Dump Cisco 350-601 Collection - 350-601 Study Guides

Choosing Itcertmaster's 350-601 exam training materials is the best shortcut to success. It will help you to pass 350-601 exam successfully. Everyone is likely to succeed, the key lies in choice. Under the joint efforts of everyone for many years, the passing rate of Itcertmaster's Cisco 350-601 Certification Exam has reached as high as 100%. Choosing Itcertmaster is to be with success.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q225-Q230):

NEW QUESTION # 225
Refer to the exhibit.

Which configuration ensure that the cisco Nexus 7000 series switches are the primary devices for LACP?

- A. N7K_A(config-vpc-domain)# system-priority 32768
  N7K_B(config-vpc-domain)# system-priority 32768
- B. N7K_A(config-vpc-domain)# system-priority 100
  N7K_B(config-vpc-domain)# system-priority 200
- C. N7K_A(config-vpc-domain)# role priority 1
  N7K_B(config-vpc-domain)# role priority 2
- D. N7K_A(config-vpc-domain)# system-priority 4000
  N7K_B(config-vpc-domain)# system-priority 4000

Answer: B

Explanation:
To ensure that the Cisco Nexus 7000 series switches are the primary devices for LACP, the system priority needs to be configured with lower values indicating higher priority. In this case, setting N7K_A with a system priority of 100 and N7K_B with a system priority of 200 ensures that N7K_A has a higher priority and becomes the primary device for LACP. The system priority is used in the LACP system ID which determines the LACP priority; the lower the value, the higher the priority.
References: The configuration guidelines for LACP on Cisco devices can be found in the Cisco documentation, which explains the role of system priority in determining the primary device in an LACP setup1. Additionally, the Cisco Data Center Core Technologies study materials provide detailed information on configuring LACP and vPC domain parameters.

NEW QUESTION # 226
Which configuration generates a syslog message when CPU utilization is higher than 60%?

- A. event manager applet HIGH-CPU
  event snmp oid 1.3.6.1.4.1.9.9.109.1.1.1.1.6.1 get-type exact entry-op lt 60 poll-interval 5 action 1.0 syslog priority notifications msg "cpu high"
- B. event manager applet HIGH-CPU
  event snmp oid 1.3.6.1.4.1.9.9.109.1.1.1.1.6.1 get-type next entry-op lt 60 poll-interval 5 action 1.0 syslog priority notifications msg "cpu high"

- C. event manager applet HIGH-CPU
event snmp oid 1.3.6.1.4.1.9.9.109.1.1.1.1.6.1 get-type next entry-op gt 60 poll-interval 5 action 1.0 syslog priority notifications msg "cpu high"
- D. event manager applet HIGH-CPU
event snmp oid 1.3.6.1.4.1.9.9.109.1.1.1.1.6.1 get-type exact entry-op gt 60 poll-interval 5 action 1.0 syslog priority notifications msg "cpu high"

Answer: D

Explanation:

NEW QUESTION # 227
A network engineer is deploying a Cisco All-Flash HyperFlex solution. Which local storage configuration is required for the operating system and persistent logging?

- A. Two solid state drives
- B. One solid state drive
- C. One SATA drive
- D. Two SATA drives

Answer: A

Explanation:
Using persistent logging allows to write logged messages to file(s) on router's flash disk. The advantage is unlike memory buffer (DRAM) contents these files persist when the router reboots (DRAM contents are erased during a reboot.) Hence if you writing to disk it can run the OS and must wait. So 2 disks as a minimum.

NEW QUESTION # 228
An administrator needs to configure an automated policy to shut down a link when a given threshold is exceeded on MDS switch. Which feature needs to be used?

- A. RMON
- B. Call Home
- C. EEM
- D. Scheduler

Answer: C

Explanation:

NEW QUESTION # 229
An engineer must configure the order in which the server attempts to boot from available boot device types using Cisco Integrated Management Controller (Cisco IMC). The engineer must change the boot order configuration during the setup and apply the new requirements multiple times. The requirement is to change the Cisco IMC actual boot order so it is different from the configured boot order. Which setting accomplishes this goal?

- A. Configure the legacy and precision boot order to be mutually exclusive.
- B. Set the boot configuration directly through BIOS.
- C. Apply UEFI Secure Boot for a nonsupported operating system.
- D. Enable the system to boot with the configured boot order.

Answer: D
