Valid EUNA_2024 Torrent - EUNA_2024 Training Kit

To get all these benefits you must have to pass the ArcGIS Utility Network Associate 2024 (EUNA_2024) certification exam which is not an easy task. It is a difficult task but you can make PDFDumps simple and quick. To do this you just visit Exams. Solutions provide updated, valid, and actual EUNA_2024 Exam Dumps that will assist you in ArcGIS Utility Network Associate 2024 (EUNA_2024) exam preparation and you can easily get success in this challenging ArcGIS Utility Network Associate 2024 exam with flying colors.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q47-Q52):

NEW QUESTION # 47

A utility company wants to model the open or closed state of valves in its water network and use this property in tracing operations. Which network property should be used, and how?

- A. Terminals, by setting directional flow
- B. Asset groups, by assigning valve type

- C. Network attributes, by adding a Status attribute for valves

Answer: C

Explanation:

Network attributes (e.g., "Status") allow tracing to respect open/closed valve conditions.

NEW QUESTION # 48

Which are the two prerequisites for creating and running validation attribute rules on a utility network dataset?

- A. Enterprise geodatabase and branch versioning
- B. File geodatabase and topology enabled
- C. Subnetwork diagram and tier definition

Answer: A

Explanation:

Validation rules require an enterprise geodatabase with branch versioning enabled.

NEW QUESTION # 49

On the side of a device where a subnetwork originates, which terminal setting must be used to correctly define the flow path?

- A. Load
- B. Default
- C. Source

Answer: A

Explanation:

The Load setting indicates the terminal where the subnetwork originates, establishing valid directionality.

NEW QUESTION # 50

When modeling underground pipelines, which type of structural feature would represent the casing that contains those pipes?

- A. Structure junction
- B. Structure line
- C. Structure boundary

Answer: B

Explanation:

Structure lines are used to contain domain network line features, such as pipe casings.

NEW QUESTION # 51

A field technician is using ArcGIS Field Maps with a published utility network. Which two actions are supported in Field Maps when interacting with the network?

- A. Apply validation rules and create subnetworks
- B. View associations and perform traces
- C. Offline editing and schema changes

Answer: B

Explanation:

In Field Maps, users can view associations and run traces. Offline editing workflows are not supported.
