To pass the exam, a candidate must achieve a minimum passing score, which is determined by Cisco.

Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q353-Q358):

NEW QUESTION # 353

What is the difference between a threat and a risk?

- A. Risk represents the known and identified loss or danger in the system
- B. Risk represents the nonintentional interaction with uncertainty in the system
- C. Threat represents a potential danger that could take advantage of a weakness in a system
- D. Threat represents a state of being exposed to an attack or a compromise, either physically or logically.

Answer: C

Explanation:

A threat represents a potential danger that could exploit a weakness in a system while risk is associated with the potential impact or loss that could occur if a threat exploits a vulnerability in the system. So, option A which states "Threat represents a potential danger that could take advantage of a weakness in a system" is correct. Reference:= Cisco Certified CyberOps Associate Overview

NEW QUESTION # 354

Drag and drop the data source from the left onto the data type on the right.

Wireshark	session data
NetFlow	alert data
server log	full packet capture
IPS	transaction data

Answer:

Explanation:

Wireshark	NetFlow
NetFlow	IPS
server log	Wireshark
IPS	server log

NEW QUESTION # 355

An engineer needs to configure network systems to detect command and control communications by decrypting ingress and egress perimeter traffic and allowing network security devices to detect malicious outbound communications. Which technology should be used to accomplish the task?

- A. digital certificates
- B. cipher suite
- C. static IP addresses
- D. signatures

Answer: A

Explanation:

Digital certificates are electronic documents that use public key cryptography to verify the identity and authenticity of the sender and the receiver of encrypted communications. Digital certificates are issued and signed by trusted entities called certificate authorities (CAs), and they contain information such as the public key, the name, and the expiration date of the certificate. Digital certificates enable network security devices to decrypt perimeter traffic and inspect it for command and control communications or other malicious activity. NEW QUESTION # 356

What are two social engineering techniques? (Choose two.)

- A. privilege escalation
- B. phishing
- C. DDoS attack
- D. pharming
- E. man-in-the-middle

Answer: B,D

Explanation:

Social engineering techniques often involve manipulating individuals into divulging confidential information or performing actions that compromise security. Phishing involves sending fraudulent messages (often emails) that appear to be from reputable sources with the goal of stealing sensitive data or installing malware. Pharming redirects the traffic of a legitimate website to another fraudulent website without the user's knowledge, aiming to collect the user's credentials. Reference:= Cisco Cybersecurity Source Documents

NEW QUESTION # 357

A SOC analyst is investigating an incident that involves a Linux system that is identifying specific sessions. Which identifier tracks an active program?

- A. process identification number
- B. runtime identification number
- C. application identification number
- D. active process identification number

Answer: A

NEW QUESTION # 358

.....

DumpsQuestion's experts have simplified the complex concepts and have added examples, simulations and graphs to explain whatever could be difficult for you to understand. Therefore even the average exam candidates can grasp all study questions without any difficulty. Additionally, the 200-201 Exam takers can benefit themselves by using our testing engine and get numerous real exam like practice questions and answers.
