- **A. partition of the SIP route pattern**
- **B. destination SIP trunk of the SIP route pattern**
- C. calling party transformation
- D. called party URI transformation
- E. connected party transformation

Answer: A,B

Explanation:

https://www.cisco.com/c/en/us/td/docs/telepresence/tcs/7_1/admin/administration/tcs_7_0/cucm.html

NEW QUESTION # 43

A company with only 15 users needs to have a phone system without deploying dedicated servers for this purpose. Using the local Cisco router with Cisco UCME capabilities, which configuration is needed to support SIP phones?

- A. voice-register ephone
- B. voice-register SIP
- C. voice-register pool
- **D. ephone**

Answer: D

NEW QUESTION # 44

An administrator is configuring an Intercluster Lookup Service between 10 Cisco UCM clusters. Due to security requirements, certificate-based authentication must be used. Due to the deployment size, the administrator wants to avoid manually exchanging certificates between the clusters. Which two steps must be followed to meet these requirements? (Choose two)

- **A. Enable password-based authentication in conjunction with certificate-based authentication.**
- B. Set all clusters to standalone on the ILS configuration page.
- C. Install multiserver CA-signed CallManager certificates on all cluster publishers.
- D. Ensure that the cluster ID for all clusters is the same.
- **E. Install multiserver CA-signed Tomcat certificates on all cluster publishers.**

Answer: A,E
