Topic	Details
Topic 1	• Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.

Topic 2	Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.
Topic 3	Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.
Topic 4	Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.
Topic 5	Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which applications are eligible to receive the OGL Included offering?

- **A. Oracle Fusion SaaS applications**
- B. Any Oracle applications
- C. Third-party applications

Answer: A

Explanation:

The OGL Included offering is specifically available for Oracle Fusion SaaS applications (option B), as it's bundled with these cloud solutions to enhance user guidance. Not all Oracle applications (option A) qualify, and third-party applications (option C) require separate integration, not the Included offering. This eligibility ties OGL's native support to Fusion's SaaS model, ensuring seamless deployment within Oracle's core cloud ecosystem.

NEW QUESTION # 45

Which activity might be included in an effective Hypercare strategy?

- A. Hide resources that might help end users.
- B. Do not designate change champions.
- C. Provide a clear base of operations for escalations.

Answer: C

Explanation:

Hypercare is the post-go-live support phase in OGL projects, aimed at stabilizing the system and addressing user issues swiftly.

Providing a clear base of operations for escalations (option B) establishes a structured process for handling problems, ensuring support teams can respond effectively—a hallmark of an effective Hypercare strategy. Hiding resources (option A) contradicts support goals, and not designating change champions (option C) weakens advocacy and adoption, both being poor practices.

Option B's focus on escalation clarity enhances user confidence and system reliability, making it the strategic choice for Hypercare success.

NEW QUESTION # 46

Which of the following is not an OGL console role?

- A. Analyst
- B. Owner
- C. Developer
- D. Editor
- E. Viewer

Answer: A

Explanation:

OGL console roles include Owner, Viewer, Developer, and Editor, each with specific permissions. "Analyst" is not a standard OGL role, making it the correct answer.

NEW QUESTION # 47

Which OGL analytics dashboard provides information about user logins and activity including unique users over time?

- A. Feedback dashboard
- B. Content dashboard
- C. Users dashboard
- D. Activity dashboard

Answer: C

Explanation:

The Users dashboard in OGL focuses on user-specific metrics, such as login frequency, unique users over time, and overall activity within the console. This makes it the go-to tool for understanding who is accessing OGL and how often, providing a longitudinal view of user adoption. The Feedback dashboard (option A) deals with user ratings, the Content dashboard (option B) tracks content inventory, and the Activity dashboard (option D) focuses on guide usage, not user logins. The Users dashboard's emphasis on login and activity data offers critical insights for assessing system reach and engagement, perfectly matching the question's scope.

NEW QUESTION # 48

What is a clear sign that OGL is enabled in production?

- A. You will receive an email notification.
- B. You can file your expense report.
- C. You will see the OGL "widget."
- D. You can select infotiles on the home screen.

Answer: C

Explanation:

The OGL "widget" appearing in the host application is a clear visual indicator that OGL is enabled in Production. Other options are not specific to OGL enablement.
