**Start Exam Preparation with Real and Valid RealValidExam CertNexus CFR-410 Exam Questions**

We provide updated and real CertNexus CFR-410 exam questions that are sufficient to clear the CyberSec First Responder (CFR-410) exam in one go. The product of RealValidExam is created by seasoned professionals and is frequently updated to reflect changes in the content of the CFR-410 Exam Questions.

## CertNexus CyberSec First Responder Sample Questions (Q74-Q79):

### NEW QUESTION # 74

While performing routing maintenance on a Windows Server, a technician notices several unapproved Windows Updates and that remote access software has been installed. The technician suspects that a malicious actor has gained access to the system. Which of the following steps in the attack process does this activity indicate?

- A. Persistence
- B. Scanning
- C. Expanding access
- D. Covering tracks

**Answer: C**

### NEW QUESTION # 75

An automatic vulnerability scan has been performed. Which is the next step of the vulnerability assessment process?

- A. Hardening the infrastructure
- B. Assessing identified exposures
- C. Documenting exceptions
- D. Generating reports

**Answer: D**

### NEW QUESTION # 76

While planning a vulnerability assessment on a computer network, which of the following is essential? (Choose two.)

- A. Identifying critical assets
- B. Identifying exposures
- C. Establishing scope
- D. Installing antivirus software
- E. Running scanning tools

**Answer: B,C**

### NEW QUESTION # 77

When performing a vulnerability assessment from outside the perimeter, which of the following network devices is MOST likely to skew the scan results?

- A. Firewall
- B. Router
- C. IDS
- D. Switch
- E. Access Point

**Answer: A**

Explanation:

A firewall is most likely to skew the results of a vulnerability scan when performing an assessment from outside the perimeter. Firewalls are designed to filter and block traffic based on security rules, which can prevent scanners from accurately assessing vulnerabilities in the network. Firewalls may block or alter certain types of scan traffic, leading to incomplete or misleading results.

## NEW QUESTION # 78

A company help desk is flooded with calls regarding systems experiencing slow performance and certain Internet sites taking a long time to load or not loading at all. The security operations center (SOC) analysts who receive these calls take the following actions:

- Running antivirus scans on the affected user machines
- Checking department membership of affected users
- Checking the host-based intrusion prevention system (HIPS) console for affected user machine alerts
- Checking network monitoring tools for anomalous activities

Which of the following phases of the incident response process match the actions taken?

- A. Containment
- B. Preparation
- C. Identification
- D. Recovery

**Answer: C**

## NEW QUESTION # 79
