BTW, DOWNLOAD part of Exam4Tests JN0-253 dumps from Cloud Storage: <https://drive.google.com/open?id=1mb6J35vJ3age-gAE2MmOdOI5-JfzSJqY>

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our JN0-253 real study dumps have the distinct advantage of fast delivery. Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the JN0-253 prep guide in 5-10 minutes, so you can get our JN0-253 Exam Questions at first time. And then you can start your study after downloading the JN0-253 exam questions in the email attachments. High efficiency service has won reputation for us among multitude of customers, so choosing our JN0-253 real study dumps we guarantee that you won't be regret of your decision.

The profession of our experts is expressed in our JN0-253 training prep thoroughly. They are great help to catch on the real knowledge of JN0-253 exam and give you an unforgettable experience. Do not miss this little benefit we offer for we give some discounts on our JN0-253 Exam Questions from time to time though the price of our JN0-253 study guide is already favourable. And every detail of our JN0-253 learning braindumps is perfect!

>> JN0-253 Valid Test Forum <<

Best JN0-253 Valid Test Forum Along with Real Questions

If you want to use our JN0-253 simulating exam on your phone at any time, then APP version is your best choice as long as you have browsers on your phone. Of course, some candidates hope that they can experience the feeling of exam when they use the JN0-253 learning engine every day. Then our PC version of our JN0-253 Exam Questions can fully meet their needs only if their computers are equipped with windows system. As we face with phones and computers everyday, these two versions are really good.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q19-Q24):

NEW QUESTION # 19

What are two components of WiFi Management and Assurance? (Choose two.)

- A. Radio Resource Management
- B. Dynamic Packet Capture
- C. Marvis Actions
- D. wayfinding

Answer: A,B

Explanation:

Dynamic Packet Capture and Radio Resource Management (RRM) are two key components of WiFi Management and Assurance in Juniper Mist. According to official documentation: "Dynamic packet capture allows capturing wireless packets between clients and an access point to diagnose root-cause wireless issues.

For example, when a major issue is detected, such as an authorization failure, packet captures facilitate quick troubleshooting and root-cause analysis." RRM, driven by Mist's AI, proactively analyzes network conditions and client experiences to automatically adjust channel and power settings for optimal performance: "AI- driven RRM uses data science and cumulative SLE performance to learn and optimize radio settings, helping RF planning to continue to improve and adapt in the changing environments..." Marvis Actions is an AI-powered troubleshooting feature, but it is a separate component enabled by the Marvis subscription, not by base WiFi Management and Assurance. Wayfinding is part of the vBLE Engagement or location services.

NEW QUESTION # 20

You are asked to create a real-time visualization dashboard which displays clients on a map.

Which two Juniper Mist functions would you use in this scenario? (Choose two.)

- A. Webhooks
- B. Live View
- C. RESTful API
- D. WebSocket

Answer: B,D

Explanation:

When developing a real-time visualization dashboard that displays client locations on a map, Juniper Mist offers specific APIs and data streaming methods to support dynamic updates.

According to the Juniper Mist Developer Documentation, the WebSocket interface enables continuous, real-time streaming of client location and telemetry data directly from the Mist Cloud. This mechanism is ideal for live dashboards, as it eliminates the need for repeated REST API polling. WebSocket connections provide instant updates whenever a device moves, connects, or disconnects, ensuring the displayed map remains accurate in real time.

The Live View feature complements this functionality within the Mist Cloud and third-party integrations. It allows administrators and developers to view live location movements of Wi-Fi clients, BLE beacons, and IoT devices within a site's floor plan. It uses telemetry directly from access points, offering second-by-second updates.

In contrast, RESTful APIs and Webhooks are designed for event-based automation and configuration management rather than live visualization. REST APIs are best for historical or static data retrieval, while Webhooks are used for triggering external actions based on events.

Therefore, the correct functions for real-time map visualization are:

- * WebSocket (C) - for continuous live data streaming
- * Live View (D) - for direct map-based visualization of client activity

NEW QUESTION # 21

Which unit of measurement is used for capacity, coverage, and throughput SLEs?

- A. percentage of user minutes
- B. signal strength in dBm
- C. percentage of channel utilization
- D. throughput in Mbps

Answer: D

Explanation:

For capacity, coverage, and throughput Service Level Expectations (SLEs) in Mist AI, throughput is measured in Mbps. This unit measures the rate at which data is successfully delivered over the wireless network, providing a clear indication of network performance and user experience. Mist AI tracks these metrics to ensure the network meets the required performance standards.

NEW QUESTION # 22

Which statement accurately describes the capabilities of the Juniper Mist AI platform?

- A. Marvis requires substantial user interaction for troubleshooting and does not provide proactive solutions.
- B. The Mist Cloud is not involved in the aggregation and storage of data required by the AI/ML solution, limiting its effectiveness.
- **C. Juniper Mist AI uses Predictive Analytics and Correlation Engine (PACE) to collect and analyze pre-connection and post-connection user and location states in near real-time.**
- D. Juniper Mist AI relies solely on manual data collection for network health solutions and root cause analysis, without using AI algorithms.

Answer: C

Explanation:

The Juniper Mist AI platform is a cloud-native, AI-driven network management solution that leverages machine learning and data science to provide predictive insights, proactive troubleshooting, and automated optimization across wireless, wired, and WAN environments.

At the core of this intelligence is the Predictive Analytics and Correlation Engine (PACE), which powers Mist AI's ability to process and analyze massive volumes of telemetry data in near real time.

According to the Juniper Mist AI Cloud Architecture Guide,

"The Predictive Analytics and Correlation Engine (PACE) collects, correlates, and analyzes pre-connection and post-connection user experience data, enabling real-time visibility and proactive detection of network anomalies." This allows Mist AI to perform the following:

- * Understand client onboarding and connectivity performance through SLE (Service Level Expectation) metrics.
- * Detect anomalies automatically and identify root causes with Marvis.
- * Continuously learn and improve via the Mist AI efficacy loop.

Options A, C, and D are incorrect because:

- * Mist AI is fully automated and does not rely on manual data collection.
- * The Mist Cloud is the central data aggregation and analysis engine.
- * Marvis is proactive and autonomous, not dependent on user-driven troubleshooting.

Therefore, the correct answer is B. Juniper Mist AI uses Predictive Analytics and Correlation Engine (PACE) to collect and analyze pre-connection and post-connection user and location states in near real-time.

NEW QUESTION # 23

Which statement is true about Radio Resource Management (RRM)?

- **A. The RRM global optimization system automatically runs once a day.**
- B. The RRM global optimization system automatically runs every hour.
- C. The RRM event-driven system automatically runs every hour.
- D. The RRM event-driven system automatically runs once a day.

Answer: A

Explanation:

Radio Resource Management (RRM) is a key feature of Juniper Mist Wireless Assurance that uses AI-driven automation to dynamically adjust radio settings across access points (APs) for optimal wireless performance. The RRM engine ensures proper channel assignment, transmit power control, and interference management across the network.

According to the Juniper Mist Wireless Assurance and AI-Driven RRM Guide, RRM operates in two modes:

- * Event-Driven RRM: This mode reacts immediately to real-time changes in the RF environment, such as new access points, interference spikes, or client density changes.
- * Global Optimization RRM: This process runs as scheduled, system-wide optimization once per day to evaluate the overall RF environment and redistribute channels and power settings network-wide for the best balance of coverage and capacity.

The documentation states:

"The RRM global optimization algorithm automatically executes once daily to ensure optimal channel and power planning across all APs." Thus, the correct answer is D - The RRM global optimization system automatically runs once a day.

NEW QUESTION # 24

.....

If you have the certificate, you can enjoy many advantages: you can enter a big enterprise and double your salary and buy things you want. JN0-253 learning materials will offer you such a chance to you. With skilled professionals to compile the JN0-253 exam materials of us, we will give you the high-quality study guide materials. In addition, we offer you free update for one year, that is to say, in the following year, you can obtain the latest version for JN0-253 Exam Materials once they updates. We have service stuff to answer any of your confusions.

Valid JN0-253 Test Camp: <https://www.exam4tests.com/JN0-253-valid-braindumps.html>

So the latest and update JN0-253 valid pass4cram are shown for you, Now, please pay attention to our JN0-253 latest vce prep, Moreover, the Juniper JN0-253 actual questions PDF file will be available for immediate download right after your purchase, eliminating any waiting time, The PDF file is downloadable and printable with 90 days of free update options of JN0-253 exam dumps that show that the students have plenty of opportunities to practice and pass the JN0-253 Juniper Certified Specialist certification exam, Once their classmates or colleagues need to prepare an exam, they will soon introduce them to choose our JN0-253 study materials.

Or, if you skipped ahead and found the right section, congratulations, Documents in the collection are accessed via a unique key, So the latest and update JN0-253 valid pass4cram are shown for you.

New JN0-253 Valid Test Forum Pass Certify | High-quality Valid JN0-253 Test Camp: Mist AI, Associate (JNCIA-MistAI)

Now, please pay attention to our JN0-253 latest vce prep, Moreover, the Juniper JN0-253 actual questions PDF file will be available for immediate download right after your purchase, eliminating any waiting time.

The PDF file is downloadable and printable with 90 days of free update options of JN0-253 exam dumps that show that the students have plenty of opportunities to practice and pass the JN0-253 Juniper Certified Specialist certification exam.

Once their classmates or colleagues need to prepare an exam, they will soon introduce them to choose our JN0-253 study materials.
