DOWNLOAD the newest DumpStillValid 300-435 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1_uMSb_V_boZmhCTIq7aYTni02rY2H0IK

It was never so easy to make your way to the world's most rewarding professional qualification as it has become now! DumpStillValid' 300-435 practice test questions answers are the best option to secure your success in just one go. You can easily answer all exam questions by doing our 300-435 exam dumps repeatedly. For further sharpening your skills, practice mock tests using our 300-435 Brain Dumps Testing Engine software and overcome your fear of failing exam. Our Automating and Programming Cisco Enterprise Solutions dumps are the most trustworthy, reliable and the best helpful study content that will prove the best alternative to your time and money.

To prepare for the Cisco 300-435 exam, candidates can opt for various training programs, study materials, and practice exams. Cisco offers its own training programs, including virtual instructor-led training, e-learning courses, and on-demand courses. Moreover, various third-party training providers offer training courses and study materials to prepare for the exam.

Cisco 300-435 exam tests a candidate's proficiency in programming languages such as Python, JavaScript, and JSON, and their ability to use software development tools such as Git and Docker. 300-435 Exam also evaluates a candidate's understanding of Cisco network programmability foundations, APIs, and automation protocols such as REST and NETCONF. 300-435 exam is suitable for network engineers, software developers, and other IT professionals who want to enhance their skills in network automation and programming. Passing the Cisco 300-435 exam demonstrates a candidate's ability to automate and program complex enterprise solutions using Cisco technologies, making them a valuable asset to any organization.

Do you feel anxiety about your coming 300-435 exam test? Do you want to find the valid and latest material for the 300-435 actual test? DumpStillValid will help you and bring you to the right direction. Firstly, 300-435 free demo is allowable for you to try before you buy. Besides, we will offer you the benefits of 365 days free update. SO, even if the 300-435 Actual Test is changed frequently, you do not worry about it, because our 300-435 training material is updated according to the actual test and can ensure you pass.

Cisco Automating and Programming Cisco Enterprise Solutions Sample

Questions (Q95-Q100):

NEW QUESTION # 95

Which function is available in NETCONF and unavailable in RESTCONF?

- A. Validates the content of a candidate datastore.
- B. Support JSON and data encoding.
- C. Uses the YANG data models to communicate.
- D. Configuration changes are automatically activated.

Answer: A

Explanation:

NETCONF, unlike RESTCONF, allows for the validation of a candidate datastore before it is committed as the running configuration. This feature ensures that any configuration changes are checked for correctness before they can potentially impact the network operation.

NEW QUESTION # 96

What are two characteristics of synchronous calls to APIs? (Choose two.)

- A. They can add perceived latency to your application if data is not received.
- B. They do not block while waiting for the API to be processed.
- C. They can be used only with certain programming languages.
- D. They make your application less portable, so asynchronous calls are preferred.
- E. They block until a response is returned from the servers.

Answer: A,E

NEW QUESTION # 97

Drag and Drop Question

An engineer must receive the BGP routes between two of the Cisco SDWAN Devices. The Python Viptela SDK for Cisco SDWAN must be used. Drag and drop the code snippets from the bottom onto the boxes in the code to create an API call to get BGP routes on Device1 (1.1.1.9) toward Device2 (1.1.1.11). Not all options are used.

```

from vmanage.api.authentication import Authentication
from vmanage.api.monitor_network import MonitorNetwork
import 

vmanage_host = os.environ.get("VMANAGE_HOST")
vmanage_username = os.environ.get("VMANAGE_USERNAME")
vmanage_password = os.environ.get("VMANAGE_PASSWORD")

auth = Authentication(
    host=vmanage_host,
    user=vmanage_username,
    password=vmanage_password,
    validate_certs=False,
).login()

monitor =  (auth, vmanage_host)

response = monitor.get_bgp_routes("")
for route in response:
    if "" in route["nexthop"]:
        print(route)

```

 os.environ

 1.1.1.11

 monitor_network

 MonitorNetwork

 os

 1.1.1.9

Answer:

Explanation:

```
from vmanage.api.authentication import Authentication
from vmanage.api.monitor_network import MonitorNetwork
import os
```

```
vmanage_host = os.environ.get("VMANAGE_HOST")
vmanage_username = os.environ.get("VMANAGE_USERNAME")
vmanage_password = os.environ.get("VMANAGE_PASSWORD")
```

```
auth = Authentication(
    host=vmanage_host,
    user=vmanage_username,
    password=vmanage_password,
    validate_certs=False,
).login()
```

```
monitor = MonitorNetwork(auth, vmanage_host)
response = monitor.get_bgp_routes("1.1.1.9")
for route in response:
    if "1.1.1.11" in route["nexthop"]:
        print(route)
```

os.environ

monitor_network

Explanation:

```
import os
...
monitor = MonitorNetwork(auth, vmanage_host)
response = monitor.get_bgp_routes("1.1.1.9")
if "1.1.1.11" in route["nexthop"]:
```

This code uses the Cisco SD-WAN vManage Python SDK (viptela) to:

Import the os module to retrieve environment variables.

Instantiate the MonitorNetwork object to query route information.

Use get_bgp_routes() for Device1 (1.1.1.9).

Filter the returned routes to find those with a next-hop toward Device2 (1.1.1.11).

NEW QUESTION # 98

What is the best way to specify the location of Python within a script?

- A. #!/scriptname
- B. #!/usr/bin/env bash
- C. #!/usr/local/bin/python
- D. #!/usr/bin/python
- E. #!/usr/bin/env python

Answer: E

NEW QUESTION # 99

Refer to the exhibit.

```
1 {
2   'data':
3     [
4       {
5         'count': 4,
6         'detailsURL': '',
7         'name': 'vEdge Hardware Health',
8         'status': 'error',
9         'statusList':
10          [
11            {
12              'count': 4,
13              'detailsURL': '/dataservice/device/hardwarehealth/detail?state=normal',
14              'message': '4 (normal=4, warning=0,error=0)',
15              'name': 'normal',
16              'status': 'up'
17            }
18          ]
19       }
20     ]
21 }
```

Cisco SD-WAN deployment must be fixed using vManage APIs. A call to vEdge Hardware Health API returns the data in the exhibit (only a portion is shown). If the JSON shown in the exhibit is converted to a Python dictionary named "d", how is the "status" property referenced?

- A. nbvnbvnbhg
- B. d['data'][0]['statusList'][0]['status']
- C. d[data][0][statusList][0][status]
- D. d['data']['statusList']['status']

Answer: B

NEW QUESTION # 100

.....

The pass rate is 98.75%, and we will ensure you pass the exam if you buy 300-435 exam torrent from us. Since the high pass rate, we have received many good feedbacks from candidates. What's more, we pass guarantee and money back guarantee if you fail to pass the exam after purchasing 300-435 Exam Torrent from us. We have online and offline chat service stuff, and they possess the professional knowledge about the 300-435 exam dumps, if you have any questions, just have a chat with them.
