Es existiert viele Methoden, mit der Sie sich auf die EXIN CITM Zertifizierungsprüfung vorzubereiten. Unsere Website bietet zuverlässige Prüfungsmaterialien, mit den Sie sich auf die nächste EXIN CITM Zertifizierungsprüfung vorbereiten. Die Lernmaterialien zur EXIN CITM Zertifizierungsprüfung von ITZert enthalten sowohl Fragen als auch Antworten. Unsere Materialien sind von der Praxis überprüfte Software. Wir werden alle Ihren Bedürfnisse zur EXIN CITM Zertifizierung abdecken.

Wenn Sie die Produkte von ITZert benutzen, setzen Sie dann den ersten Fuß auf die Spitze der IT-Branche und nähern Ihrem Traum. Die Quizfragen und Antworten von ITZert können Ihnen nicht nur helfen, die EXIN CITM Zertifizierungsprüfung zu bestehen und Ihre Fachkenntnisse zu konsolidieren. Außerdem bieten wir Ihnen auch einen einjährigen kostenlosen Update-Service.

>> CITM Quizfragen Und Antworten <<

Die seit kurzem aktuellsten EXIN CITM Prüfungsinformationen, 100% Garantie für Ihren Erfolg in der Prüfungen!

In der heutigen wettbewerbsorientierten IT-Branche hat man viele Vorteile, wenn man die EXIN CITM Zertifizierungsprüfung besteht. Mit einem EXIN CITM Zertifikat kann man ein hohes Gehalt erhalten. Menschen, die EXIN CITM Zertifikat erhalten, haben oft viel höheres Gehalt als Kollegen ohne EXIN CITM Zertifikat. Jedoch ist es nicht sehr einfach, die EXIN CITM Zertifizierungsprüfung zu bestehen. So hilft ITZert Ihnen, Ihr Gehalt zu erhöhen.

EXIN EPI Certified Information Technology Manager CITM Prüfungsfragen mit Lösungen (Q42-Q47):

42. Frage

The introduction of a security awareness program has resulted in a quick decrease in security incidents. Eight months later, security incidents are showing a sudden increase, and the blame is put on a non-functioning security awareness program. What is most likely the cause?

- A. Scope of the program is too narrow, not covering all areas of interest
- B. Insufficient budget
- C. Lack of resources for instructor-led sessions
- D. Message materials are few and static, and renewal is not taking place

Antwort: D

Begründung:

Security awareness programs require ongoing engagement to remain effective. If security incidents decrease initially but increase after eight months, the most likely cause is that message materials are few and static, and renewal is not taking place (C). Static content becomes outdated or ignored over time, reducing its impact. Regular updates, new campaigns, and varied delivery methods (e.g., videos, quizzes) are essential to maintain employee awareness and adapt to evolving threats, as per ISO/IEC 27001 or NIST security awareness guidelines.

* Insufficient budget (A): While budget constraints could limit program scope, there's no evidence in the scenario to suggest this is the primary issue.

* Scope too narrow (B): A narrow scope might limit effectiveness initially, but the initial success suggests the scope was adequate; the issue is sustaining engagement.

* Lack of resources for instructor-led sessions (D): Instructor-led sessions are one delivery method, but the core issue is likely outdated content rather than delivery format.

Reference: EPI CITM study guide, under Information Security Management, likely discusses security awareness program maintenance, emphasizing the need for regular content updates. Refer to sections on security awareness or human factors in security.

43. Frage

Users (customers) are complaining about the quality of how problems are being solved. What is the most likely cause?

- A. Poor registration of problems
- B. Lack of budget to manage problems
- C. Errors in priority
- D. Wrong allocation of problems

Antwort: A

Begründung:

In ITIL's problem management process, poor registration of problems (A) is the most likely cause of low-quality problem resolution. Effective problem management requires accurate logging of incidents and problems, including detailed descriptions, to enable proper root cause analysis and resolution. If problems are poorly registered (e.g., incomplete or inaccurate data), it hinders diagnosis and resolution, leading to customer dissatisfaction.

* Wrong allocation of problems (B): Incorrect assignment to teams can delay resolution but is less fundamental than poor registration, which affects the entire process.

* Errors in priority (C): Incorrect prioritization may delay urgent issues, but poor registration impacts resolution quality more directly.

* Lack of budget (D): May limit resources, but the scenario points to process quality, not resource constraints.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's problem management, emphasizing accurate problem logging. Check sections on ITIL problem management or service operation.

44. Frage

During several project meetings, it is discovered that certain team members are not fully aware of, and/or do not understand, the activities for which they are responsible. Which process is most likely to be blamed for this?

- A. Scope management
- B. Communication management

- C. Cost management
- D. Risk management

Antwort: B

Begründung:

Team members' lack of awareness or understanding of their responsibilities points to a failure in communication management(C). According to PMBOK, communication management ensures that project information, including roles, responsibilities, and activities, is effectively communicated to all stakeholders.

Poor communication planning or execution (e.g., unclear task assignments or inadequate briefings) can lead to misunderstandings, as seen in this scenario.

* Risk management (A): Focuses on identifying and mitigating risks, not task communication.

* Cost management (B): Deals with budgeting and cost control, not role clarification.

* Scope management (D): Defines project scope and deliverables, but communication management ensures team members understand their responsibilities within that scope.

Reference: EPI CITM study guide, under Project Management, likely covers PMBOK's communication management processes, emphasizing stakeholder engagement and information distribution. Check sections on project communication or stakeholder management.

45. Frage

During financial year closing, a processing error in a critical financial system occurs. Senior management demands a change to be implemented in order to not further delay the business processes. Which sort of change is applied?

- A. Standard
- B. Normal
- C. Exceptional
- **D. Emergency**

Antwort: D

Begründung:

In ITIL (Information Technology Infrastructure Library), an emergency change is implemented to address urgent issues that significantly impact business operations, such as a processing error during financial year closing. Emergency changes are fast-tracked to restore service or prevent further disruption, bypassing some standard change management processes while still requiring approval.

Normal changes (A) follow the full change management process, standard changes (B) are pre-approved and routine, and exceptional (C) is not a standard ITIL term. Emergency change (D) fits the scenario of urgent action to avoid business delays.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's change management processes, specifically emergency changes. Refer to the section on ITIL change management or service operation.

46. Frage

Vendor management meetings take place several times per year. What is the main objective for these meetings?

- A. Explore improvement programs
- B. Discuss improvement programs
- C. Identify possible price increases
- **D. Verify if the vendor continues to meet the requirements of the contract, supporting the business processes**

Antwort: D

Begründung:

The main objective of vendor management meetings is to verify if the vendor continues to meet the requirements of the contract, supporting the business processes(C). These meetings, as part of vendor management frameworks, ensure that the vendor's performance aligns with contractual obligations, service level agreements (SLAs), and business needs. They involve reviewing service delivery, compliance, and any issues affecting business processes.

* Explore improvement programs (A): A secondary goal, as improvements may arise from performance reviews.

* Identify possible price increases (B): Price discussions may occur, but they are not the primary focus.

* Discuss improvement programs (D): Similar to A, this is a potential outcome but not the main objective.

Reference: EPI CITM study guide, under Vendor Selection/Management, likely covers vendor performance monitoring and contract compliance. Check sections on vendor management or SLA monitoring.
