BraindumpsPrep will also provide you with up to 365 days of free exam questions updates. Free demo of ChromeOS-Administrator Dumps PDF allowing you to try before you buy and one-year free update will be allowed after purchased.

## Google Professional ChromeOS Administrator Exam Sample Questions (Q106-Q111):

### NEW QUESTION # 106

How should you generate a custom admin role?

- A. Add user to security admin group
- B. Set privileges on the user directly
- C. Add user to admin role OU
- D. **Create admin role and assign privileges**

**Answer: D**

Explanation:

To create a custom admin role in the Google Admin console, you need to create the role and then assign the required privileges. This method allows for precise control over what the delegated admin can manage, adhering to the principle of least privilege.

Verified Answer from Official Source:

The correct answer is verified from the Google Admin Console Roles and Permissions Guide, which explains the process of creating and assigning custom roles.

"To create a custom admin role, go to Admin Console > Admin roles, create a new role, and assign the necessary privileges."

Creating a custom role is essential when you need specific permissions to be delegated without granting full admin access, ensuring both security and operational efficiency.

Objectives:

- \* Implement role-based access control (RBAC).
- \* Delegate admin tasks securely.

**NEW QUESTION # 107**

Help Desk administrators need a limited set of privileges to perform actions in the Google Admin console.

How should an administrator grant these permissions while conforming to the practice of least privilege?

- A. Grant service desk administrators the Services Admin Role
- B. Create a Service Desk Group and add Service Desk admins to the group
- C. **Create a new custom admin role and assign**
- D. Allow Help Desk administrators full access to manage users

**Answer: C**

Explanation:

\* Granular Control: It allows you to select the specific permissions needed for the Help Desk administrators. This ensures they can do their job without having excessive access that could be misused.

\* Flexibility: You can easily adjust the permissions later if the Help Desk's responsibilities change.

\* Auditing: The Google Admin console tracks changes made by each role, making it easier to identify the source of any unauthorized actions.

\* How to Create a Custom Admin Role:

\* Go to the Google Admin console.

\* Navigate to Admin roles.

\* Click Create new role.

\* Give the role a descriptive name (e.g., "Help Desk Support").

\* Carefully select the privileges the Help Desk needs (e.g., reset passwords, manage user accounts, view device information).

\* Assign the role to the Help Desk administrators.

Why Other Options Are Less Ideal:

\* A. Service Desk Group: Groups are primarily for organization and don't provide granular permission control.

\* C. Services Admin Role: This role has broader permissions than what a Help Desk typically needs, violating the PoLP.

\* D. Full Access: This grants excessive privileges and significantly increases the risk of accidental or intentional misuse.

**NEW QUESTION # 108**

An admin is setting up third-party SSO for their organization as the super admin. When they test with their account, they do not see the SSO screen.

What is causing this behavior?

- A. Third-party SSO is not enabled
- B. The account is in the wrong OrgUnit
- C. **Super admin bypassed the third-party**
- D. SSO settings are misconfigured

## Answer: C

Explanation:

Super administrators in Google Workspace have special privileges that allow them to bypass certain security features, including third-party SSO. This is to ensure that they can always access the Admin console for troubleshooting or critical changes, even if the SSO system is malfunctioning. Therefore, when a super admin tests third-party SSO, they won't be prompted with the SSO login screen, but will directly access the console using their Google credentials.

## NEW QUESTION # 109

How would you deploy a Progressive Web Application to all managed user accounts?

- A. Set up Chrome Imprivata shared apps & extensions to force-install the Progressive Web Application URL
- B. Open "Additional Google services" to force-install the Progressive Web Application URL
- **C. Force-install the Progressive Web Application URL in the "Chrome Apps & extensions" page**
- D. Go to "User & Browser Settings" and add the Progressive Web Application URL in the "Legacy Browser Support" site list

## Answer: C

## NEW QUESTION # 110

How should you use Chrome Remote Desktop from the Google Admin console to connect a user?

- **A. Find the device and click remote desktop**
- B. Open Chrome Remote Desktop and type the device serial number
- C. Open Chrome Remote Desktop and type the user's username
- D. Find the user account and click remote desktop

## Answer: A

Explanation:

To remotely access a user's ChromeOS device through the Admin console, you must find the specific device and click on the remote desktop option. This approach ensures that you are connecting to the correct managed device associated with the user.

Verified Answer from Official Source:

The correct answer is verified from the Google Admin Console Remote Access Guide, which details the procedure to initiate a remote session.

"To access a ChromeOS device remotely, navigate to Devices > Chrome > Devices in the Admin console, find the specific device, and click 'Remote Desktop'." This method helps ensure accurate device management and support without needing personal user credentials or serial numbers.

Objectives:

- \* Provide remote assistance efficiently.
- \* Use the Admin console for remote device management.

## NEW QUESTION # 111

.....

The students can give unlimited tests to track the performance of their last given tests in order to see their mistakes and try to avoid them while giving the final test. Customers of BraindumpsPrep will receive updates till 1 year after their purchase. Anyone can try a free demo of the Professional ChromeOS Administrator Exam (ChromeOS-Administrator) practice material before making purchase.
