ServiceNow is a cloud-based platform that provides IT service management (ITSM) and digital workflows for businesses. One of the key areas of ServiceNow is Hardware Asset Management (HAM), which helps organizations to manage their hardware assets efficiently. This includes tracking and managing hardware assets throughout their lifecycle, from procurement to retirement. ServiceNow offers a Certified Implementation Specialist (CIS) certification in HAM for professionals who want to demonstrate their expertise in this area.

So know more about our CIS-HAM study guide right now!

ServiceNow Certified Implementation Specialist - Hardware Asset Management Sample Questions (Q114-Q119):

NEW QUESTION # 114

To utilize the contract rate cards features, which plugin is required to be activated?

- A. Cost Management
- B. Rate Management

- C. Financial Management
- D. Contract Management

Answer: A

Explanation:

- * To utilize the contract rate cards features, you need to activate the Rate Management plugin, which provides the ability to define and manage rates for various types of costs and expenses¹.
- * The contract rate cards features allow you to capture operating costs by generating expense lines representing the cost of a contract. You can associate a contract to certain assets and costs of those assets are tied to the contract. This is similar to a rate card cost, except the contract contains all the costs².
- * The other plugins are not required to use the contract rate cards features. The Financial Management plugin provides the ability to track and manage the financial performance of your IT services³. The Contract Management plugin provides the ability to create and manage contracts for assets, services, and vendors⁴. The Cost Management plugin provides the ability to track and allocate costs for configuration items, tasks, and projects⁵. References: 1: Rate Management 2: Cost Management - ServiceNow Elite 3: Financial Management 4: Contract Management 5: Cost Management

NEW QUESTION # 115

What core table requires migration when extending ITSM Asset Management with Hardware Asset Management?

- A. No migration is required
- B. **cmdb_model_category**
- C. alm_hardware
- D. alm_asset

Answer: B

NEW QUESTION # 116

Classes are represented as tables in the ServiceNow database. Which is the base asset class?

- A. cmdb_asset
- B. cmdb_hardware
- C. alm_hardware
- D. **alm_asset**

Answer: D

Explanation:

- * Classes are represented as tables in the ServiceNow database that define the attributes and relationships of a specific type of record¹
- * The base asset class is the alm_asset table, which contains the common fields and properties for all types of assets, such as hardware, software, consumable, etc.²
- * The alm_asset table is extended by other asset classes, such as alm_hardware, alm_software, alm_consumable, etc., which add more specific fields and properties for each asset type²
- * The cmdb_asset table is not a class, but a view that joins the alm_asset table and the cmdb_ci table, which is the base configuration item (CI) class³
- * The cmdb_hardware table is a CI class, not an asset class, that contains the common fields and properties for all types of hardware CIs, such as computers, devices, network equipment, etc.⁴ References: 1: Tables and Classes - ServiceNow 2: Asset [alm_asset] table - ServiceNow 3: Asset and Configuration Item [cmdb_asset] view - ServiceNow 4: Hardware [cmdb_ci_hardware] class - ServiceNow

NEW QUESTION # 117

Select the three main components of the data certification process. (Choose three.)

- A. Certify the certification
- B. **Create the certification schedule**
- C. **Run the certification**

- D. Create the certification filter
- E. Assign the certification tasks

Answer: B,C,D

NEW QUESTION # 118

What is the impact of a customer opting out of the ServiceNow Content Service for specific models?

- A. Unrecognized data doesn't get sent to the ServiceNow Content Service and the customer doesn't receive Content Library updates
- B. Unrecognized data is sent to the ServiceNow Content Service, but is now encrypted
- C. Unrecognized data doesn't get sent to the ServiceNow Content Service
- D. Customer doesn't receive Content Library updates

Answer: C

Explanation:

According to the ServiceNow Hardware Asset Management documentation, the ServiceNow Content Service is a cloud-based service that provides content updates for hardware models, such as manufacturer, model category, and lifecycle information. The ServiceNow Content Service also collects unrecognized data from customers, such as new or custom hardware models, to improve the content quality and coverage. Customers can opt out of sending unrecognized data to the ServiceNow Content Service for specific models, but this will also prevent them from receiving content updates for those models.

NEW QUESTION # 119

.....
