問題 #41

You are recording actions for a custom process step in a test automate.

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture text in a message screen that can be used for data binding later.
- B. To capture a value in a text field that should be stored as a variable.
- C. To capture an error message on the screen that can be used later.
- D. To capture a static label on the screen that should be checked during test execution.

答案：A,B

問題 #42

Where is the initial list of known integrations documented?

- A. In SAP Cloud ALM
- B. In the Digital Discovery Assessment

- C. In the Fit-to-Standard Workshops
- D. In the Business Driven Configuration Questionnaire

答案： B

問題 #43

Which embedded support offerings can you make use of in the SAP Fiori Launchpad? Note: There are 3 correct answers to this question.

- A. Video tutorials from the SAP Help Portal
- B. Recorded system simulations from the Learning Center
- C. Assessment questions from the SAP Learning Hub
- D. Recorded webinars from the SAP Learning Website
- E. Digital assistance from generative AI (SAP Joule)

答案： A,B,E

解題說明：

The SAP Fiori Launchpad provides embedded support offerings that can help users learn and perform tasks more efficiently. These offerings include:

- * Digital assistance from generative AI (SAP Joule): This is a conversational AI assistant that can answer user questions, provide guidance, and execute tasks using natural language. SAP Joule can be accessed by selecting the headphones icon in the top right corner of the SAP Fiori Launchpad and choosing the chat option.
- * Recorded system simulations from the Learning Center: These are interactive tutorials that show users how to perform common tasks and scenarios in the SAP S/4HANA Cloud system. Users can access the simulations by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the graduation cap icon. The simulations are created with the SAP Enable Now tool and can be customized by customers if needed.
- * Video tutorials from the SAP Help Portal: These are short videos that explain the features and functionalities of the SAP S/4HANA Cloud system and the SAP Fiori Launchpad. Users can access the videos by selecting the question mark icon in the top right corner of the SAP Fiori Launchpad and choosing the megaphone icon. The videos are also available on the SAP Help Portal website.

The other options are not embedded support offerings in the SAP Fiori Launchpad. Recorded webinars from the SAP Learning Website and assessment questions from the SAP Learning Hub are external learning resources that users can access separately from the SAP Fiori Launchpad. 問題 #44

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?

Note: There are 2 correct answers to this question.

- A. Data marked for deletion is picked for execution.
- B. An execution variant has not been maintained.
- C. The test process failed the execution pre-check.
- D. The process steps have been reordered.

答案： B,C

解題說明：

The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

- * An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it1.
 - * The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run2.
- The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:
- * Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test

process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system will ignore the data marked for deletion and use the available data for the test process³.

* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process⁴.
