And our 100-160 study guide has three different versions: PDF, Soft and APP versions to let you study in varied and comfortable ways.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q120-Q125):

NEW QUESTION # 120

Which regulation is aimed at protecting the privacy and security of personally identifiable information (PII) within the European Union?

- A. BYOD
- B. HIPAA
- C. PCI DSS
- **D. GDPR**

Answer: D

Explanation:

The General Data Protection Regulation (GDPR) is a regulation that aims to protect the privacy and security of personally identifiable information (PII) of individuals within the European Union (EU). It provides guidelines and requirements for data processing, consent, transparency, and breach notification, among other aspects.

NEW QUESTION # 121

How can cybersecurity reports contribute to incident response procedures?

- A. By identifying potential attack vectors.
- B. By establishing communication channels with law enforcement agencies.
- **C. By providing real-time threat intelligence.**
- D. By suggesting countermeasures.

Answer: C

Explanation:

Cybersecurity reports can contribute to incident response procedures by providing real-time threat intelligence. These reports analyze and share information about emerging threats, attack trends, and new vulnerabilities. By incorporating the findings from these reports into their incident response plans, organizations can stay ahead of attackers and improve their ability to detect, mitigate, and respond to potential incidents effectively.

NEW QUESTION # 122

Which protocol is used to assign IP addresses to devices on a network?

- A. TCP
- B. ICMP
- **C. DHCP**
- D. UDP

Answer: C

Explanation:

DHCP (Dynamic Host Configuration Protocol) is used to assign IP addresses dynamically to devices on a network. Instead of manually configuring IP addresses on each device, DHCP allows for automated IP address allocation, making network administration more efficient.

NEW QUESTION # 123

Which of the following is a good practice for updating documentation in a secure manner?

- A. Allowing multiple users to directly edit the documentation
- B. Storing the documentation on a publicly accessible server
- **C. Implementing version control and access controls**
- D. Making updates without keeping a revision history

Answer: C

Explanation:

To update documentation securely, it is advisable to implement version control mechanisms that track changes and allow reverting to previous versions if needed. Additionally, access controls should be implemented to ensure that only authorized users can modify the documentation, reducing the risk of unauthorized changes.

NEW QUESTION # 124

Which technology allows on-demand access to shared pools of configurable computing resources over a network?

- A. DMZ
- B. Proxy
- **C. Cloud**
- D. Virtualization

Answer: C

Explanation:

Cloud computing refers to the delivery of on-demand computing resources, including servers, storage, databases, networking, software, and analytics, over the internet. It provides organizations with the ability to access and use shared pools of configurable computing resources quickly and easily, without the need for extensive upfront infrastructure investments. Cloud computing offers scalability, cost-efficiency, and flexibility, making it an essential component of modern IT environments.

NEW QUESTION # 125

.....
