to free download the AACE International Certification AACE-PSP Exam testing software and some practice questions and answers to on iPassleader website.

AACE International AACE-PSP (Planning & Scheduling Professional (PSP)) Exam is a globally recognized certification for professionals who are responsible for planning and scheduling in various industries. Planning & Scheduling Professional (PSP) Exam certification is offered by AACE International, a professional association that provides education, certification, and networking opportunities to project control professionals. The AACE-PSP certification evaluates the knowledge, skills, and abilities of candidates in planning, scheduling, and controlling projects.

Introduction to Planning & Scheduling Professional (PSP) Exam

A PSP is a technical specialist in planning and scheduling with specialized experience in project planning and the production, tracking, updating, forecasting, and analysis of integrated project schedules. Under the AACE International Total Cost Management (TCM) system, the PSP leads the planning and scheduling process. A PSP can interact efficiently, both internal and external, with all project stakeholders.

In each of those chapters, the PSP Certification exam is divided into two main chapters (Planning and Scheduling) and two sections. A glimpse of all these sections could be found in the **PSP exam dumps** as well:

- Schedule development
- Planning product
- Planning development
- Schedule maintenance and reporting

Planning is the mechanism by which the length of the project task is added to the schedule is to define the project goals and the orderly tasks required to complete the project (the thought part) and not to be confused with scheduling.

Scheduling is a summary of when it is possible to complete each operation in a project and it must be finished to be done on schedule. The simplest of schedules displays the beginning and completion of operations of a given period in bar chart format. More complex schedules provide schedule logic, usually in CPM format, and display the critical path and floats associated with each operation. A time series of events and activities that reflect an operational timetable. The schedule describes the relative task start and end times and event occurrence times. On a calendar framework or on an elapsed time scale, a schedule can be presented.

The exam is administered through computer-based testing (CBT) and consists of questions of multiple choice and essay-style questions. This test is a closed book. Programmable or preprogrammed calculators are also allowed (including those with financial functions). See the **PSP practice exams** to understand the paper format. This exam provides a framework for formally evaluating the expertise and abilities of the person in a subject against generally agreed standards. It recognizes those who have demonstrated their experience and expertise in planning and scheduling.

AACE International Planning & Scheduling Professional (PSP) Exam Sample Questions (Q43-Q48):
