Topic 4	<ul style="list-style-type: none"> <li>Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.</li> </ul>

## APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q27-Q32):

### NEW QUESTION # 27

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [ ? ] these actions.

- A. communicate
- B. improve the effectiveness of
- C. apply competent resources to
- D. evaluate the effectiveness of

**Answer: D**

Explanation:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

\* integrate and implement the actions into its ISMS processes; and

\* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

### NEW QUESTION # 28

Which activity is an operational planning and control requirement?

- A. Review the consequences of unintended changes
- B. Perform information security risk assessments at planned intervals
- C. Document information security objectives
- D. Scheduling of second party audits

**Answer: A**

Explanation:

Clause 8.1 (Operational planning and control) requires organizations to:

"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).

Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

### NEW QUESTION # 29

When are the information security policies required to be reviewed, according to the Policies for information security control?

- A. Every six months

- B. According to a schedule defined by the Certification Body
- **C. At planned intervals and if significant changes occur**
- D. Annually

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This clearly identifies the review frequency requirement: planned intervals and whenever there are significant changes. Options A and B (six-monthly or annually) are not prescribed by ISO - timing is left to the organization. Option C is also wrong, since Certification Bodies do not dictate policy review schedules.

Therefore, the verified correct answer is D.

### NEW QUESTION # 30

Identify the missing word(s) in the following sentence.

"Information security, cybersecurity and privacy protection - [ ? ]" is the title of ISO/IEC 27005.

- **A. Guidance on managing information security risks**
- B. Information security controls
- C. Information security management systems - Requirements
- D. Guidelines for information security management systems auditing

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27005 standards:

ISO/IEC 27005:2022 is titled:

"Information security, cybersecurity and privacy protection - Guidance on managing information security risks." This standard provides structured methodologies for identifying, analyzing, evaluating, and treating risks, in alignment with ISO/IEC 27001's risk management requirements (Clause 6.1.2 and 6.1.3). It supports organizations in implementing the risk management process that underpins an ISMS. Options A and B are titles of other ISO standards (ISO/IEC 27007 for auditing, ISO/IEC 27001 for requirements). Option D refers to ISO/IEC 27002 (controls).

Thus, the correct answer is C: Guidance on managing information security risks.

### NEW QUESTION # 31

Which output is a required result from risk analysis?

- A. Risk treatment control options
- B. Risk acceptance criteria
- C. Prioritized risks for treatment
- **D. Determined levels of risk**

**Answer: D**

Explanation:

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

\* "assess the potential consequences that would result if the risks identified... were to materialize;"

\* "assess the realistic likelihood of the occurrence of the risks identified;"

\* "determine the levels of risk."

This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is B: Determined levels of risk.

### NEW QUESTION # 32

.....

The system of ISO-IEC-27001-Foundation study materials is very smooth and you don't need to spend a lot of time installing it. We take into account all aspects on the ISO-IEC-27001-Foundation exam braindumps and save you as much time as possible. After the installation is complete, you can devote all of your time to studying ISO-IEC-27001-Foundation Exam Questions. And a lot of our worthy customers always praise the high-efficiency of our ISO-IEC-27001-Foundation learning guide. If you buy it, i guess you will love it as well.
