HCL-HWA-ADM-102 Test Discount - HCL-HWA-ADM-102 Study Guide Pdf

Before starting the HCLSoftware HCL-HWA-ADM-102 preparation, plan the amount of time you will allot to each topic, determine the topics that demand more effort and prioritize the components that possess more weightage in the HCLSoftware HCL-HWA-ADM-102 Exam. This kind of polished approach is beneficial for a commendable grade in the HCLSoftware HCL-HWA-ADM-102 Exam.

HCLSoftware Certified Administrator- HWA 10.2 Sample Questions (Q140-Q145):

NEW QUESTION # 140

An HCL Workload Automation 10.2 administrator configures Global Options using conman to enforce a maximum of 50 concurrent jobs across all workstation classes in a production plan, but observes that critical job streams exceed this limit during peak hours due to inherited stream-level settings. To enforce the global limit strictly while allowing exceptions for specific job streams, which Global Option command sequence must be executed?

- A. alter global enListLimit="50"; alter global maxRunJobs="50"
- B. alter global maxJobs="50"; unlock global
- C. modify global options maxConcurrent=50; refresh production plan
- D. set global concurrentJobs=50; apply global

Answer: A

Explanation:

Global Options in HCL Workload Automation control engine-wide limits such as `enListLimit` for the maximum number of jobs that can be eligible to run and `maxRunJobs` for actively running jobs, where executing `alter global enListLimit="50"`; `alter global maxRunJobs="50"` sets both thresholds to 50 to comprehensively cap concurrency at the engine level regardless of workstation class or stream inheritance. The `unlock global` command finalizes changes by applying them to the current production plan, ensuring immediate enforcement without requiring a plan refresh. This approach supersedes stream-level concurrent limits, allowing designated high-priority streams to request exceptions through elevated priority values while still respecting the global ceiling.

NEW QUESTION # 141

Scenario: During installation of a fault-tolerant agent in HCL Workload Automation 10.2 using `twinsinst`, you encounter a failure because the specified installation directory lacks proper permissions. What is the root cause and resolution for this issue on a UNIX system?

- A. The HCL Workload Automation user specified in `-uname` does not have read and execute privileges on the installation path; ensure 755 permissions or higher and retry.
- B. The `umask` is not set to 022; set `umask 022` before installation.
- C. The database administrator lacks privileges; grant DB access and retry.
- D. Insufficient disk space in `TWA_HOME`; free up space in `/opt/HCL`.
- E. WebSphere Liberty port conflict; change the `https` port parameter.

Answer: A

Explanation:

On UNIX systems, the user specified with the `-uname` parameter during `twinsinst` execution must have read and execute privileges on the target installation directory for the installation to succeed. Without these privileges (typically requiring at least 755 permissions), the script cannot create necessary files and directories, leading to failure. This is a common prerequisite check that, if missed, halts the process. Correcting the permissions for the specified user resolves the issue without needing to adjust `umask`, database access, ports, or disk space specifically for this error.

NEW QUESTION # 142

Using `optman`, an administrator lists all global options. Which command displays the current value of `enCarryForward`?

- A. `optman ls cf`
- B. `optman show enCarryForward`
- C. `optman chg cf?`
- D. `optman display cf`
- E. `optman ls | grep carry`

Answer: B

Explanation:

The `optman show {option}` command displays the current value of a specific global option, such as `enCarryForward`. The `ls` command lists all options with values, while short names can be used in some contexts.

NEW QUESTION # 143

HCL HWA 10.2 AIX Power9 LPAR agent installation using NIM fails mount: "0509-138 RP: The repository path does not exist". `/etc/filesystems` shows `tw_agent_repo` mounted but empty. Correct NIM export definition?

- A. Define `lpp_source` with `-a contents=mksysb -a multi_volume=true`
- B. NIM handles agent repo automatically from installp bundle
- C. `nim_master# nim -o define -t lpp_source -a server=nim_master -a location=/export/hwa10.2/repo -a Rstate=ready`
- D. `mknimimage -B -o tws_agent_lpp -s spot -a lpp_source=tw_agent_repo spot1`

Answer: C

Explanation:

NIM `lpp_source` required for HCL agent packages. `nim -o define -t lpp_source -a server=nim_master -a location=/export/nim/lpp_source/hwa102_agent -a Rstate=READY -a alloc_count=0` creates repository. `nim -o bos_inst -a`

source=lp_source_hwa102 client_lpar installs agent packages correctly.

NEW QUESTION # 144

In HCL Workload Automation 10.2 inter-process communication, which message file is used exclusively on domain managers for sending commands to subordinate FTAs?

- A. Batchmanbox.msg
- B. Symphony.msg
- C. Serverbox.msg
- D. Mailbox.msg
- E. Courier.msg

Answer: E

Explanation:

Courier.msg is specific to domain managers and queues outbound messages to child agents in the domain hierarchy.

NEW QUESTION # 145

.....

People are very busy nowadays, so they want to make good use of their lunch time for preparing for their HCL-HWA-ADM-102 exam. As is known to us, if there are many people who are plugged into the internet, it will lead to unstable state of the whole network, and you will not use your study materials in your lunch time. If you choose our HCL-HWA-ADM-102 exam question as your study tool, you will not meet the problem. Because the app of our HCL-HWA-ADM-102 Exam Prep supports practice offline in anytime. If you buy our products, you can also continue your study when you are in an offline state. You will not be affected by the unable state of the whole network. You can choose to use our HCL-HWA-ADM-102 exam prep in anytime and anywhere.
