CSI Canadian Securities Course Exam2 Sample Questions (Q18-Q23):

NEW QUESTION # 18

What is the main advantage ETFs have over mutual funds?

- A. Improved tax efficiency
- B. Flexible dividend reinvestment
- C. Active management
- D. Ability to set up pre-authorized contributions

Answer: A

NEW QUESTION # 19

What is the measure of risk commonly applied to portfolio and to individual securities within that portfolio?

- A. Alpha
- B. Beta
- C. Standard Deviation.
- D. Correlation.

Answer: C

Explanation:

Standard deviation measures the dispersion or variability of returns around the mean of a portfolio or security's historical performance. It is a widely used statistical metric in finance to assess risk, as it captures the degree to which returns can deviate from their expected value. A high standard deviation indicates higher risk, reflecting greater volatility in returns, while a low standard deviation suggests more stable performance.

Beta measures market risk relative to a benchmark, correlation measures the relationship between securities, and alpha represents excess return above a benchmark. However, standard deviation is the most common measure of total risk applicable to portfolios and individual securities.

* CSC Volume 2, Chapter 15: Introduction to the Portfolio Approach - Measuring Risk.

* CSC Volume 2, Chapter 16: The Portfolio Management Process - Risk Metrics.

NEW QUESTION # 20

What is the bottom price of a security's trading range at which most investors would sense value and be willing to buy it?

- A. Moving average.
- B. Sentiment indicator.
- C. Support level.
- D. Reversal pattern.

Answer: C

NEW QUESTION # 21

What type of investment typically involves massive amounts of capital provided by a small number of investors?

- A. Derivatives
- B. Bonds
- C. Infrastructure
- D. Commodities

Answer: C

Explanation:

Infrastructure investments often require massive capital commitments for projects such as airports, highways, and utilities. These investments are typically made by institutional investors or private equity funds, involving relatively few but large-scale investors due to the high entry cost and the long-term nature of these investments.

References:

* CSC Volume 2, Chapter 20: "Alternative Investments: Benefits, Risks, and Structure," explains the characteristics of infrastructure as an asset class and its association with significant capital requirements.

NEW QUESTION # 22

What is name of the procedure used to calculate the income deemed to have been earned by segregated fund contract holders?

- A. Redemption.
- B. Payout.
- C. Allocation.
- D. Distribution.

Answer: C

NEW QUESTION # 23

.....
