- D. Ensure transparency on deviations

Answer: A,D

Explanation:

A cloud mindset in a greenfield implementation of SAP S/4HANA Cloud Public Edition emphasizes standardization, minimal

customizations, and adherence to SAP Best Practices. Specific considerations ensure alignment with this approach.

* Option A: Use quality gatesIncorrect. While quality gates are part of the SAP Activate methodology, they are not specific to the cloud mindset; they apply to all implementations. TheSAP Activate Methodology Guidestates, "Quality gates are a standard practice in SAP Activate, not unique to the cloud mindset, which focuses on standardization and extensibility."

* Option B: Ensure transparency on deviationsCorrect. Transparency on deviations from standard processes is critical to maintain cloud compliance and manage technical debt. TheSAP S/4HANA Cloud Implementation Guideexplains, "A cloud mindset requires transparency on deviations from SAP Best Practices, ensuring that customizations are documented and justified to minimize future upgrade complexities."

* Option C: Use SAP Digital Discovery AssessmentIncorrect. The Digital Discovery Assessment is a tool used in the Discover phase, not a specific consideration of the cloud mindset. TheSAP S/4HANA Cloud Study Guidenotes, "The Digital Discovery Assessment supports project planning, but the cloud mindset focuses on operational principles like standardization."

* Option D: Use supported extensibility technologiesCorrect. Using supported extensibility technologies, such as SAP BTP or in-app extensions, ensures cloud-compliant customizations. TheSAP S/4HANA Cloud Extensibility Guideconfirms, "A cloud mindset emphasizes the use of supported extensibility technologies, like SAP BTP and Fiori extensibility apps, to maintain compatibility with SAP S/4HANA Cloud upgrades." Extract from Official Documentation:
