GitHub-Advanced-Security Latest Exam Forum & GitHub-Advanced-Security Pass Test

We will try our best to solve your problems for you. I believe that you will be more inclined to choose a good service product, such as GitHub-Advanced-Security learning question. After all, everyone wants to be treated warmly and kindly, and hope to learn in a more pleasant mood. The authoritative, efficient, and thoughtful service of GitHub-Advanced-Security learning question will give you the best user experience, and you can also get what you want with our GitHub-Advanced-Security study materials. I hope our study materials can accompany you to pursue your dreams. If you can choose GitHub-Advanced-Security test guide, we will be very happy. We look forward to meeting you.

Our GitHub-Advanced-Security practice questions are on the cutting edge of this line with all the newest contents for your reference. Free demos are understandable and part of the GitHub-Advanced-Security exam materials as well as the newest information for your practice. And because that our GitHub-Advanced-Security Study Guide has three versions: the PDF, Software and APP online. So accordingly, we offer three versions of free demos for you to download.

GitHub GitHub-Advanced-Security Pass Test - Exam GitHub-Advanced-Security Pattern

Moreover, it is portable enabling you to prepare for the GitHub GitHub-Advanced-Security exam from everywhere and at any time. You will find another convenience to make notes on GitHub GitHub-Advanced-Security files combined with the facility to print them out. The GitHub-Advanced-Security Dumps PDF format can turn your preparation systematic and hassle-free. It will function smoothly on all smart devices.

GitHub Advanced Security GHAS Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12
What is required to trigger code scanning on a specified branch?

- A. Developers must actively maintain the repository.
- B. The repository must be private.
- C. Secret scanning must be enabled on the repository.
- D. The workflow file must exist in that branch.

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
For code scanning to be triggered on a specific branch, the branch must contain the appropriate workflow file, typically located in the .github/workflows directory. This YAML file defines the code scanning configuration and specifies the events that trigger the scan (e.g., push, pull_request).
Without the workflow file in the branch, GitHub Actions will not execute the code scanning process for that branch. The repository's visibility (private or public), the status of secret scanning, or the activity level of developers do not directly influence the triggering of code scanning.

NEW QUESTION # 13
The autobuild step in the CodeQL workflow has failed. What should you do?

- A. Compile the source code.
- B. Use CodeQL, which implicitly detects the supported languages in your code base.
- C. Remove the autobuild step from your code scanning workflow and add specific build steps.
- D. Remove specific build steps.

Answer: C

Explanation:
Ifautobuildfails (which attempts to automatically detect how to build your project), you shoulddisable itin your workflow andreplace it with explicit build commands, using steps like run: make or run: ./gradlew build.
This ensures CodeQL can still extract and analyze the code correctly.

NEW QUESTION # 14
What role is required to change a repository's code scanning severity threshold that fails a pull request status check?

- A. Write
- B. Admin
- C. Triage
- D. Maintain

Answer: B

Explanation:
To change the threshold that defines whether a pull request fails due to code scanning alerts (such as blocking merges based on severity), the user must haveAdminaccess on the repository. This is because modifying these settings falls under repository configuration privileges.
Users with Write, Maintain, or Triage roles do not have the required access to modify rulesets or status check policies.

NEW QUESTION # 15
What kind of repository permissions do you need to request a Common Vulnerabilities and Exposures (CVE) identification number for a security advisory?

- A. Write
- B. Admin
- C. Triage
- D. Maintain

Answer: B

Explanation:
Requesting a CVE ID for a security advisory in a GitHub repository requiresAdminpermissions. This level of access is necessary because it involves managing sensitive security information and coordinating with external entities to assign a CVE, which is a formal process that can impact the public perception and security posture of the project.

NEW QUESTION # 16
Assuming there is no custom Dependabot behavior configured, where possible, what does Dependabot do after sending an alert about a vulnerable dependency in a repository?

- A. Scans any push to all branches and generates an alert for each vulnerable repository
- B. Scans repositories for vulnerable dependencies on a schedule and adds those files to a manifest
- C. Creates a pull request to upgrade the vulnerable dependency to the minimum possible secure version
- D. Constructs a graph of all the repository's dependencies and public dependents for the default branch

Answer: C

Explanation:
After generating an alert for a vulnerable dependency, Dependabot automatically attempts to create a pull request to upgrade that dependency to theminimum required secure version-if a fix is available and compatible with your project.
This automated PR helps teams fix vulnerabilities quickly with minimal manual intervention. You can also configure update behaviors using dependabot.yml, but in the default state, PR creation is automatic.

NEW QUESTION # 17
......

Getting GitHub certification is a good way for you to access to IT field. But you may find that real test questions are difficult and professional and you have no time to prepare the GitHub-Advanced-Security valid test. So it is time that our latest dumps torrent and training materials help you get high passing score in the process of GitHub-Advanced-Security practice test at your first attempt.

GitHub-Advanced-Security Pass Test: https://www.passexamdumps.com/GitHub-Advanced-Security-valid-exam-dumps.html

GitHub GitHub-Advanced-Security Latest Exam Forum It's just like you are the king, then countless people support and work for you, You can easily download these formats of GitHub GitHub-Advanced-Security actual dumps and use them to prepare for the GitHub GitHub-Advanced-Security certification test, GitHub GitHub-Advanced-Security Latest Exam Forum Compared to other training dumps, our exam dumps will definitely have high hit rate, GitHub GitHub-Advanced-Security Latest Exam Forum Furthermore our professional team will checks and updates our software frequently.

Passing Variable References to Functions, It enhances satisfaction by GitHub-Advanced-Security allowing you to finish several tasks in one sitting, It's just like you are the king, then countless people support and work for you.

How Can You Crack the GitHub GitHub-Advanced-Security Exam with Flying Colors?

You can easily download these formats of GitHub GitHub-Advanced-Security Actual Dumps and use them to prepare for the GitHub GitHub-Advanced-Security certification test, Compared to other training dumps, our exam dumps will definitely have high hit rate.

Furthermore our professional team will checks and updates our software frequently, Every day thousands of people browser our websites to select our GitHub-Advanced-Security exam materials.
