NEW QUESTION # 274

Refer to the exhibit.

```

- name: stage1
  ansible.builtin.service:
    name: network
    state: restarted
    args: eth0
- name: stage2
  ansible.builtin.service:
    name: httpd
    state: started

```

The IT team deployed a new Linux virtual machine for a software engineer to use. but the engineer is not comfortable configuring services using Bash. Which workflow is automated by the Ansible playbook?

- A. Restart the httpd service and the network service regardless of the state.
- B. Restart the network on the eth0 interface and start the httpd service if it is not already started.
- C. Restart the httpd service and start the network service for the eth0 interface.
- D. Start the network service on the eth0 interface even if it was brought down manually.

Answer: B

Explanation:

The Ansible playbook in the exhibit consists of two stages:

Stage 1: Restarts the network service on the eth0 interface.

Stage 2: Starts the httpd service.

Stage 1:

```
- name: stage1
```

```
ansible.builtin.service:
```

```
name: network
```

state: restarted
args: eth0
This stage ensures that the network service on the eth0 interface is restarted.
Stage 2:
- name: stage2
ansible.builtin.service:
name: httpd
state: started
This stage ensures that the httpd service is started if it is not already running.

Answer: A,C

NEW QUESTION # 276

Refer to the exhibit.

Local File Attachments

To send local file attachments, simply post a message by including your access token in the Authorization header and the path to your local file with the files parameter. Optionally, you can also include a plain-text message with the attachment by using the text parameter. When uploading files directly from your local filesystem, your request will need to be a multipart/form-data request rather than JSON.

```
curl --request POST \
  --form "files=@/home/desktop/example.png;type=image/png" \
  --form "roomId=Y2l2Y2....." \
  --form "text=example attached" \
  https://webexapis.com/v1/messages
```

A developer needs to upload a local file by using the REST API. The developer gathers information according to the documentation and sends the request by using the cURL command in the exhibit but gets an error code. Which action should be followed to get valid response?

- A. change content type as JSON
- B. change request method as GET
- C. add the authorization header with the access token
- D. add a username-password combination to request command

Answer: C

NEW QUESTION # 277

.....

If you ask me why other site sell cheaper than your Pass4suresVCE site, I just want to ask you whether you regard the quality of 200-901 exam bootcamp PDF as the most important or not. Sometime I even don't want to explain too much. Sometime low-price site sell old version but we sell new updated version. If you want to get the old version of 200-901 Exam Bootcamp PDF as practice materials, you purchase our new version we can send you old version free of charge, if this Cisco 200-901 exam has old version.
