Topic 4	<ul style="list-style-type: none"> • Create, manipulate, analyze, and use cluster data in common scenarios • Recognize data types on the front panel
Topic 5	<ul style="list-style-type: none"> • Group related data by creating a cluster to improve data organization and VI readability • Choose appropriate code as a SubVI source

The benefit in Obtaining the CLAD Exam Certification

An associate developer certification (CLAD) that must expire in November. I am a PhD student and went to school, so I never took advantage of the certification. However, I have a friend who has an associate developer certification and has worked for Caterpillar. He asked his superiors if he would benefit from certification as a developer (CLAD) and they replied that he didn't care about his certification and that this would not improve his job opportunities.

The certifications are therefore: DRESSCLDarchitect

CLD is a more difficult exam in which you will have to create a VI and will be judged by a human being in the way you codified it (comments/error handling, etc.)

The architect is really difficult and cannot expect to succeed without having a few years of experience working with Labview in a multi-developer environment. I think about things like version control and project division, etc. I would start to play

From what I heard from an NI apprentice who trained us for CLAD, there are approximately 2000 architects worldwide. An architect level master's degree must provide you with a team leader + some type of position.

As with all certifications, they have as much value as the employer chooses to evaluate them.

NI Certified LabVIEW Associate Developer Examination Sample Questions (Q43-Q48):

NEW QUESTION # 43
