

PCEP-30-02 Reliable Exam Vce & Official PCEP-30-02 Study Guide

The screenshot displays a web interface for PCEP Practice Tests. At the top, it says "PCEP Practice Tests | PCEP-30-02 exam questions" and "Free questions by MyExamCloud". Below this, there is a copyright notice: "© EPractice Labs Software. All rights reserved." The main content area is divided into two sections, "Question #1" and "Question #2".

Question #1:
Free PCEP (PCEP-30-02) Practice Mock Exam
Topic: Section 3: Data Collections - Tuples, Dictionaries, Lists and Strings
What is the output of the following code?

```
str = "***"  
print(len(str))
```

Select any one of given answer:

<input type="radio"/> Choice A	5
<input type="radio"/> Choice B	Error
<input type="radio"/> Choice C	3
<input type="radio"/> Choice D	1

Question #2:
Free PCEP (PCEP-30-02) Practice Mock Exam
Topic: Section 1: Common Programming and Python Fundamentals
What is the result of the following code?

Quiz 2026 PCEP-30-02: PCEP - Certified Entry-Level Python Programmer – High Pass-Rate Reliable Exam Vce

If you fail PCEP-30-02 exam with our PCEP-30-02 exam dumps, we will full refund the cost that you purchased our PCEP-30-02 exam dumps. However, our promise of "No help, full refund" doesn't shows our no confidence to our products; oppositely, it

expresses our most sincere and responsible attitude to reassure our customers. With our professional PCEP-30-02 Exam software, you will be at ease about your PCEP-30-02 exam, and you will be satisfied with our after-sale service after you have purchased our PCEP-30-02 exam software.

Python Institute PCEP - Certified Entry-Level Python Programmer Sample Questions (Q15-Q20):

NEW QUESTION # 15

What is the expected output of the following code?

□

- A. * *
- B. * * *
- C. *
- D. The code produces no output.

Answer: A

Explanation:

The code snippet that you have sent is a conditional statement that checks if a variable "counter" is less than 0, greater than or equal to 42, or neither. The code is as follows:

if counter < 0: print("") elif counter >= 42: print("") else: print("") The code starts with checking if the value of "counter" is less than 0. If yes, it prints a single asterisk () to the screen and exits the statement. If no, it checks if the value of "counter" is greater than or equal to 42. If yes, it prints three asterisks () to the screen and exits the statement. If no, it prints two asterisks () to the screen and exits the statement.

The expected output of the code depends on the value of "counter". If the value of "counter" is 10, as shown in the image, the code will print two asterisks (**) to the screen, because 10 is neither less than 0 nor greater than or equal to 42. Therefore, the correct answer is C. * * Reference: [Python Institute - Entry-Level Python Programmer Certification]

NEW QUESTION # 16

Assuming that the phone_dir dictionary contains namenumbers pairs, arrange the code boxes to create a valid line of code which retrieves Martin Eden's phone number, and assigns it to the number variable.

□

Answer:

Explanation:

□

Explanation:

□
number = phone_dir["Martin Eden"]

This code uses the square brackets notation to access the value associated with the key "Martin Eden" in the phone_dir dictionary.

The value is then assigned to the variable number. A dictionary is a data structure that stores key-value pairs, where each key is unique and can be used to retrieve its corresponding value. You can find more information about dictionaries in Python in the following references:

- * [Python Dictionaries - W3Schools]
- * [Python Dictionary (With Examples) - Programiz]
- * [5.5. Dictionaries - How to Think Like a Computer Scientist ...]

NEW QUESTION # 17

What is the expected output of the following code?

□

- A. ppt
- B. The code is erroneous and cannot be run.
- C. 0
- D. pizzapastafolpetti

Answer: A

Explanation:

The code snippet that you have sent is using the slicing operation to get parts of a string and concatenate them together. The code is as follows:

```
pizza = "pizza" pasta = "pasta" folpetti = "folpetti" print(pizza[0] + pasta[0] + folpetti[0])
```

The code starts with assigning the strings "pizza", "pasta", and "folpetti" to the variables pizza, pasta, and folpetti respectively. Then, it uses the print function to display the result of concatenating the first characters of each string. The first character of a string can be accessed by using the index 0 inside square brackets. For example, pizza[0] returns "p". The concatenation operation is used to join two or more strings together by using the + operator. For example, "a" + "b" returns "ab". The code prints the result of pizza[0] + pasta[0] + folpetti[0], which is "p" + "p" + "f", which is "pft".

The expected output of the code is pft, because the code prints the first characters of each string. Therefore, the correct answer is B. pft.

NEW QUESTION # 18

Python Is an example of which programming language category?

- A. interpreted
- B. compiled
- C. machine
- D. assembly

Answer: A

Explanation:

Explanation

Python is an interpreted programming language, which means that the source code is translated into executable code by an interpreter at runtime, rather than by a compiler beforehand. Interpreted languages are more flexible and portable than compiled languages, but they are also slower and less efficient. Assembly and machine languages are low-level languages that are directly executed by the hardware, while compiled languages are high-level languages that are translated into machine code by a compiler before execution.

NEW QUESTION # 19

Insert the code boxes in the correct positions in order to build a line of code which asks the user for an Integer value and assigns it to the counter variable.

(Note: some code boxes will not be used.)

Answer:

Explanation:

□

NEW QUESTION # 20

.....

Actual4Cert has hired professionals to supervise the quality of the PCEP-30-02 PDF prep material. Laptops, tablets, and smartphones support the Python Institute PCEP-30-02 test questions PDF file. If any taker of the Python Institute PCEP-30-02 test prepares thoroughly with our exam product he will crack the exam of the credential on the first attempt.
