Exam 1z0-1080-25 Actual Tests & Exam 1z0-1080-25 Braindumps

If you want to find the best 1z0-1080-25 study materials, the first thing you need to do is to find a bank of questions that suits you. Our 1z0-1080-25 learning material is prepared by experts in strict accordance with the exam outline of the 1z0-1080-25 certification exam, whose main purpose is to help students to pass the exam with the least amount of time and effort. We can claim that if you study with our 1z0-1080-25 Practice Engine for 20 to 30 hours, then you will be sure to pass the exam.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 2	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 3	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 4	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 5	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 6	• Design business rules and rulesets":his section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 7	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 8	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 9	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.

Topic 10	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 11	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 12	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 13	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 14	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 15	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 16	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 17	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.

Exam 1z0-1080-25 Braindumps & Learning 1z0-1080-25 Mode

The TestValid is committed to making the entire Oracle 1z0-1080-25 exam preparation process instant and successful. To achieve these objectives the TestValid is offering real, valid, and updated Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam practice test questions in three high in demand formats. These formats are Oracle 1z0-1080-25 PDF dumps files, desktop practice test software, and web-based practice test software.

Oracle Planning 2025 Implementation Professional Sample Questions (Q64-Q69):

NEW QUESTION # 64
Which three statements are true about importing metadata from a flat file into Planning?

- A. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server.
- B. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record.
- C. You can rename or delete members of attribute dimensions during a metadata import.
- D. You can use the import file functionality to import more metadata or to perform incremental updates from the source system.
- E. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified.

Answer: B,D,E

Explanation:
In Oracle Planning 2024, importing metadata from a flat file into Planning involves specific rules and capabilities. The three true statements are:
* A. You can rename or delete members of attribute dimensions during a metadata import: Incorrect.

Metadata imports update dimension members (e.g., adding, updating properties), but renaming or deleting attribute dimension members is not directly supported via flat file import-it requires manual action or a separate process.

* B. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server: Incorrect. Flat file imports are for metadata (e.g., dimensions, members), not artifacts like forms, dashboards, or infolets, which are managed via Migration or Application tools.

* C. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record: Correct. The import file format requires a header defining properties (e.g., Name, Parent) and subsequent records with delimited values (e.g., CSV) matching that order, a standard requirement for metadata imports.

* D. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified: Correct. When the "Clear Members" option is selected, unspecified members are removed, but ancestors of specified members and base members of shared members are retained to maintain hierarchy integrity.

* E. You can use the import file functionality to import more metadata or to perform incremental updates from the source system: Correct. Metadata imports support both full loads and incremental updates, allowing administrators to add or modify members as needed from a source system.

The Oracle documentation verifies that C, D, and E accurately describe the metadata import process, making them the correct answers.

NEW QUESTION # 65
Which three are use cases for data maps?

- A. To push data from a planning cube to a reporting cube
- B. To integrate data between Planning modules
- C. To integrate data between custom plan types and Planning modules
- D. To allow users to drill back to the data in a different cube
- E. To create a replicated partition between cubes

Answer: A,B

NEW QUESTION # 66
Which set of steps do you perform to enable each Planning module?

- A. Configure the module and refresh the database.
- B. Enable the module, configure the module, and run post-configuration tasks.
- C. Run pre-configuration tasks, enable the module, and configure the module.
- D. Enable the module and refresh the database.

Answer: B

NEW QUESTION # 67
You want to create a dashboard to provide an overview at the beginning of the planning and forecasting process. You create a dashboard with Dashboard 1.0. Which three statements are true about Dashboard 1.0?

- A. You can include multiple forms that dynamically update, including their associated charts.
- B. You can use a logarithmic scale in relevant chart types.
- C. You can include user variables in the global PV bar and the local POV.
- D. You can switch easily between using the design environment and the runtime environment.
- E. You can add hierarchical labels in charts.

Answer: A,C,D

NEW QUESTION # 68

Which statement is true about configuring Projects with Capital?

- A. Workforce must also be configured.
- B. All modules must be enabled.
- C. Strategic Modeling must be enabled.
- D. If capital projects are enabled, Capital must also be configured.

Answer: D

NEW QUESTION # 69

......

As a high-standard company in the international market, every employee of our 1z0-1080-25 simulating exam regards protecting the interests of clients as the creed of the job. We know that if we want to make the company operate in the long term, respecting customers is what we must do. Many of our users of the 1z0-1080-25 Exam Materials are recommended by our previous customers and we will cherish this trust. Our1z0-1080-25 practice guide is not only a product you purchase but also a friend who goes with you.
