Chrome-Enterprise-Administrator Reliable Exam Online & Authorized Chrome-Enterprise-Administrator Pdf

2025 Latest PassTorrent Chrome-Enterprise-Administrator PDF Dumps and Chrome-Enterprise-Administrator Exam Engine Free Share: https://drive.google.com/open?id=1PNHt1_Kr_-BVoSkNtEiyn9xMjwj8RbHL

As we all know, PassTorrent's Google Chrome-Enterprise-Administrator exam training materials has very high profile, and it is also well-known in the worldwide. Why it produces such a big chain reaction? This is because PassTorrent's Google Chrome-Enterprise-Administrator Exam Training materials is is really good. And it really can help us to achieve excellent results.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 2	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 3	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 4	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 5	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.

Authorized Google Chrome-Enterprise-Administrator Pdf & New Chrome-Enterprise-Administrator Dumps Sheet

Most Google Chrome-Enterprise-Administrator exam dumps in the market are expensive, and candidates cannot afford them. However, Google Chrome-Enterprise-Administrator exam questions have fewer prices, and you can try the demo versions before purchasing. PassTorrent offers free updates for 365 days. Professional Chrome Enterprise Administrator Certification Exam Chrome-Enterprise-Administrator have latest exam book and latest exam questions and answers. You will get a handful of knowledge about topics that will benefit your professional career.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41
A company is managing browsers in the Google Admin console Security has scanned extensions in the organization and has determined that there are several extensions installed with ability to set proxy This violates company policy How would an administrator block these extensions'?

- A. Set permission policy in the Google Admin console to block such extensions
- B. Send an email to the users notifying them that they must uninstall the detected extensions
- C. Set policy in the Google Admin console to block all extensions from being installed on the browser
- D. Remotely connect to each device and delete the extension from the browser

Answer: A

Explanation:
The Google Admin console allows administrators to control extension permissions. By configuring the
"Permissions and URL access" policy, the administrator can block extensions that request specific permissions, such as the ability to set a proxy. This is a centralized and effective way to enforce the security policy. Remotely connecting to each device (option B) is not scalable. Blocking all extensions (option C) might be too restrictive. Relying on users to uninstall (option D) is not enforceable.

NEW QUESTION # 42
To reduce risk, an organization is required to maintain a minimum Chrome browser version. The organization allows updates but finds that not all browsers are within one major version of the stable release.
Which policy option would help an admin enforce Chrome browser updates to the latest major stable version via automatic updates'?

- A. Rollback to target version
- B. Component updates
- C. Auto-update check period
- D. Relaunch notification

Answer: C

Explanation:
While not directly stating "enforce to the latest major stable version," the "Auto-update check period" policy, when configured appropriately (shorter intervals), ensures that devices check for and apply updates more frequently. This increases the likelihood of browsers reaching and staying closer to the latest stable version over time. "Rollback to target version" is for reverting updates, "Component updates" manages specific browser components, and "Relaunch notification" prompts users to restart after an update.

NEW QUESTION # 43
An organization relies heavily on Chrome browser for daily operations News breaks about two critical hardware vulnerabilities These vulnerabilities allow attackers to potentially access sensitive information stored in the browser's memory, even across different websites and processes Which specific Chrome Enterprise Core policy would an administrator implement to help mitigate the risks?

- A. Require Hardware-backed Key Generation for TLS
- B. Update Chrome browser to the latest stable version
- C. Manage Cross-Origin Extensions by Blocking all except an allowlist
- D. Enable Site isolation for every website

Answer: D

Explanation:
The scenario describes vulnerabilities that could allow cross-site data leakage within the browser's memory.
"Site isolation for every website" is a security feature in Chrome that isolates the rendering process for each website, preventing one site from accessing the data of another, even if a vulnerability is exploited. This policy directly addresses the risk of cross-site information leakage due to memory vulnerabilities. Option A relates to TLS security, option B is a general security best practice but doesn't directly prevent cross-site memory access, and option C manages extension behavior, not core browser memory isolation.

NEW QUESTION # 44
What is the schedule for Chrome stable channel major releases'?

- A. Whenever new features are added
- B. The second Tuesday of every month
- C. Every 28 days (every four weeks)
- D. Once a quarter (every three months)

Answer: C

Explanation:
The Chrome release cycle for the Stable channel is approximately every four weeks. This consistent schedule allows administrators to anticipate and plan for new feature deployments and potential compatibility testing.
While security updates can occur more frequently and are often released on Tuesdays, major version updates follow this roughly monthly cadence.

NEW QUESTION # 45
A small business wants to have all of their macOS devices enroll in Chrome Enterprise Core. They do not have a Mobile Device Management solution but do maintain a base image for their Mac computers Where should they put the enrollment token*?

- A. HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome\CloudManagementEnrollmentToken
- B. /Library/Google/Chrome/CloudManagementEnrollmentToken
- C. /Library/Google/Chrome/Enrollment/DeviceManagementToken
- D. /etc/opt/chrome/policies/enrollment/CloudManagementEnrollmentToken

Answer: B

Explanation:
For macOS devices without MDM, the enrollment token can be embedded in the base image. The correct path for placing the cloud management enrollment token on macOS is `/Library/Google/Chrome
/CloudManagementEnrollmentToken`. The other paths listed are for Windows Registry (A), a non-standard Linux path (C), and a potentially incorrect macOS path (D).
