Test JN0-336 Pdf – Reliable Practice Questions Providers for Juniper JN0-336: Security, Specialist (JNCIS-SEC)

The Juniper wants to become the first choice for quick and complete Juniper JN0-336 exam preparation. To achieve this objective the Juniper has hired a team of experienced and qualified JN0-336 Exam trainers. They have years of experience in verifying Security, Specialist (JNCIS-SEC) exam practice test questions.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q85-Q90):

NEW QUESTION # 85

You are configuring logging for a security policy.

In this scenario, in which two situations would log entries be generated? (Choose two.)

- A. every 10 minutes

- B. at session close
- C. every 60 seconds
- D. at session initialization

Answer: B,D

Explanation:

Log entries would be generated in two situations: at session initialization and at session close. At session initialization, the log entry would include details about the connection, such as the source and destination IP addresses, the service being used, and the action taken by the security policy. At session close, the log entry would include details about the connection, such as the duration of the session, the bytes sent/received, and the action taken by the security policy. For more information, you can refer to the Juniper Security documentation at

https://www.juniper.net/documentation/en_US/junos/topics/reference/configuration-statement/security-log-co

NEW QUESTION # 86

Which two statements are correct about JSA data collection? (Choose two.)

- A. The Flow Collector can use statistical sampling
- B. The Flow Collector parses logs.
- C. The Event Collector parses logs
- D. The Event Collector collects information using BGP FlowSpec.

Answer: A,C

Explanation:

The Flow Collector can use statistical sampling to collect and store network flow data in the JSA database. The Event Collector collects information from various sources including syslog, SNMP, NetFlow, and BGP FlowSpec. Both the Flow Collector and the Event Collector parse logs to extract useful information from the logs.

NEW QUESTION # 87

Which two statements about SRX Series device chassis clusters are true? (Choose two.)

- A. Each chassis cluster member requires a unique cluster ID value.
- B. Chassis cluster member devices must be the same model
- C. Redundancy group 0 is only active on the cluster backup node.
- D. Each chassis cluster member device can host active redundancy groups

Answer: B,D

Explanation:

In a chassis cluster, both nodes can host active redundancy groups. The active redundancy groups can be distributed between the two nodes, depending on the configuration and failover status, allowing each node to handle traffic for different sets of services or interfaces.

For the chassis clustering to function correctly, both nodes in the cluster must be of the same model.

This requirement ensures that the hardware capabilities, such as processing power and interface compatibility, are identical, which is crucial for maintaining consistent performance and behavior between cluster nodes.

NEW QUESTION # 88

You want to manually failover the primary Routing Engine in an SRX Series high availability cluster pair.

Which step is necessary to accomplish this task?

- A. Adjust the priority in the configuration on the secondary node.
- B. Implement the control link recover/ solution before adjusting the priorities.
- C. Manually request the failover and identify the secondary node
- D. Issue the set chassis cluster disable reboot command on the primary node.

Answer: C

Explanation:

This step involves issuing a command to manually initiate a failover from the primary Routing Engine to the secondary. This can typically be done using a command like `request chassis cluster failover redundancy-group <group-number> node <node-id>`, where `<group-number>` is the redundancy group you are failing over, and `<node-id>` specifies the node to which you want to failover (usually the secondary node). This command forces the designated node to take over as primary for the specified redundancy group.

NEW QUESTION # 89

Which statement regarding Juniper Identity Management Service (JIMS) domain PC probes is true?

- A. JIMS domain PC probes analyze domain controller security event logs at 60-minute intervals by default.
- B. JIMS domain PC probes are triggered to map usernames to group membership information.
- **C. JIMS domain PC probes are triggered if no username to IP address mapping is found in the domain security event log.**
- D. JIMS domain PC probes are initiated by an SRX Series device to verify authentication table information.

Answer: C

Explanation:

Juniper Identity Management Service (JIMS) domain PC probes are used to map usernames to IP addresses in the domain security event log. This allows for the SRX Series device to verify authentication table information, such as group membership. The probes are triggered whenever a username to IP address mapping is not found in the domain security event log. By default, the probes are executed at 60-minute intervals.

NEW QUESTION # 90

.....

There are three versions of our JN0-336 learning engine which can allow all kinds of our customers to use conveniently in different situations. They are the PDF, Software and APP online versions. I specially recommend the APP online version of our JN0-336 Exam Dumps. With the online app version of our JN0-336 actual exam, you can just feel free to practice the questions in our JN0-336 training materials on all kinds of electronic devices, such as IPAD, telephone, computer and so on!

Practice JN0-336 Questions: <https://www.dumpexam.com/JN0-336-valid-torrent.html>

While practicing on Juniper Security, Specialist (JNCIS-SEC) practice test software you will experience the real-time JN0-336 Security, Specialist (JNCIS-SEC) exam environment for preparation. For example, it will note that how much time you have used to finish the JN0-336 study guide, and how much marks you got for your practice as well as what kind of the questions and answers you are wrong with. Juniper Test JN0-336 Pdf To add up your interests and simplify some difficult points, our experts try their best to design our study material and help you understand the learning guide better.

Each time we passed each other at work we would throw out JN0-336 a question or answer) This made the process of studying and taking exams far less stressful and more enjoyable.

In this phase, the offshore projects that were initiated New JN0-336 Dumps in haste will fail to deliver on their promises and an internal backlash will ensue. While practicing on Juniper Security, Specialist (JNCIS-SEC) practice test software you will experience the real-time JN0-336 Security, Specialist (JNCIS-SEC) exam environment for preparation.

First-grade Test JN0-336 Pdf Provide Perfect Assistance in JN0-336 Preparation

For example, it will note that how much time you have used to finish the JN0-336 study guide, and how much marks you got for your practice as well as what kind of the questions and answers you are wrong with.

To add up your interests and simplify some difficult points, Practice JN0-336 Questions our experts try their best to design our study material and help you understand the learning guide better.

If you purchasing our JN0-336 simulating questions, you will get a comfortable package services afforded by our considerate after-sales services, Our JN0-336 exam material includes all Juniper certification exams detailed questions & answers files, We offer latest JN0-336 certifications preparation material which comes with guarantee that you will pass JN0-336 exams in the first attempt.
