The purchase process of our L6M9 question torrent is very convenient for all people. In order to meet the needs of all customers, our company is willing to provide all customers with the convenient purchase way. If you buy our L6M9 study tool successfully, you will have the right to download our L6M9 Exam Torrent in several minutes, and then you just need to click on the link and log on to your website's forum, you can start to learn our L6M9 question torrent. At the same time, we believe that the convenient purchase process will help you save much time.

CIPS Supply Network Design Sample Questions (Q37-Q42):

NEW QUESTION # 37

ZYX Ltd creates products to meet customer demands. Each product created is unique to the customer's specification. What is the name of the workflow pattern used by ZYX Ltd?

- A. Configured to order
- B. Engineered to order
- C. Made to order
- D. Produced to order

Answer: B

Explanation:

* Engineered to order (ETO): Each product is uniquely designed based on customer specifications.

* Made to order (MTO): The same product is made only when there is a demand.

* Configured to order (CTO): A hybrid approach where customers choose from predefined configurations (e.g., furniture with different color options).

* Produced to order: This is not a standard term for this type of workflow.

Since ZYX Ltd creates products that are uniquely specified by each customer, engineered to order (ETO) is the correct answer. (See p.205)

NEW QUESTION # 38

Who are the four business players in the Value Net? Select ALL that apply.

- A. Distributor
- B. Complementor
- C. Customer
- D. Competitor
- E. Buyer
- F. Supplier

Answer: B,C,D,F

Explanation:

The Value Net consists of suppliers, customers, competitors, and complementors. Unlike a supply chain, which focuses on material and information flow, the Value Net is about creating business value.

* Supplier: Provides goods/services

* Customer: Purchases goods/services

* Competitor: Competes in the same market

* Complementor: A business that enhances your product/service offering

Buyer and distributor are not primary players in the Value Net. (See LO 1.2, p.31)

NEW QUESTION # 39

The operations department of ABC Ltd has recently launched a new product. The product is manufactured within a large factory and then sent to retailers for sale. The department has a system in place which details the components required for the product and the quantities required to fulfil customer demand. The system works online and links to other areas of the business including HR and finance.

So far, several large orders have been placed for the product from different retailers. The Chief Operations Officer (COO) has decided to programme the completion of the orders based on when the orders were placed.

The benefit of this strategy is that it will give each customer a similar lead time. Thus far no buffer stock has been created as products are only created when orders are received.

Three teams are required to make the product and the product flows from team one to team two to team three, each team adding a component to the product. Unfortunately, team two are short staffed and are completing their work at a slower rate than the other two teams. This is a huge consideration for the COO as it will impact upon the capacity of the organisation.

The retailers have all signed contracts with ABC Ltd and the COO is extremely happy that they are long term contracts. Contract 1 is with retailer X and the price is set for three years. Contract 2 is with retailer Y and is a five year contract where the price will be reviewed annually in line with CPI. Contract 3 has a variable pricing mechanism based on the volume of products ordered.

What is the nature of the COO's consideration?

- A. Variance analysis
- B. Push technique
- C. Theory of Constraints
- D. Corporate strategy

Answer: C

Explanation:

This is an issue related to the Theory of Constraints, as Team 2 is the bottleneck affecting overall production efficiency. The Theory of Constraints focuses on identifying and managing the most critical limitation in a system. (See LO 3.3)

NEW QUESTION # 40

Which of the following are Porter's strategies that can help an organisation create competitive advantage in the marketplace? Select ALL that apply

- A. Become an organisation that is meaningfully different from competitors
- B. Ensure a large product range
- C. Provide exceptional customer service
- D. Become a specialised provider
- E. Be a low-cost provider

Answer: A,D,E

Explanation:

Porter's three strategies are low-cost, differentiation, and niche. These options are just worded slightly differently but align with Porter's competitive strategies. (See p.151)

NEW QUESTION # 41

Scenario:

Five manufacturing organisations use different order prioritisation methods and workflow patterns. Each company follows a unique strategy for order processing and workflow structure.

For each organisation, select the correct Prioritisation Method and Pattern of Workflow.

Organisation	Prioritisation Method (Drag & Drop Options)	Pattern of Workflow (Drag & Drop Options)
Organisation 1	(Drop here)	(Drop here)
Organisation 2	(Drop here)	(Drop here)
Organisation 3	(Drop here)	(Drop here)
Organisation 4	(Drop here)	(Drop here)
Organisation 5	(Drop here)	(Drop here)

Prioritisation Method	Pattern of Workflow
Earliest Due Date	Make to Order
Similar Process	Configure to Order
Longest Processing Time	Engineer to Order
First In-First Out	Batch Production
HR Skill Requirement	Make to Stock

Answer:

Explanation:

Organisation	Prioritisation Method (Drag & Drop Options)	Pattern of Workflow (Drag & Drop Options)
Organisation 1	Earliest Due Date	Make to Order
Organisation 2	Similar Process	Configure to Order
Organisation 3	Longest Processing Time	Engineer to Order
Organisation 4	First In-First Out	Batch Production
Organisation 5	HR Skill Requirement	Make to Stock

Prioritisation Method	Pattern of Workflow
Earliest Due Date	Make to Order
Similar Process	Configure to Order
Longest Processing Time	Engineer to Order
First In-First Out	Batch Production
HR Skill Requirement	Make to Stock
