

CIPS L3M6 Reliable Dump, Latest L3M6 Exam Question

CIPS L4M1 - Question & Answer Past exam questions latest 2023/2023

Q1. Outline FIVE differences between purchasing goods and purchasing services.
Answer - 1. Goods are tangible, services are intangible;
2. Services cannot be separated from their supplier;
3. Heterogeneity; goods are usually uniform in nature while services are unique at each delivery
4. Services 'perish' immediately on delivery whereas goods can be stored until required
5. Products are easier to specify, being tangible

Q2. Explain THREE circumstances in which a competitive tendering exercise might not be the best approach to making a purchase. Answer - 1. Urgency
2. Commercial confidentiality or national security (e.g. military organisations);
3. Value of the purchase;
4. Production costs cannot be measured accurately;
5. Price is not the only criterion for supplier selection and contract award
6. Intellectual Property Rights and monopoly

Q2. Describe TWO e-sourcing tools and their use in procurement and supply.
Answer - 1. E-Catalogues
2. E-Tendering
3. E- Auction
4. Reverse Auctions
5. Online supplier evaluation data

Q3. Explain the role of a shared services unit (SSU). Answer - SSUs reflect a desire to centralise and share services
The shared service provider becomes a dedicated provider of services such as; finance, HR, IT and procurement which continue to be provided internally
An SSU manages costs and quality SLAs to demonstrate value for money.
An SSU's benefits may be summarised as:

- cost effective internal service;
- liaison with its customers;
- anticipating future demand;
- employing resources and providing higher levels of service more cost effectively than if they were provided by a department or an external provider.

Q3. A manufacturer of electrically powered tools for the engineering industry consists of four separate business units, each of which undertakes its own purchasing activities.

BraindumpsPass is a wonderful study platform that can transform your effective diligence in to your best rewards. By years of diligent work, our experts have collected the frequent-tested knowledge into our L3M6 exam materials for your reference. So our L3M6 Practice Questions are triumph of their endeavor. I can say that no one can know the L3M6 study guide better than them and our quality of the L3M6 learning quiz is the best.

CIPS L3M6 Exam Syllabus Topics:

Topic	Details
Topic 1	• Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.

Topic 2	• Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.
Topic 3	• Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.
Topic 4	• Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.

Latest L3M6 Exam Question, L3M6 Test Registration

It is universally accepted that in this competitive society in order to get a good job we have no choice but to improve our own capacity and explore our potential constantly, and try our best to get the related L3M6 certification is the best way to show our professional ability, however, the exam is hard nut to crack and there are so many L3M6 Preparation questions related to the exam, it seems impossible for us to systematize all of the key points needed for the exam by ourselves.

CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q126-Q131):

NEW QUESTION # 126

Physical vibration is transmitted through the ground as structurally borne noise or as airborne noise.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Physical vibrations from transport/industry transmit as structurally borne noise (e.g., ground shaking from trains) or airborne noise (e.g., sound waves from engines). The CIPS L3M6 module explains this dual propagation in LO2, impacting buildings and people, necessitating mitigation like insulation-a true statement.

Reference:

NEW QUESTION # 127

Environmental sustainability is only promoted at the national level.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

False. The CIPS L3M6 syllabus highlights sustainability promotion at multiple levels-local, national, regional, and international (e.g., UN agreements). Limiting it to national efforts ignores global CSR frameworks.

Reference:

NEW QUESTION # 128

When monitoring CSR in the supply chain, procurement teams should focus on investigating low-risk suppliers first, not ones from industries that are known to face particular challenges, for example, fuels, energy and power, chemicals, plastics, and food.

- A. TRUE
- **B. FALSE**

Answer: B

Explanation:

Effective CSR monitoring prioritizes high-risk suppliers, particularly those in industries like fuels, energy, chemicals, plastics, and food, which are prone to environmental, labour, or ethical challenges. Focusing on low-risk suppliers first would be inefficient and fail to address critical vulnerabilities. The CIPS L3M6 module advocates a risk-based approach to supply chain monitoring, targeting areas with the greatest potential for CSR issues.

Reference:

NEW QUESTION # 129

Which of the following warehouse and store impacts on the environment would you be considering by carrying out risk assessments to identify hazards that could potentially cause harm, and putting measures in place to reduce risk?

- A. Noise pollution
- B. Vibration
- **C. Accidents/risks**
- D. Visual intrusion
- E. Land take

Answer: C

Explanation:

Accidents/risks (A) involve identifying and mitigating hazards in warehouses, a focus of the CIPS L3M6 syllabus under CSR. Land take (B), noise pollution (C), vibration (D), and visual intrusion (E) are separate impacts not directly tied to risk assessments. CSR ensures safe operations to protect workers and the environment.

Reference:

NEW QUESTION # 130

Sound is typically described in terms of the loudness and the pitch of the wave. Loudness is measured in units known as what?

- A. Decimals
- B. Dibbles
- C. Doubles
- **D. Decibels**

Answer: D

Explanation:

Loudness is measured in decibels (dB), a logarithmic unit reflecting sound intensity. The CIPS L3M6 module uses this in LO2 to assess noise pollution-e.g., 85 dB is a workplace safety limit. Other options are incorrect (decimals are numbers, dibbles/doubles are fictitious), making "decibels" the standard term.
