

Cisco 300-620 Certification Questions: Implementing Cisco Application Centric Infrastructure - ActualCollection Ensures you a Easy Studying Experience

BTW, DOWNLOAD part of ActualCollection 300-620 dumps from Cloud Storage: https://drive.google.com/open?id=1nTTEmRuvclBGLVNxBPH_x6ih0d1lm0Jq

All three Cisco 300-620 exam questions formats are easy to use and compatible with all devices, operating systems, and the latest browsers. Now take the best decision for your career and take part in the Implementing Cisco Application Centric Infrastructure 300-620 Certification test and start preparation with Cisco 300-620 PDF Questions and practice tests. ActualCollection offers free updates for 365 days.

Cisco 300-620 Certification Exam is a great way for individuals to demonstrate their expertise in ACI technologies to potential employers. By earning this certification, candidates can showcase their skills and knowledge of ACI technologies and differentiate themselves from other candidates in the job market. Additionally, the certification can help candidates advance their career by opening up new job opportunities and increasing their earning potential.

Exam 300-620 Pass Guide, 300-620 Updated CBT

Our company provide free download and tryout of the 300-620 study materials and update the 300-620 study materials frequently to guarantee that you get enough test bank and follow the trend in the theory and the practice. We provide 3 versions for you to choose thus you can choose the most convenient method to learn. Our 300-620 Study Materials are compiled by the experienced professionals elaborately. Our product boosts many advantages and to gain a better understanding of our 300-620 study materials please read the introduction of the features and the functions of our product as follow.

Cisco 300-620 exam is a valuable certification for IT professionals who wish to demonstrate their expertise in deploying and managing Cisco's ACI infrastructure. 300-620 exam covers a broad range of topics relating to ACI and is an essential prerequisite for CCNP Data Center certification. Through proper preparation and study, IT professionals can achieve success in 300-620 Exam and gain recognition for their skills and knowledge in application-centric infrastructure.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q28-Q33):

NEW QUESTION # 28

An engineer must allow multiple external networks to communicate with internal ACI subnets. Which action should the engineer take to assign the prefix to the class ID of the external Endpoint Group?

- A. Configure subnets with the Import Route Control Subnet flag enabled.
- B. Enable the Export Route Control Subnet for the External Endpoint Group flag.
- C. Enable an L3out with Shared Route Control Subnet.

- D. Configure subnets with the External Subnets for External EPG flag enabled.

Answer: D

Explanation:

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/ACI_Best_Practices/b_ACI_Best_Practices/b_ACI_Best_Practices_chapter_01001.html)

[x/ACI_Best_Practices/b_ACI_Best_Practices/b_ACI_Best_Practices_chapter_01001.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/ACI_Best_Practices/b_ACI_Best_Practices/b_ACI_Best_Practices_chapter_01001.html)

The external subnets for an external EPG are used to define the subnets that should be classified to the external EPG. This policy does not affect routing. It is similar to an Access Control List (ACL) that assigns a prefix to the class id (pcTag) of the external EPG.

NEW QUESTION # 29

A network engineer must integrate VMware vCenter cluster with Cisco ACI. The requirement is for the management traffic of the hypervisors and VM controllers to use the virtual switch associated with the Cisco Application Policy. The EPG called "Vmware-MGMT" with VLAN 300 has been created for this purpose. Which set of steps must be taken to complete the configuration?

- A. Associate the target EPG with the VMM domain with default settings.
Enable Infrastructure VLAN on AAEP used toward VMware hypervisors.
- B. Enable Infrastructure VLAN on AAEP used toward VMware hypervisors.
Associate the target EPG with the VMM domain with default settings.
- C. Enable Infrastructure VLAN on AAEP used toward VMware hypervisors.
Create a static binding in the target EPG toward VMware hypervisors with VLAN 300, untagged access VLAN, and Untagged 802.1P mode.
- D. Add VLAN 300 with static allocation to the VLAN POOL that is used for VMM integration.
Attach the VMM domain to the target EPG with resolution preprovision, mode static, untagged access VLAN, and Port-Encap 300.

Answer: C

Explanation:

To integrate the VMware vCenter cluster with Cisco ACI and ensure that the management traffic of the hypervisors and VM controllers uses the virtual switch associated with the Cisco Application Policy, the following steps must be taken:

Enable Infrastructure VLAN on AAEP used toward VMware hypervisors: This step involves enabling the infrastructure VLAN on the Attachable Access Entity Profile (AAEP) that is used for the VMware hypervisors. This VLAN is used for carrying infrastructure traffic such as management, vMotion, and fault tolerance.

Create a static binding in the target EPG toward VMware hypervisors with VLAN 300: This step involves creating a static binding in the "Vmware-MGMT" EPG for the VMware hypervisors with VLAN 300, setting it as an untagged access VLAN, and using Untagged 802.1P mode. This ensures that the management traffic is correctly tagged and associated with the appropriate EPG.

NEW QUESTION # 30

An engineer needs to deploy a leaf access port policy group in ACI Fabric to support the following requirements:

- * Control the amount of application data flowing into the system
 - * Allow the newly connected device to auto-negotiate link speed with the leaf switch
- Which two ACI policies must be configured to achieve these requirements? (Choose two.)

- A. ingress data plane policing policy
- B. slow drain policy
- C. ingress control plane policing policy
- D. L2 interface policy
- E. link level policy

Answer: A,E

Explanation:

To deploy a leaf access port policy group in ACI Fabric that controls the amount of application data flowing into the system and

The screenshot displays the Cisco APIC interface for creating a new Link Level Policy. The 'Create Link Level Policy' dialog box is open, showing the following fields and options:

- Name:** A text input field with a red asterisk indicating it is required.
- Description:** An optional text input field.
- Alias:** A text input field.
- Auto Negotiation:** A checkbox that is currently checked.
- Speed:** A dropdown menu set to 'inherit'.
- Link debounce interval:** A dropdown menu set to '100'.
- Data Domain:** A dropdown menu set to 'Data-Domain-100-PPG'.
- Inherit:** A checkbox that is currently checked.

The background shows the APIC navigation menu with 'Policies' selected. A table of existing policies is visible on the right side of the interface.

Forwarding	Description
Inherit	Inherit
Inherit	CL91-RS-FEC
Inherit	Inherit
Inherit	Inherit
Inherit	Data-Domain-100-PPG
Inherit	Data-Domain-Mgmt-1G
Inherit	Inherit
Inherit	CL74-FC-FEC
Inherit	disable-FEC
Inherit	Inherit
Inherit	disable-FEC
Inherit	Inherit
Inherit	NOC-User-Interface-Policy

Refer to the exhibit.

```
aaa authentication login fallback
```

Which action should be taken to ensure authentication if the RADIUS servers are unavailable?

- Changing the server priority is not logical answer.

The command "aaa user default-role no-login" means that remote users who do not have a user role cannot login. This means

The "aaa authentication login default" and "aaa authentication login fallback" has identical configuration. The fallback uses

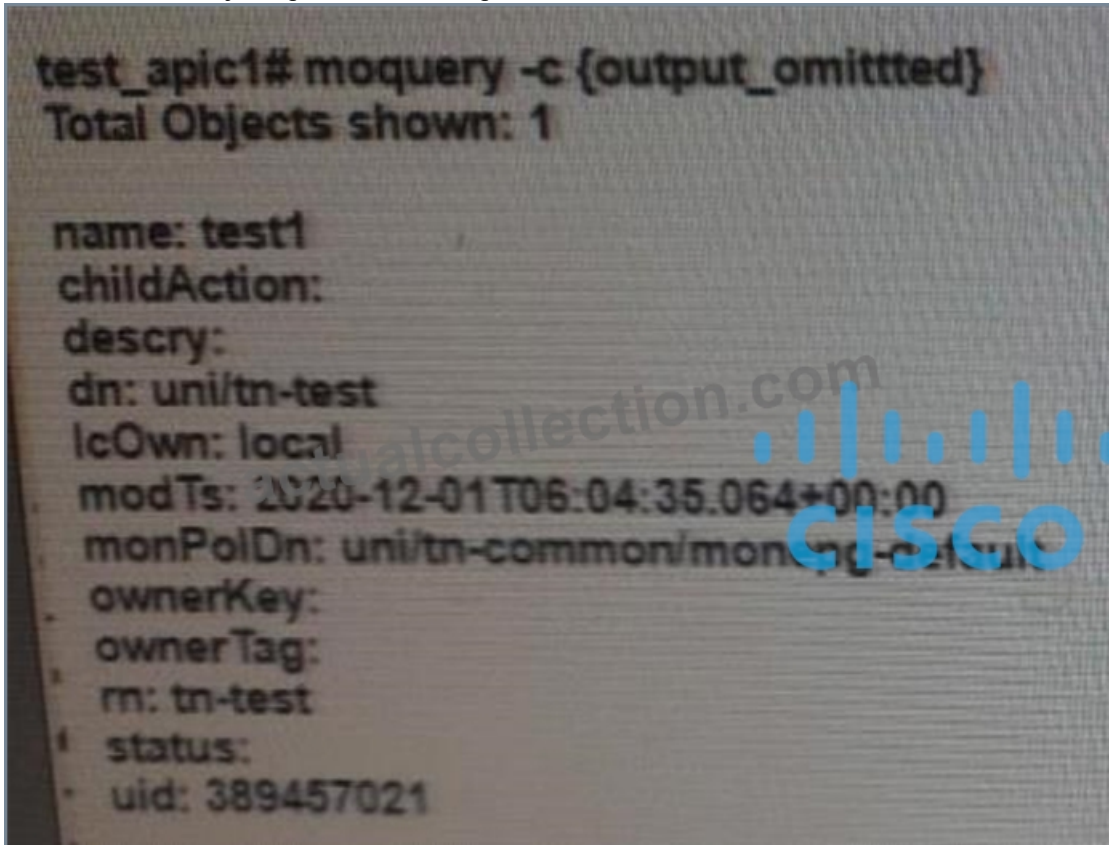

RADIUS server. We should change is to local.

- C. Assign the user to the default role.
- D. Set the fallback login to local.

Answer: D

NEW QUESTION # 32

Which class of ACI object is presented in this output?

- A. Tenant
- B. Bridge Domain
- C. Endpoint
- D. Contract

Answer: D

Explanation:
