L3M6 Study Practice Guide Give Customers Best Socially Responsible Warehousing and Distribution Exam Materials

CIPS L3M6 Exam provided by PDFDumps is of the highest quality, and it enables participants to pass the exam on their first try. For successful preparation, it is essential to have good CIPS L3M6 exam dumps and to prepare questions that may come up in the exam. PDFDumps helps candidates overcome all the difficulties they may encounter in their exam preparation. To ensure the candidates' satisfaction, PDFDumps has a support team that is available 24/7 to assist with a wide range of issues.

CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q26-Q31):

NEW QUESTION # 26

_____ logistics is the process of minimizing damage to the environment due to the logistics operations of an organization.

- A. Good
- **B. Green**
- C. Sensible
- D. Intelligent

Answer: B

Explanation:

Green Logistics refers to strategies that minimize environmental damage from logistics operations (e.g., transport, warehousing). The CIPS L3M6 module defines it as optimizing supply chains for sustainability-using low-emission vehicles, efficient routing, or renewable energy in warehouses. Unlike "good" (vague), "intelligent" (tech-focused), or "sensible" (practical but nonspecific), "green" explicitly ties to environmental goals, a core concept in LO2. For instance, switching to electric delivery vans exemplifies green logistics by cutting CO2 emissions.

NEW QUESTION # 27

Which of the following are the main man-made sources of pollution?

- A. Coal-powered plants and burning wood
- **B. All the above**
- C. Toxic gases, such as sulphur dioxide and nitrogen oxide from industries
- D. Greenhouse gas emissions from moving vehicles

Answer: B

Explanation:

Major man-made pollution sources include:

- * A. Coal Plants/Wood Burning: Emit CO2, particulates, and sulphur dioxide, degrading air quality.
- * B. Vehicle Emissions: CO2 and nitrous oxides from transport contribute to greenhouse gases.
- * C. Industrial Gases: Sulphur dioxide and nitrogen oxide from factories pollute air and water.

The CIPS L3M6 module identifies these as key contributors to environmental degradation, impacting supply chains (e.g., energy for warehousing, transport logistics). All are correct, reflecting LO2's broad pollution scope.

NEW QUESTION # 28

Healthy diversity in the supply chain, e.g., elements from different countries or diversity in terms of the ethnic and cultural backgrounds of the employees, can bring benefits to an organization; however, there could be cultural barriers or difficulties that arise due to working in different time zones.

- A. FALSE
- **B. TRUE**

Answer: B

Explanation:

Diversity in the supply chain-geographical, cultural, or ethnic-can enhance innovation, resilience, and market reach, benefiting organizations. However, it also introduces challenges such as cultural misunderstandings or logistical issues from differing time zones. The CIPS L3M6 module recognizes these dual aspects, advocating for strategies to manage diversity effectively as part of sustainable procurement and CSR.

Reference:

NEW QUESTION # 29

Organisations should also design for the recovery of waste in addition to the disposal of packaging from domestic and commercial waste.

- A. FALSE
- **B. TRUE**

Answer: B

Explanation:

Designing for waste recovery (e.g., through recycling or reuse) alongside proper disposal is a key aspect of socially responsible packaging. The CIPS L3M6 syllabus advocates for systems that minimize landfill use and promote circular economy principles, making this statement true.

Reference:

NEW QUESTION # 30

The use of automatic equipment to perform activities that were previously done by people, e.g., storing and picking orders, is known as what?

- A. Aviation
- B. Arbitration
- **C. Automation**
- D. Assimilation

Answer: C

Explanation:

Automation refers to using technology (e.g., AGVs, robotics) to replace human labor in tasks like storing and picking orders, improving efficiency and safety. The CIPS L3M6 syllabus identifies automation as a key trend in modern warehousing, making this the correct answer.
