

Choosing Latest 220-1202 Braindumps - No Worry About CompTIA A+ Certification Exam: Core 2

EXAM✓CRAM

What's more, part of that Actual4test 220-1202 dumps now are free: <https://drive.google.com/open?id=1S7Pxqm4cksw4WeQ-zAal6Zyj7afn4yWr>

Many people may worry that the 220-1202 guide torrent is not enough for them to practice and the update is slowly. We guarantee you that our experts check whether the 220-1202 study materials is updated or not every day and if there is the update the system will send the update to the client automatically. So you have no the necessity to worry that you don't have latest 220-1202 Exam Torrent to practice. We provide the best service to you and hope you are satisfied with our 220-1202 exam questions and our service.

Obtaining a certificate has many benefits, you can strengthen your competitive force in the job market, enter a better company, and double your wage etc. 220-1202 exam bootcamp of us will help you get the certificate successfully. With experienced experts to edit and verify, 220-1202 exam dumps are high quality and accuracy. You can pass the exam just one time. In addition, 220-1202 Exam Bootcamp contain both questions and answers, and you can check the answer easily. Free update for 365 days is available. Our system will send the latest version of 220-1202 exam dumps to you automatically.

220-1202 EXAM DUMPS WITH GUARANTEED SUCCESS

You will have a sense of achievements when you finish learning our 220-1202 study materials. During your practice of the 220-1202 preparation guide, you will gradually change your passive outlook and become hopeful for life. We strongly advise you to have a brave attempt. You will never enjoy life if you always stay in your comfort zone. And our 220-1202 Exam Questions will help you realize your dream and make it come true.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q154-Q159):

NEW QUESTION # 154

A technician is attempting to join a workstation to a domain but is receiving an error message stating the domain cannot be found. However, the technician is able to ping the server and access the internet. Given the following information:

- * IP Address - 192.168.1.210
- * Subnet Mask - 255.255.255.0
- * Gateway - 192.168.1.1
- * DNS1 - 8.8.8.8
- * DNS2 - 1.1.1.1
- * Server - 192.168.1.10

Which of the following should the technician do to fix the issue?

- A. Update the default gateway.
- B. Assign a static IP address.
- C. Configure a subnet mask.
- **D. Change the DNS settings.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The issue described-"domain cannot be found" despite the ability to ping the server and access the internet-indicates a DNS resolution problem, not a network connectivity issue. The workstation is currently using public DNS servers (8.8.8.8 and 1.1.1.1) which cannot resolve internal domain names, such as the ones used in Active Directory environments. To resolve this, the technician needs to change the DNS settings to point to the internal DNS server, which in most domain setups is the domain controller itself (likely 192.168.1.10 in this case).

Here's the breakdown of the incorrect options:

- * B. Assign a static IP address: The IP is already assigned and functioning; the device can ping and reach the network and internet.
- * C. Configure a subnet mask: The subnet mask is appropriate for the network range (Class C /24).
- * D. Update the default gateway: The gateway is valid and allows internet access; this is not the issue.

CompTIA A+ 220-1102 Core 2 Objective Reference:

Objective 1.8 - Given a scenario, use features and tools of the operating system.

Under this objective, candidates must know how to troubleshoot OS-based network configurations, including proper DNS settings in domain environments.

-

NEW QUESTION # 155

Which of the following is used to detect and record access to restricted areas?

- A. Bollards
- B. Video surveillance
- C. Fence
- **D. Badge readers**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Badge readers are electronic access control systems that require authorized users to scan a badge (e.g., RFID or magnetic strip cards) to gain access to restricted physical locations. These systems typically log all access attempts-successful or denied-providing both detection and recording of access events.

A: Bollards are physical barriers to prevent vehicle access.

B: Video surveillance can record access visually but does not track identity unless integrated with access control systems.

D: A fence restricts access but doesn't detect or record who entered.

Reference:

CompTIA A+ 220-1102 Objective 2.4: Compare and contrast physical security measures.

Study Guide Section: Physical access controls (e.g., badge readers, mantraps)

NEW QUESTION # 156

A help desk technician recently installed an SSH client on a workstation in order to access remote servers.

What does this enable?

- A. To facilitate device log reviews
- B. To utilize an SSO connection
- **C. To securely establish a console session**
- D. To encrypt and decrypt protected messages

Answer: C

Explanation:

SSH (Secure Shell) allows encrypted console sessions to access and administer remote servers.

From Quentin Docter - Complete Study Guide:

"Secure Shell (SSH) provides an encrypted console session to manage Linux, UNIX, or network devices securely over TCP port 22."

NEW QUESTION # 157

Which of the following is used to apply corporate restrictions on an Apple device?

- **A. Management profile**
- B. Apple ID
- C. VPN configuration
- D. App Store

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A management profile is used to enforce corporate policies on Apple devices. These profiles are installed via an MDM (Mobile Device Management) solution and control access, restrictions, Wi-Fi settings, app installations, and more. They're critical for managing devices in a business environment.

A: The App Store allows software downloads but doesn't control policies.

B: VPN configuration is used for secure remote connections, not enforcement of restrictions.

C: Apple ID is for personal account access to Apple services, not corporate device management.

Reference:

CompTIA A+ 220-1102 Objective 2.2: Compare and contrast security tools and MDM features.

Study Guide Section: Mobile device management and configuration profiles (Apple/iOS)

NEW QUESTION # 158

After completing malware removal steps, what is the next step the technician should take?

- A. Reimage the computer
- B. Review system logs
- C. Perform a secondary antivirus scan
- **D. Educate the end user**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

End-user education is crucial after malware removal to prevent recurrence. Teaching safe browsing habits and security awareness

"Educating the user after malware remediation is part of the CompTIA malware response methodology. This includes training on phishing and safe practices."
