It is universally accepted that the exam is a tough nut to crack for the majority of candidates, but the related Chrome-Enterprise-Administrator certification is of great significance for workers in this field so that many workers have to meet the challenge. Fortunately, you need not to worry about this sort of question any more, since you can find the best solution in this website--our Chrome-Enterprise-Administrator Training Materials. With our continued investment in technology, people and facilities, the future of our company has never looked so bright. There are so many advantages of our Chrome-Enterprise-Administrator practice test and I would like to give you a brief introduction now.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.

Topic 2	<ul style="list-style-type: none"> • Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 3	<ul style="list-style-type: none"> • Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 4	<ul style="list-style-type: none"> • Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 5	<ul style="list-style-type: none"> • Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.

Our product boasts many merits and high passing rate. Our products have 3 versions and we provide free update of the Chrome-Enterprise-Administrator exam torrent to you. If you are the old client you can enjoy the discounts. Most important of all, as long as we have compiled a new version of the Chrome-Enterprise-Administrator exam questions, we will send the latest version of our Chrome-Enterprise-Administrator Exam Questions to our customers for free during the whole year after purchasing. Our product can improve your stocks of knowledge and your abilities in some area and help you gain the success in your career.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which option is a security event that Google Chrome captures?

- A. User inactivity
- B. Unauthorized file downloads
- **C. Malware detection**
- D. Password complexity

Answer: C

Explanation:

Chrome's Safe Browsing feature actively scans web pages, downloads, and extensions for known malware.

When malware is detected, it is reported as a security event. While unauthorized file downloads could be a consequence of a security issue, Chrome's direct detection focuses on the malware itself. Password complexity is a setting for password management, and user inactivity is a system or application-level event, not a direct security event captured by Chrome in the same way as malware detection.

NEW QUESTION # 47

An organization has a compatibility issue with an internal website after the latest Chrome update. The decision is made to revert any updates to the working version and stop Chrome from updating beyond the working version. For security, Chrome needs to continue updating older versions to the latest compatible version. Which configuration would an administrator set?

- A. Update to extended stable channel
- **B. Target version and rollback**
- C. Auto update check period
- D. Google Updater policy precedence

Answer: B

Explanation:

To pin Chrome to a specific working version and prevent upgrades beyond it while still allowing updates within that major version for security patches, the "Target version and rollback" policy is the appropriate choice. This allows administrators to specify a target version and potentially roll back if issues arise, while still receiving critical security updates within that targeted version.

NEW QUESTION # 48

Users in the organization report that browsers force a restart after a new update has been downloaded, which interrupts their work day. What could an engineer do to improve the experience while maintaining security?

- A. Set the auto update check policy to occur during core work hours
- B. Add a quiet period to the Relaunch notification
- **C. Create a relaunch window in Relaunch notification**
- D. Change Chrome browser updates to only occur when a user checks

Answer: C

Explanation:

To minimize disruption while ensuring updates are applied, an engineer can configure a "Relaunch window" in the Relaunch notification settings. This allows users to be prompted to restart within a specific timeframe that is less likely to interrupt their critical work hours, giving them more control over when the restart occurs after an update. Disabling automatic updates (option A) would compromise security. Adding a quiet period (option B) only suppresses notifications, not the forced restart. Setting the auto-update check policy to occur during core work hours (option C) affects when updates are downloaded, not when the restart occurs.

NEW QUESTION # 49

What is the schedule for Chrome stable channel major releases?

- **A. Every 28 days (every four weeks)**
- B. Once a quarter (every three months)
- C. Whenever new features are added
- D. The second Tuesday of every month

Answer: A

Explanation:

The Chrome release cycle for the Stable channel is approximately every four weeks. This consistent schedule allows administrators to anticipate and plan for new feature deployments and potential compatibility testing.

While security updates can occur more frequently and are often released on Tuesdays, major version updates follow this roughly monthly cadence.

NEW QUESTION # 50

An organization experiences a recent surge in account takeovers and suspicious activity. Upon investigation, a security team discovers that employees are falling victim to infostealer malware specifically designed to target Chrome browser cookies. This malware is spreading through phishing emails and compromised websites, and it is capable of stealing session cookies, login credentials, and other sensitive information stored in the browser. Which measure can an administrator implement using Chrome Enterprise Core to mitigate the risks posed by cookie theft?

- A. Block the use of third-party cookies
- B. Disallow Chrome Sync and Require Incognito mode
- C. Invalidate user's session cookies and tokens by resetting the sign-in cookies from the Google Admin console
- **D. Require Enhanced Safe Browsing and enable Application Bound Encryption**

Answer: D

Explanation:

To combat cookie theft from infostealer malware, requiring "Enhanced Safe Browsing" provides proactive protection against malicious websites and downloads that might distribute such malware. Enabling "Application Bound Encryption" adds an extra layer of security to cookies and other sensitive data stored by Chrome, making them harder for malware to use even if stolen. Blocking third-party cookies (option A) can improve privacy but doesn't directly prevent malware from stealing first-party session cookies. Invalidating existing cookies (option C) is a reactive measure and doesn't prevent future theft. Disallowing Chrome Sync and requiring Incognito mode (option D) changes user behavior but doesn't inherently protect against malware on the local machine.

NEW QUESTION # 51

.....

Desktop Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) practice test software is the first format available at TorrentVCE. This format can be easily used on Windows PCs and laptops. The Google Chrome-Enterprise-Administrator practice exam software works without an internet connection, with the exception of license verification.
