority 3.
- D. Set Anchor A to priority 1 and Anchor B to priority 1.

**Answer: A**

## NEW QUESTION # 59

An engineer needs a budgetary number for the quantity of 9115AXI APs in a new conference center. The engineer plans to use only the 5 GHz band and use 20 MHz channel width. Based on this requirement and Cisco best practices, what is the amount of square feet covered per AP in a high-density conference room layout?

- A. 2,500 square feet
- B. 5,000 square feet
- C. 1,000 square feet
- D. 3,500 square feet

**Answer: C**

### Explanation:

Typical office is 2500 square feet, high density is 1000.
